

The Florida Senate
BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Committee on Children, Families, and Elder Affairs

BILL: SPB 7012

INTRODUCER: For consideration by Children, Families, and Elder Affairs Committee

SUBJECT: Independent Living

DATE: February 15, 2013 **REVISED:** _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	Preston	Hendon	CF	Submitted as Committee Bill
2.	_____	_____	_____	_____
3.	_____	_____	_____	_____
4.	_____	_____	_____	_____
5.	_____	_____	_____	_____
6.	_____	_____	_____	_____

I. Summary:

SPB 7012 provides that young adults who were in the foster care system and who did not reach permanency before reaching 18 years of age under current law may remain in care until reaching 21 years of age. The bill also provides eligibility criteria to remain in care, allows a young adult to leave and reenter care anytime before reaching 21 years of age, and requires young adults who are in care to reside in supervised living arrangements. The bill requires the development of a transition plan and requires the continuation of case management, service delivery, and judicial review for young adults remaining in care.

The bill makes a number of changes related to foster parents and group home parents and staff including providing requirements and expectations for foster parents, group home parents and providers, the department, the community-based care lead agencies and their providers. The bill also requires that foster parents be afforded adequate training and support and be included in a full and equal respectful partnership with other participants in the child welfare system and requires group home staff to meet the same training, background and other screening requirements as foster parents. The bill codifies the board rate for foster parents and provides for an annual cost of living increase. The bill also transfers the responsibility of providing independent living skills for children 13-17 years of age to the foster parents and group home parents, eliminates the need to contract for those services, and relieves caseworkers from some responsibilities associated with independent living services for 13-17 year olds. Provisions related to normalcy and the reasonable and prudent parent standard are also contained in the bill.

The bill restructures the Road-to-Independence (RTI) Program, providing for financial assistance for those young adults who are attending a post secondary school or program under Section 1009.533, Florida Statutes. The bill provides for aftercare services for young adults who leave

care and for an appeals process. The bill enables young adults currently receiving independent living transition services to continue in the existing program until their eligibility for that benefit program expires. The bill provides for portability of services and support for children and young adults who relocate within the state, provides for collaboration between the Department of Children and Families (DCF or department) and colleges and universities for an educational support program, and creates a new budget category for independent living expenditures.

The bill is expected to have a positive fiscal impact on the state and the private sector and has an effective date of October 1, 2013.

This bill substantially amends the following sections of the Florida Statutes: 39.013, 39.701, 409.145, 409.1451, 409.175 and 409.903. This bill creates sections 39.6035 and 39.6251, Florida Statutes.

II. Present Situation:

Independent Living (IL) Program

Background

Each year thousands of children leave state dependency care systems because they reach the age of 18 and are no longer eligible for care. Since the early 1980's, research and anecdotal evidence have indicated that many of these young adults experience numerous difficulties in their attempts to achieve self-sufficiency. When compared to young adults with no exposure to the child welfare system, young adults who were formerly in care are less likely to earn a high school diploma or GED and subsequently, have lower rates of college attendance.¹ They suffer more from mental health problems; have a higher rate of involvement with the criminal justice system; are more likely to have a difficult time achieving financial independence, thus increasing their reliance on public assistance; and experience high rates of housing instability and homelessness.²

As of December 2012, in Florida there were 5,288 youth ages 13 through 17 in licensed foster care eligible for independent living services and there were 1,386, 1,304 and 1,181 children who aged out of care in FY 2009/2010, 2010/2011, and 2011/2012 respectively.³ While attention to their needs has increased significantly over the past decade, the services intended to help prepare them to live independently upon aging out of the system appear to remain inadequate and not as effective as they could be.

Federal Law

John H. Chafee Foster Care Independence Program

The federal government responded to the needs of children who age out of care by enacting the Foster Care Independence Act of 1999 (Chafee Act).⁴ The Chafee Act provides states with flexible funding that enables programs to be designed and conducted to serve children who are likely to remain in foster care until age 18, children who, after attaining 16 years of age, have left foster care for kinship guardianship or adoption, and young adults ages 18-21 who have "aged out" of the foster care system.⁵

Age restrictions were also eliminated, allowing states to offer independent living services to children earlier than age 16.⁶ The Chafee Act grants wide discretion to the states, allowing them to set their own criteria for children in care to receive services.⁷ However, states must use objective criteria for determining eligibility for benefits and services under the programs and for ensuring fair and equitable treatment of benefit recipients.⁸

Each state is allotted an amount of funds which has the same ratio as the number of children in foster care in that state to the total number of children in foster care in all states in the most recent fiscal year for which such information is available. A 20 percent state match is required.⁹

Education and Training Vouchers

The Educational and Training Vouchers Program (ETV) for children aging out of care was added to the Chafee Act in 2002. ETV provides resources specifically to meet the education and training needs of youth aging out of care. Funding is provided for post secondary educational and training vouchers for children and young adults likely to experience difficulty as they transition to adulthood after reaching 18 years of age. The program makes available vouchers of up to \$5,000 per year per young adult.¹⁰

National Youth in Transition Database (NYTD)

The Chafee Act also required the Administration for Children and Families (ACF) to develop a data collection system to track the independent living services states provide to children and young adults and develop outcome measures that may be used to assess states' performance in

⁴ Pub. Law No. 106-169, 113 Stat. 1822 (1999). Federal funds for independent living initiatives were first made available under the Consolidated Omnibus Budget Reconciliation Act of 1985.

