

HOUSE OF REPRESENTATIVES STAFF ANALYSIS

BILL #: CS/CS/CS/HB 83 Infant Death

SPONSOR(S): Health & Human Services; Health Care Appropriations Subcommittee; Health Quality Subcommittee; Santiago

TIED BILLS: **IDEN./SIM. BILLS:** SB 56

REFERENCE	ACTION	ANALYST	STAFF DIRECTOR or BUDGET/POLICY CHIEF
1) Health Quality Subcommittee	13 Y, 0 N, As CS	Holt	O'Callaghan
2) Health Care Appropriations Subcommittee	12 Y, 1 N, As CS	Rodriguez	Pridgeon
3) Health & Human Services Committee	15 Y, 0 N, As CS	Holt	Calamas

SUMMARY ANALYSIS

The bill amends s. 383.3362, F.S., relating to Sudden Infant Death Syndrome (SIDS) to update the activities of the Department of Health (DOH) and the medical examiners when reporting and classifying the cause of death of an infant under 1 year of age who suddenly dies, when in apparent good health. The bill brings the law into conformity with current federal Centers for Disease Control and Prevention (CDC) standards of practice by redefining and using a category for infant death that is broader than SIDS called "Sudden Unexpected Infant Death (SUID)," which includes infant death resulting from: SIDS, accidental suffocation, metabolic errors, injury or trauma and unclassified or accidental causes.

The bill amends the legislative intent, definitions, training requirements for first responders, autopsy requirements performed by medical examiners, and the protocol for medical and legal investigations to reflect the new SUID standard. The bill requires the DOH to consult with child protection teams established in the Division of Children's Medical Services when developing training curriculum that is part of the CDC SUID Initiative and all other DOH duties relating to SUID. The bill amends the timeframe that an autopsy must be performed from within 24 hours to 72 hours after death or as soon as feasible.

The bill requires that birth center clients and their families receive information on safe sleeping practices and the possible causes of SUID and requires hospitals that provide birthing services to provide similar information.

Additionally, the bill deletes references to SIDS, and the SIDS hotline. The bill makes technical changes by restructuring the language to improve readability and deleting unnecessary words and an obsolete date.

This bill has an insignificant fiscal impact on state and local governments.

The bill provides an effective date of July 1, 2013.

FULL ANALYSIS

I. SUBSTANTIVE ANALYSIS

A. EFFECT OF PROPOSED CHANGES:

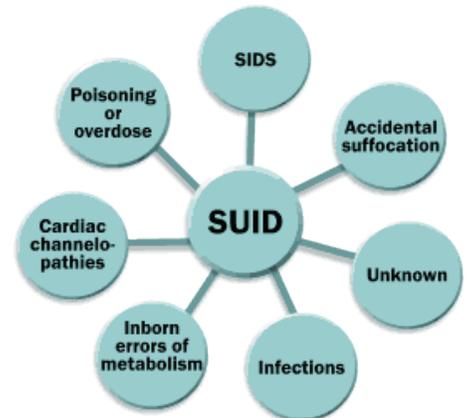

Present Situation

Sudden Infant Death Syndrome versus Sudden Unexpected Infant Death

The federal Centers for Disease Control and Prevention (CDC) defines Sudden Infant Death Syndrome (SIDS) as the sudden death of an infant less than one year of age that cannot be explained after a thorough investigation is conducted, including a completed autopsy, examination of the death scene, and review of the clinical history.¹ According to the CDC, SIDS is considered a diagnosis of exclusion and of unknown etiology. SIDS is a diagnosis that should be given only after all other possible causes of sudden, unexplained death have been ruled out through a careful case investigation, which includes a thorough examination of the death scene, a complete autopsy, and a review of the infant's medical history.²