¹⁰ U.S. Department of Health and Human Services, Administration for Children and Families, *The John H. Chafee Foster Care Independence Program*. available at http://www.acf.hhs.gov/programs/cb/programs_fund/state_tribal/jh_chafee.htm (last visited Feb. 12, 2013).

operating their independent living programs.¹¹ Subsequent regulation established NYTD and requires states to engage in two data collection activities:

- States must collect information on each youth who receives independent living services paid for or provided by the state agency that administers the Chafee Act; and
- States must collect demographic and outcome information on certain youth in foster care who will be followed over time to collect additional outcome information. This information will allow ACF to track which independent living services provided by states and assess the collective outcomes of youth.

Pursuant to regulation, states began collecting data for NYTD on October 1, 2010 and are required to report data to ACF semiannually.

Florida Law

With the enactment of federal legislation and increased available funding, the 2002 Florida Legislature established a new framework for the state’s independent living transition services to be administered by the department and the community-based care lead agencies to provide services and financial assistance to older children in care and young adults who leave the foster care system at age 18 in order to help them transition to self-sufficiency as adults.¹² Those service categories include:¹³

Table 1.

PROGRAM COMPONENTS	SERVICES PROVIDED	AGE GROUP
PRE-INDEPENDENT LIVING	Life skills training, educational field trips and conferences.	13 to 15 years
LIFE SKILLS	Independent living skills training, including training to develop banking and budgeting skills, interviewing skills, parenting skills, and time management or organizational skills, educational support, employment training, and counseling.	15 to 18 years
SUBSIDIZED INDEPENDENT LIVING (SIL)¹⁴	Financial assistance for living arrangements that allow the child to live independently of the daily care and supervision of an adult.	16 to 18 years
AFTERCARE SUPPORT	Housing, electric, water, gas, sewer service, food, mentoring, tutoring, mental health services, substance abuse counseling, life skills classes, parenting classes, job and career skills training, counselor consultations, temporary financial assistance, and financial literacy skills training.	18 to 23 years

¹¹ U.S. Department of Health and Human Services, Administration for Children and Families, *The John H. Chafee Foster Care Independence Program*. available at <http://www.acf.hhs.gov/programs/cb/resource/about-nytd?page=all> (last visited Feb. 12, 2013).

¹² The department provided independent living services to older youth in foster care prior to the creation of Section 409.1451, F.S., with provisions for those services appearing in a number of sections of Florida Statutes, including Section 409.145, F.S., relating to care of children (2001), and Section 409.165, F.S., relating to alternative care of children (2001).

¹³ Section 409.1451, F.S.

¹⁴ Subsidized independent living provides an opportunity for youth ages 16-17 to receive a cash subsidy and other services from the department, and placement in a living arrangement not required to be licensed and not under the daily care and supervision of an adult. Subsidized independent living arrangements established for a youth must be part of an overall plan leading to total independence from the department's supervision.

PROGRAM COMPONENTS	SERVICES PROVIDED	AGE GROUP
ROAD-TO-INDEPENDENCE PROGRAM	Financial assistance for education.	18 to 23 years
TRANSITIONAL SUPPORT	Financial, housing, counseling, employment, education, mental health, disability, and other services.	18 to 23 years

Outcome measures and minimum standards

Multiple efforts have been made since the establishment of the independent living transition services program in order to have outcome measures and standards for the program that would allow for measurement of effectiveness of IL services:

- In 2002, the legislature required the department to establish outcome measures for the independent living program.¹⁵
- As a result of no standards or measures being developed by the department, in 2004 the legislature directed the Office of Program Policy and Government Accountability (OPPAGA) to recommend minimum standards for the independent living transition services.¹⁶ OPPAGA provided those recommended minimum standards to the department in November 2004.¹⁷ The OPPAGA report also emphasized that at a minimum, the success of a provider's program should be based on how well children in care progress on three major variables: education,¹⁸ life skills,¹⁹ and employment.²⁰ Without minimum skills in these three areas, children in care cannot hope to live self-sufficiently.²¹
- A subsequent report issued by OPPAGA in 2005 noted that standards had still not been developed and recommended that the department should develop minimum standards of performance for IL programs and include those standards in contracts with providers.²²
- In 2006 the legislature again required the department to establish minimum standards for independent living transition services for current and former foster youth and incorporate

(Dec. 2005), available at <http://www.oppaga.state.fl.us/MonitorDocs/Reports/pdf/0561rpt.pdf> (last visited Jan. 10, 2013).

minimum independent living standards into lead agency contracts by July 1, 2007.²³ The department, in coordination with community-based care lead agencies, was also required to develop measures for assessing the effectiveness of lead agency performance in meeting these minimum standards by July 1, 2007.²⁴ In addition, the department was required to begin monitoring lead agency performance in accordance with these requirements by Fiscal Year 2008-09.²⁵

- In a 2007 report, OPPAGA noted that the department had made limited progress on developing minimum standards and had made some progress on developing outcome measures. OPPAGA again recommended that the department develop the required standards and incorporate them into lead agency contracts.²⁶
- The annual report published by the Independent Living Services Advisory Council (ILSAC) in 2008 stated:

In our 2006 report, the ILSAC developed a set of youth outcome measures that we encouraged the department to adopt and integrate. It was our expectation, the legislature and the Department would find elements of the baseline data so alarming that a sense of urgency and call to action would result in the immediate establishment of youth outcome measures and benchmarks in every community based care contract... In the last year, we still have not identified and established Florida's standard of acceptable youth outcome levels; and those acceptable youth outcomes have not been incorporated into the CBC contracts.²⁷

- The department's response to the 2007 OPPAGA report stated that they were revising lead agency contracts to include minimum standards related to IL services, a subsequent report issued by OPPAGA in 2010 stated that the department had not established an effective mechanism to ensure that lead agencies meet minimum contract standards and that DCF had not established outcome measures as required by law.²⁸

Additional IL program findings:

Office of Program Policy and Government Accountability (OPPAGA)

OPPAGA has evaluated and examined numerous aspects of the IL program multiple time since 2004. In addition to findings related to outcome measures and minimum standards, the office has reported the following:

²³ Chapter 2006-25, Laws of Fla. These standards were to be consistent with, but not limited to, the standards contained in the Office of Program Policy and Analysis and Government Accountability (OPPAGA) Report No. 04-78.

(Mar. 2010), available at <http://www.oppaga.state.fl.us/MonitorDocs/Reports/pdf/0711rpt.pdf>. (last visited Jan. 14, 2013).

- In 2005, OPPAGA evaluated the independent living services program. While the primary focus of the OPPAGA evaluation was on services for young adults formerly in foster care, OPPAGA also sought to determine if the department was adequately monitoring the delivery of contracted independent living services.²⁹ OPPAGA concluded that while the department's oversight of community based care providers had improved over time, more improvements were needed. Specifically, quality management processes did not ensure that providers were delivering quality services.³⁰
- OPPAGA re-evaluated the independent living services program in 2007 and reported that the department needs to improve fiscal oversight of the independent living program to ensure that program resources were being used as intended and in compliance with state and federal guidelines. It was determined that lack of information hinders the department's ability to provide oversight and assess the quality and level of independent living services. As a result, neither the department nor the lead agencies could readily determine if children in care receive the required independent living transition services. This also has hindered the department and lead agencies' ability to accurately determine budget needs for serving this population.³¹
- In 2010, OPPAGA found that the department had broadened its contract monitoring and quality assurance systems to better address key elements of the IL program but it continued to lack the ability to track whether 13-17 year olds received services as required by law.³²

Office of the Auditor General

In the most recent operational audit of the DCF independent living transition services program conducted by the Auditor General, audit findings revealed the following:

- **Needs Assessment** – The department and CBC lead agencies did not require that actual living and educational expenses be utilized as a basis for determining the amounts of the RTI awards made to high school students. The department set the amount of the award at the statutory maximum. Additionally, for post-secondary students, the department and CBCs were unable to provide documentation supporting the appropriateness of the amounts of the RTI awards.
- **Appropriate Progress** – DCF rules and guidelines did not specifically address the type of documentation that would be sufficient to demonstrate appropriate progress by students in GED programs.
- **Services and Payments** – There were instances where young adults received multiple payments for the same service from multiple programs. Documentation was not always provided evidencing assessment of need for Aftercare Support assistance. In addition:

²⁹ Office of Program Policy Analysis and Gov't Accountability, Florida Legislature *Improvements in Independent Living Services Will Better Assist State's Struggling Youth*, Report No. 05-61. (Dec. 2005), available at <http://www.oppaga.state.fl.us/MonitorDocs/Reports/pdf/0561rpt.pdf> (last visited Jan. 11, 2013).

³⁰ *Id.*

³² Office of Program Policy Analysis and Gov't Accountability, Florida Legislature *DCF Has Improved Some Aspects of Independent Living Program Oversight: Other Long-Standing Problems Remain*, Report No. 10-30. (Mar. 2010), available at <http://www.oppaga.state.fl.us/MonitorDocs/Reports/pdf/0711rpt.pdf> (last visited Jan. 14, 2013).