SIDS is the leading cause of death among infants aged 1–12 months, and is the third leading cause overall of infant mortality in the United States.³ SIDS most commonly occurs in infants from two to four months of age and rarely after eight months of age. SIDS also occurs more frequently in African Americans, American Indians, and Alaska Natives than in Caucasians.⁴ Modifiable risk factors for SIDS include: overheating; stomach and side sleeping positions; soft sleeping surfaces; loose bedding; inappropriate sleep surface; sharing the same sleep surface; and maternal and secondhand smoking.⁵ SIDS is not caused by suffocation, aspiration, abuse, or neglect. According to the National Institute of Child Health and Human Development, recent research suggests that certain infants may be highly susceptible to SIDS, due to an abnormality in a specific nerve cell in the brain.⁶

SIDS is a subset of SUID. In contrast to SIDS, SUID is defined as deaths in infants less than one year of age that occur suddenly and unexpectedly, and whose cause of death is not immediately obvious prior to investigation. The most common causes of SUID are: SIDS, accidental suffocation, metabolic errors, injury or trauma and unclassified causes (e.g., if the death scene investigation and/or autopsy were incomplete or not done and the death certifier has insufficient evidence to record a more specific cause of death).

Federal Initiative for Sudden Unexpected Infant Death

Since the early 1990s, SIDS rates have declined by 50 percent, in large part due to the national campaign to place infants on their backs to sleep (Back-to-Sleep Campaign). Two reports⁷ conducted in 2005 and 2006, provide evidence that cause-of-death reporting and classifying of SUID may be unreliable. The studies found that the decline in the SIDS rate since 1999 was offset by an increase in

mortality rates for accidental suffocation and strangulation in bed and for unknown/unspecified causes. Some deaths that were previously reported as SIDS are now reported as deaths due to accidental suffocation or unknown cause. This finding suggests that changes in reporting of cause of death might account for part of the recent decrease in the rate of SIDS.⁸

To address these changes, the CDC began the SUID Initiative in order to improve investigation and reporting practices for SIDS and SUID. The SUID Initiative's goals include:

- Standardization and improvement of data collection at the death scene;
- Promotion of the consistent classification and reporting of the cause of death;
- Improving the national reporting of SUID; and
- Reducing SUID by using improved data to identify those at risk.

As a result, the CDC revised reporting forms, developed standardized training materials and implemented a state-based SUID case registry. In 2012, the CDC dispersed grants to 10 states to participate in the state-based SUID case registry.⁹

Florida Infant Death Statistics

The DOH reports annually on infant deaths throughout the state in the Florida Vital Statistics Annual Report.¹⁰ This report provides the number of fetal deaths per 1,000 live births, the number of deaths by race and compares that data to national figures. Additionally, specific information on infant mortality rates, including data on SIDS and SUID deaths by county may be queried in the FloridaCHARTS.com database.¹¹

From 2011 to 2009, there were 610 SUID and 181 SIDS recorded infant deaths in Florida.¹²

Recorded Florida Infant Deaths		
Year	SUID	SIDS
2011	195	47
2010	207	62
2009	208	72

Florida Sudden Infant Death Syndrome

Florida law currently defines SIDS as the "sudden unexpected death of an infant under 1 year of age which remains unexplained after a complete autopsy, death-scene investigation, and review of case history. The term includes only those deaths for which, currently, there is no known cause or cure."¹³

Since 1993, the DOH has been statutorily tasked with oversight of the SIDS program in Florida.¹⁴ The DOH is required to develop and adopt by rule a training curriculum in collaboration with the EMS Advisory Council; Firefighters Employment, Standards, and Training Council; and the Criminal Justice Standards and Training Commission. The training targets first responders (or "emergency responders"¹⁵) and is directed to focus on the nature of SIDS, standard procedures to be followed by

¹³ S. 383.3362(2), F.S.

¹⁴ Ch. 93-182, L.O.F.