- There was an inappropriate use of Transitional Support funds for achieving an educational goal;
 - Payments were erroneously coded;
 - Payments were made to ineligible individuals;
 - There were instances where young adults did not meet program eligibility requirements, including instances in which the maximum age limitation was exceeded; and
 - Payments were made in excess of established spending caps.
- **Subsidized Independent Living (SIL)** – The department and CBCs were unable to provide documentation to support the required number of services worker visitations. In addition, the department and applicable CBCs were unable to provide documentation showing that staffings, assessments, and judicial reviews had been completed.
 - **Staffings, Assessments, Case Plans** – The department and CBCs did not properly conduct or provide supporting documentation showing that staffings, assessments, and case plans for adolescents ages 13 to 17 had been completed.
 - **Florida Safe Families Network (FSFN)** – DCF did not require CBCs to fully utilize the functionality of FSFN specific to the independent living (IL) program although system capabilities were available.
 - **Monitoring** – Department monitoring efforts were not sufficient to ensure IL program compliance.^{33,34}

An operational audit of the independent living transition services program performed by the Auditor General in 2005 at the direction of the legislature reported almost identical findings.³⁵

Independent Living Services Advisory Council (ILSAC)

When the Florida legislature established a new framework for Florida's independent living transition services in 2002, the legislation provided for the creation of an independent living services integration workgroup tasked with assessing the implementation and operation of the redesigned program. The ILSAC annual reports are required to be accompanied by a report from the department that identifies the recommendations of the workgroup and either describes the department's actions to implement these recommendations or provides the department's rationale for not implementing the recommendations.³⁶

- The 2006 annual report stated that the ILSAC recognized that there have been tremendous strides in the past year. However much more remains to be done before it can be said that the young people in Florida who age out of foster care are successful and productive adults. The report continues, "we have gone on too long without accountability. Every dollar spent on independent living services should have a measurable impact on the quality of the lives for

³⁶ Section 409.1451, F.S. In 2004, the workgroup became the Independent Living Services Advisory Council.

our foster care youth and young adults, especially in the areas of education, employment, housing, financial stability and permanency.”³⁷

- While we recognize the great accomplishment of the Department in their efforts to collect baseline data on over 7,000 youth and young adults in 2007—the baseline data indicates significant areas of deficit in both youth achievement and Community Based Care service delivery practice. There is much work to be done to significantly change the outcomes for Florida’s youth who are aging out of foster care.³⁸
- While we recognize the great accomplishment of the Department in their efforts to collect baseline data on over 8,800 youth and young adults over two successive years—the baseline data continues to indicate significant areas of deficit in both youth achievement and Community Based Care service delivery practice.³⁹
- ILSAC has recommended since 2006 that a program planning and delivery reporting tool be developed for determining the independent living services, outcomes and fiscal implications of projected and actual delivery of services for youth ages 13 to 23 for all CBC lead agencies. ILSAC has also recommended establishment of provider accountability through corrective action as part of ongoing quality assurance benchmarks—not of services provided or youth served – but of outcomes achieved by youth in care. Some progress has made on these recommendations but we are still not at a point where we can report to key stakeholders how our dollars are spent and how the young people in our care are faring in terms of education, permanency, health care, and employment. Outcomes have been established in CBC lead agency contracts in the past year that will provide some data on how our youth are faring but are still inadequate in measuring the success of youth in our care.⁴⁰

Department of Children and Family Services Report on Outcome Measures and Oversight Activities

The department was required to develop outcome measures for the independent living transition services program and other performance measures in order to maintain oversight of the program.⁴¹ A required annual report to the legislature must contain an analysis of performance on the outcome measures reported for each community-based care lead agency as compared with the performance of the department on the same measures and a description of the department's oversight of the program, including, by lead agency, any programmatic or fiscal deficiencies found, corrective actions required, and current status of compliance.⁴²

The department’s Contract Oversight Unit randomly selected cases of youth eligible to receive independent living services and young adults formerly in foster care and conducted a file review to determine if the requirements of Florida Statute and Florida Administrative Code were met.

⁴¹ Section 409.1451(6), F.S.

⁴² *Id.*

This included a review of eligibility requirements for these services. Deficiencies in cases or areas of concern with the delivery of independent living services were noted in reports submitted to the department’s contract managers and department leadership. The contract managers determined if the area of deficiency warranted a corrective action plan (CAP). If a CAP was necessary to address concerns, the community-based care lead agency was required to develop steps and processes to bring services into compliance with federal regulations, Florida Statute, Florida Administrative Code, and the contract. The January 2012 report contains the following table (Table 2) summarizing the monitoring of the community-based care lead agencies for the 2011 calendar year, and the action taken by the department to address deficiencies.⁴³

Table 2.

CIRCUIT	CBC	IDENTIFIED AREAS OF DEFICIENCY (SPECIFIC TO IL SERVICES)	DCF RESPONSE (SPECIFIC TO IL SERVICES)
3, 8	Partnership for Strong Families	Independent Living requirements were not met	Corrective Action Plan is in place.
4	Family Support Services of North Florida	Some Independent Living requirements were not met	Corrective Action Plan not needed.
4	Clay Baker Kids, Inc.	Some Independent Living requirements were not met	Corrective Action Plan is in place.
7	Family Integrity Program	Some Independent Living requirements were not met	Corrective Action Plan not needed.
11	Our Kids of Miami-Dade-Monroe, Inc.	Some Independent Living requirements were not met	Corrective Action Plan is in place.
17	ChildNet, Inc.	Independent Living requirements were not met	Corrective Action Plan is in place.
19	United for Families	Some Independent Living requirements were not met	Corrective Action Plan is in place.
20	Children's Network of SW Florida	Independent Living requirements were not met	Corrective Action Plan is in place.

Surveys

To address federal and state requirements, the department implemented two surveys to capture data on independent living services and outcomes:

- The My Services Review Survey that captures information on services for children 13 to 17 years of age; and
- The National Youth in Transition Database Survey that captures data and tracks outcomes on young adults 18 to 22 years of age.

by promoting permanent families for them through relative guardianship and adoption and by improving educational stability and quality coordinated health care. Specifically, the Act:

- Promotes permanent families for children in care with relatives by providing notice to relatives when a child enters care, providing subsidized guardianship payments for relatives, and waiving certain licensing standards for relatives;
- Promotes permanent families for children with adoptive families by increasing opportunities for more children with special needs to receive federally-supported adoption assistance; and
- Improves outcomes for children in care by:
 - Allowing children who turn 18 in care without permanent families to remain in care, at state option, to age 19, 20, or 21 with continued federal support to increase their opportunities for success as they transition to adulthood;
 - Helping children in care achieve their educational goals by requiring that states ensure that they attend school and, when placed in care, they remain in their same school where appropriate, or, when a move is necessary, get help transferring promptly to a new school; and
 - Helping improve health care for children in care by requiring the state child welfare agency to work with the state Medicaid agency to create a plan to better coordinate health care for these children in order to ensure appropriate screenings and assessments and follow-up treatment and to assure sharing of critical information with appropriate providers and oversight of prescription medications.⁴⁷

Quality Parenting Initiative

The Quality Parenting Initiative (QPI) is a statewide initiative that is a joint project of the Youth Law Center, Florida's Department of Children and Families, community-based care lead agencies and the Eckerd Family Foundation, designed to promote quality care for children in foster care by redefining the expectations and roles of foster parents. QPI was developed to ensure that every child removed from the home because of abandonment, abuse or neglect is cared for by a foster family who provides skilled, nurturing parenting while helping the child maintain connections with his or her family. The foster family works closely with child welfare agencies, case workers, courts, attorneys and others to protect the child's best interests.⁴⁸

One of the key ways the QPI supports these foster families is by providing in-depth training to help them manage the challenges they face. These may be routine events, like appearing in court, or more complex problems like helping a child transition home, coping with behavioral problems, or advocating for special education services. The training also helps families to better understand any information they were given about the child at the time of placement so they can be proactive in advocating for the child and getting the right assistance.⁴⁹

A web based learning project has been designed to connect foster parents with trainers who can answer their questions and give them a framework for dealing with these challenges. The project

coordinator will receive requests for training and will quickly identify individuals who are available to provide that training. These may be subject matter experts, like doctors, psychologists, lawyers or teachers. Or they may be practice experts like other foster parents who have successfully dealt with the same situation. The training is provided live online and the training webinars are video recorded, edited, and available at no charge for use by other families who are unable to attend or for later use as a refresher for participants.⁵⁰

Normalcy

Background

Each year, approximately 30,000 children in foster care age out of the foster care system nationwide, typically at 18 years of age, and this number has risen steadily over the past decade.⁵¹ In Florida, an average of 1,290 children aged out of care over the past three years.⁵² These are young adults who experienced significant psychological trauma during their formative years, including being neglected and/or abused, being separated from their homes, friends, families and most things familiar to them, and often experiencing multiple placements in homes and group home settings.

The foster care system, which has historically been focused on safety and concerned about liability, often creates huge barriers to the normalcy of a child's experiences growing-up, causing children in care to miss out on many rites of passage common to their peers. While their friends are getting their driver's licenses, most children in care are not since they generally have no one to teach them to drive or the money for insurance or driver's education, let alone access to a car.⁵³ Other rites of passage are anything but typical for children in care, as each one requires some additional layers of bureaucracy. Getting a first job, participating in sports, going camping with friends, and even going to the prom are all examples of activities that, while may be a normal part of growing up for most children and teenagers, are not always readily available to many foster youth.⁵⁴

These problems are compounded for children in care who live their teen years in group homes. They often do not benefit from normal growing-up experiences that most children take for granted, but which prepare them for adult life, such as seeing an adult pay bills each month, do the laundry, buy groceries, pay taxes, arrange for car insurance, or undertake the dozens of other mundane tasks required to run a household.⁵⁵ In Florida, 60 percent of children 13-17 years of age live in group homes.⁵⁶

Florida

The Department of Children and Families (DCF or department) and community-based care lead agencies (CBCs) are responsible for dependency proceedings and managing and providing child protection, foster care, and adoption services. Foster care services include a range of independent living services. Section 409.1451, F.S., requires the department to adopt by rule procedures to administer the independent living transition services program, including balancing the goals of normalcy and safety for children and providing caregivers with as much flexibility as possible to enable a child to participate in normal life experiences. Current rule, relating to licensed out of home caregiver roles provides that:

- Children in licensed out-of-home care shall be afforded every opportunity for social development, recreation, and normalization of their lives. Children in licensed out of home care may attend overnight or planned outings if such activities are determined to be safe and appropriate by the licensed out-of-home caregiver. The services worker ... must be notified of the activity.
- The licensed out of home caregiver may allow foster children to experience circumstances without adult supervision depending on the child's age, maturity, and ability to make appropriate decisions ... the licensed out of home caregiver shall be prudent and conscientious about circumstances where the child is granted independence, including trips to the movies, mall, athletic events and work.
- Overnight trips exceeding one night must be approved by the child's services worker and must not interfere with visitation schedules.
- Background checks for dating and outings, such as school field trips, Cub Scout campouts, and activities with friends, families, school and church groups, are not necessary for participation in normal school or community activities.⁵⁷

The department has proposed changes to the rule relating to licensed out of home caregiver roles, however these changes do not appear to substantively change provisions relating to normalcy. In addition, former secretaries and the current secretary of the department have issued memoranda requiring community-based care lead agencies and their providers to implement policies related to normalcy.⁵⁸ In general foster teens continue to report that the effort to establish a more normal living environment within the foster care system is still lagging.⁵⁹

III. Effect of Proposed Changes:

The bill creates the option for young adults who have not found permanency before reaching 18 years of age, to remain in care up to the age of 21 in order to finish high school, earn a GED, pursue post secondary education or begin a career. The bill also restructures the Road-To-Independence Program, strengthens the role and authority of foster parents and group home parents, and codifies the concept of normalcy for children in care. Specifically, the bill provides the following:

⁵⁷ Rule 65C-13.029, F.A.C.

⁵⁸ See Memorandum from Lucy Hadi dated Aug. 31, 2005, Memorandum from George Sheldon dated Sept. 3, 2010, and Memorandum from David Wilkins dated Jan. 20, 2012.(on file with the Senate Children, Families, and Elder Affairs Committee.)

⁵⁹ Independent Living Services Advisory Council. Annual Report. 2012.

Extension of Foster Care

In sections 1, 2, 3, and 4, the bill provides young adults with the ability to remain in care until they reach 21 years of age. This would give those young adults who are eligible to, and choose to, remain in care up to an additional three years to be provided with housing and other services and support in order to finish their secondary or post secondary education or become employed. Young adults may remain in care if they are:

- Completing secondary education or a program leading to an equivalent credential;
- Enrolled in an institution that provides postsecondary or vocational education;
- Participating in a program or activity designed to promote or eliminate barriers to employment;
- Employed for at least 80 hours per month; or
- Unable to participate in programs or activities listed above full time due to a physical, intellectual, emotional, or psychiatric condition that limits participation.

For a young adult choosing to remain in care, the bill provides for:

- The creation of a transition plan after his or her 17th birthday that will be reviewed and updated as necessary until leaving care;
- Extension of court jurisdiction for as long as he or she remains in care;
- Specific criteria to be considered during judicial reviews;
- Extension of case management and other necessary services until he or she leaves care;
- The ability to transition in and out of care until the age of 21;
- Supervised living arrangements and required standards for those arrangements; and
- A process for appealing a determination of eligibility to remain in care.

Road-to-Independence Program

In section 6, the bill restructures the current Road-To-Independence Program to accommodate the differing needs of young adults who are either remaining in foster care or choosing to leave and are pursuing a postsecondary skill, trade, or higher education.

A young adult is eligible for services and support under this subsection if he or she:

- Was living in licensed care on his or her 18th birthday or is currently living in licensed care; or was at least 16 years of age and was adopted from foster care or placed with a court-approved dependency guardian after spending at least 6 months in licensed care within the 12 months immediately preceding such placement or adoption;
- Spent at least 6 months in licensed care before reaching his or her 18th birthday;
- Earned a standard high school diploma or its equivalent pursuant to Sections 1003.428, 1003.4281, 1003.429, 1003.43, or 1003.435. F.S.;
- Has been admitted for enrollment in an eligible postsecondary educational institution as provided in s. 1009.533. F.S.;
- Has reached 18 years of age, but is not yet 23 years of age;

- Has applied, with assistance from the young adult's caregiver and the community-based lead agency, for any other grants and scholarships for which he or she may qualify;
- Submitted a Free Application for Federal Student Aid which is complete and error free; and
- Signed an agreement to allow the department and the community-based care lead agency access to school records.

The amount of the financial assistance provided for pursuing post secondary education as provided in s. 1009.533, F.S., depends on whether or not a young adult remains in care and whether or not he or she continues to live in a licensed foster home, licensed group home, or in another supervised living arrangement:

- For a young adult who does not remain in foster care and is attending a postsecondary school, the amount is \$1,256 monthly.
- For a young adult who remains in foster care, and continues to reside in a licensed foster home, the amount is the established room and board rate for foster parents.
- For a young adult who remains in foster care, but temporarily resides away from a licensed foster home for purposes of attending a postsecondary school, the amount is \$1,256 monthly. This takes the place of the foster care room and board payment.
- For a young adult who remains in foster care, is attending a postsecondary school, and continues to reside in a licensed group home, the amount is negotiated between the community-based care lead agency and the licensed group home provider.
- For a young adult who remains in foster care, but temporarily resides away from a licensed group home for purposes of attending a postsecondary school, the amount is \$1,256 monthly. This takes the place of a negotiated room and board rate.

A young adult is eligible to receive financial assistance during the months when enrolled in a postsecondary educational institution.

Payment of financial assistance for a young adult who:

- Has chosen not to remain in foster care and is attending a postsecondary school, shall be made to the community-based care lead agency in order to secure housing and utilities, with the balance being paid directly to the young adult until such time the lead agency and the young adult determine that the young adult can successfully manage the full amount of the assistance.
- Has remained in foster care under s. 39.6251, F.S., and who is attending postsecondary school, shall be made directly to the foster parent or group home provider.

The bill provides for aftercare services for young adults who have chosen not to remain in foster care after reaching 18 years of age and who are not receiving financial assistance under this program to pursue postsecondary education. These aftercare services include, but are not limited to, the following:

- Mentoring and tutoring.
- Mental health services and substance abuse counseling.
- Life skills classes, including credit management and preventive health activities.

- Parenting classes.
- Job and career skills training.
- Counselor consultations.
- Temporary financial assistance for emergency situations.
- Financial literacy skills training.

A young adult who has reached 18 years of age but is not yet 23 years of age who leaves foster care at 18 years of age may request and is eligible for such services before reaching 23 years of age.

The bill provides for portability of services and support for children and young adults who relocate within the state and provides for a transition for those young adults who entered the program under current law.

Quality Parenting

In section 6, the bill clarifies that the department is to create a system of care for dependent children and codifies the concept that temporary or permanent substitute quality parenting is a core function of that system of care. The bill recognizes the effectiveness of the Quality Parenting Initiative in Florida by:

- Relieving caseworkers from many responsibilities associated with independent living services for 13-17 year olds, transferring those duties to the foster parents and group home parents, and eliminating the need to contract for those services;
- Providing requirements and expectations for foster parents and group home parents and providers;
- Providing requirements and expectations for the department, the community-based care lead agencies and their providers;
- Requiring that foster parents be afforded adequate training and support, be included in a full and equal respectful partnership with other participants in the child welfare system, be encouraged to share their expertise about the child, and be allowed to assist in meeting the goals of the child and the family;
- Requiring group home staff to meet the same education, training, background and other screening requirements as foster parents; and
- Codifying the board rate for foster parents and providing for an annual cost of living adjustment.

The bill also requires certain specified information related to a child to be shared with foster parents and group home parents and provides requirements related to transitioning a child from one placement to another.

Normalcy

In section 6, the bill makes numerous changes to the law relating to normalcy for children in foster care including:

- Providing legislative findings and intent that recognize the importance of normalizing the lives of children in foster care;
- Providing definitions for the terms “age-appropriate,” “caregiver,” and “reasonable and prudent parent standard;”
- Requiring verification by the department and the community-based care lead agencies that private providers have policies in place promoting and protecting the concept of normalcy;
- Establishing a reasonable and prudent parent standard of care and provides for application of the standard;
- Protecting caregivers who apply reasonable and prudent parent standard from liability; and
- Eliminating the current requirements for the development of a normalcy plan and quarterly updates for children in foster care and replacing them with an assessment of normalcy goals and objectives at each judicial review.

Administrative rule and memoranda from the office of the department secretary have proven to be insufficient to ensure that the CBCs and their providers set policies allowing children to engage in normal, age-appropriate activities. Children in care are still being denied opportunities to participate like their peers. Empowering the caregiver in statute to approve or disapprove participation in activities by using the reasonable and prudent parent standard and providing them with protection from liability when doing so may improve the chances that all children in foster care have a better chance at normalcy.

Additional Provisions

In sections 9 and 11, the bill also provides for the following:

- Collaboration between DCF and colleges and universities for an educational support program; and
- A new budget category for the IL program.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

The bill will require the termination or non-renewal of most, if not all of the contracts between CBC lead agencies and providers for independent living services for children 13-17 years of age.

The bill also has the potential to reduce the workload of caseworkers and IL case managers which could either result in those staff having more time to spend with children and their families or a reduction in the number of those positions.

The bill may result in an increased cost to those providers who operate group homes, particularly those that use a shift care model, for staff training.

C. Government Sector Impact:

The fiscal impact of the bill to the state can only be estimated as the actual impact will be determined by individual choices young adults in the foster care system will make and the types of services they may require. The main choice young adults in foster care will make is whether to stay in care and whether to pursue postsecondary education. Over the last three years, there has been an average of 1,290 young adults leaving the foster care system at age 18. Table 5 below shows the estimated fiscal impact if all young adults in the foster care system decided at age 18 to stay in care. The costs shown are estimates of expenditures by the community based care lead agencies to serve this group. The first column shows the types of services that make up the independent living program. The second column shows the expenditures from Fiscal Year 2011-2012. The third column shows the fiscal impact of changes in the bill. The fourth column shows the estimate of the annual cost of the program under the bill. The fourth column provides notes on the calculations of the cost of the bill.

Table 5.

ALL YOUNG ADULTS STAY IN CARE	FY 2011-12 EXPENDITURES	EFFECT OF BILL	ESTIMATED ANNUAL COSTS	NOTES
IL Case Mtg./Life Skills Training	13,066,982	(7,936,848)	5,130,134	No IL case mgt./Life Skills Training costs for youth age 13-17. Remaining costs are for IL case mgt. for grandfathered youth.
Subsidized IL	276,761	(276,761)		No more subsidized living.

RTI/room and board for new eligible young adults	N/A	11,859,305	11,859,305	Cost for 645 young adults in care is \$7.5 m. \$515 per month for foster care, \$1,256 for group home care. Used ratio of 61/39, group care to foster care. Cost for 645 leaving care is \$4.3 m, estimated 45% will qualify for RTI at \$1,256 per month.

HALF OF YOUNG ADULTS STAY IN CARE	FY 2011-12 EXPENDITURES	EFFECT OF BILL	ESTIMATED ANNUAL COSTS	NOTES
Cast mgt. for 18-20 year olds	N/A	1,617,015	1,617,015	Current cost of case mgt. for IL for 18-23 year olds is \$2,507 per year. \$2,507 per client per year for 645 young adults.
TOTAL	49,039,158	(7,463,975)	41,575,184	

Table 7 shows the estimated fiscal impact of none of the 1,290 young adults in foster care decide to stay in care. Costs will be incurred for some of these young adults as they would qualify for the Road to Independence program. Others leaving care could need transitional support services.

Table 7.

NONE OF YOUNG ADULTS STAY IN CARE	FY 2011-12 EXPENDITURES	EFFECT OF BILL	ESTIMATED ANNUAL COSTS	NOTES
IL Case Mtg./Life Skills Training	13,066,982	(7,936,848)	5,130,134	No IL case mgt./Life Skills Training costs for youth age 13-17. Remaining costs are for IL case mgt. for grandfathered youth.
Subsidized IL	276,761	(276,761)		No more subsidized living.
Aftercare Services	628,794		628,794	Costs remain same.
Transitional Support Services	5,208,321	4,400,190	9,608,511	All 1,290 leave care. Cost is \$3,411 per year per client (1,290*\$3,411).
RTI Stipends	29,858,300	(9,808,128)	20,050,172	55% of current RTI participants are completing high school with an average payment of \$1,152/month. Of 1,290 young adults reaching age 18, 710 (55%) would be ineligible for RTI due to not completing high school. Reduced costs = 710*\$1,152*12. Remaining costs for grandfathered young adults.
RTI/room and board for new eligible young adults	N/A	8,741,760	8,741,760	45% of 1,290 18 year olds would be eligible for RTI at a cost of \$1,256 per month. (580*\$1,256)*12.
Cast mgt. for 18-20 year olds	N/A	1,454,060	1,454,060	\$2,507 per client for case mgt. for 45% of 1,290 who would qualify for RTI (580).
TOTAL	49,039,158	(3,425,727)	45,613,431	

Finally, to account for inflation, the bill requires that foster care payments to licensed foster homes be increased for all ages each calendar year based on the consumer price index. The Department of Children and Families reports that in Fiscal Year 2011-2012, \$47,608,375 was spent on foster home room and board payments. According to the U.S. Department of Labor's Bureau of Labor Statistics, the most recent consumer price index for the south region was 1.7 percent. Using this figure, the cost of increasing foster care payments for the first year of the bill is \$404,671. The increase would begin on January 1, 2014. A full year cost for such an adjustment would be \$809,342.

To the extent that 18-20 year old foster children stay in care, the court may see an increase in the number of judicial reviews.