¹⁵ An emergency responder is defined in rule to mean the law enforcement officers, paramedics, firefighters, emergency medical technicians, or other medical personnel who respond to the initial report of an unresponsive infant. See Rule 64F-5.001, F.A.C.

law enforcement investigating infant death cases that may implicate SIDS, and training on how to appropriately respond to families or caretakers at the time of the infant's death.¹⁶

The current rule requires that the SIDS Recognition and Response training program include, at a minimum, the following learning objectives:¹⁷

- Define SIDS.
- Describe the epidemiology of SIDS.
- Describe the physical features of an infant who has died of SIDS.
- Describe the circumstances associated with a SIDS death.
- Identify the activities the emergency responder initiates.
- Describe the varied responses of SIDS families to sudden infant death.
- Respond to SIDS families in a sensitive manner.
- Describe the varied emotional reactions of emergency responders to sudden infant death.
- Identify ways emergency responders may cope with their own critical incident stress.
- Identify the community resources available to SIDS families.

According to Florida Department of Law Enforcement, the training on the proper response in infant death cases is included in the Criminal Justice Standards and Training Commission approved curricula for basic and advanced training of law enforcement officers. Both the basic and advanced training curricula have been updated and now use the term SUID.¹⁸

Furthermore, the DOH is required to:¹⁹

- Collaborate with other agencies in the development and presentation of the SIDS training program for first responders, including emergency medical technicians and paramedics, firefighters, and law enforcement officers.
- Maintain a database of statistics on reported SIDS deaths, and analyze the data as funds allow.
- Serve as liaison and closely coordinate activities with the Florida SIDS Alliance²⁰, including the services related to the SIDS hotline.
- Maintain a library reference list and materials about SIDS for public dissemination.
- Provide professional support to field staff.
- Coordinate the activities of, and promote a link between, the fetal and infant mortality review committees of the local healthy start coalitions, the local SIDS alliance, and other related support groups.

Florida Medical Examiners Commission

Chapter 406, part I, F.S., creates the Medical Examiners Act and the Medical Examiners Commission. Florida law, under s. 383.3362, F.S., requires that an autopsy must be performed in all suspected SIDS cases by a medical examiner within 24 hours, or as soon as feasible.²¹ Section 383.3362(4)(d), F.S., cross-references s. 406.11, F.S., which provides the medical examiner authority, when deaths occur under certain circumstances, to examine, investigate, and perform autopsies as he or she deems necessary.

If the medical examiner's findings are consistent with SIDS, this condition must be listed as the cause of death on the death certificate. The Legislature granted medical examiners an exemption from civil

¹⁹ S. 383.3362(5), F.S.

²⁰ The Florida SIDS Alliance formed in 1985 and its mission is to provide a reliable and continuous source of assistance to parents who have lost a child suddenly and unexpectedly, provide information and referral networking, sponsor educational campaigns, and promote and support research into the cause and possible prevention of SIDS through fundraising and public education. The Florida SIDS Alliance operates a hotline (1-800-SIDS-FLA) and a website. See <http://flasids.com/blog/florida-sids-alliance/> (last visited Feb. 5, 2013).

²¹ S. 383.3362(4), F.S.

action for any act or omission that may occur from complying with the law by conducting the required autopsy on the infant.²²

Moreover, the Medical Examiners Commission within the Florida Department of Law Enforcement is required to develop a protocol for handling suspected SIDS autopsies.²³ The protocol was last updated on July 28, 2010.²⁴ All medical examiners are required to follow the protocol requiring familiarity with the circumstance and location of the body; review of the infant's clinical history to include determination of prenatal, delivery and postnatal medical information, which includes history of familial disease, mental illness and social setting pertinent to the exclusion of illnesses or child abuse; and a comprehensive autopsy. The comprehensive autopsy should include: x-rays; histology slides to exclude diagnosable disease processes; bacterial and viral cultures to exclude suspected infectious agents; and a toxicology study when indicated.²⁵

Effect of Proposed Changes

The bill amends the law relating to SIDS to update the activities of the DOH and the medical examiners when reporting and classifying the cause of death of an infant under 1 year of age who suddenly dies, when in apparent good health. The bill brings the law into conformity with current CDC standards of practice by redefining and using a category for infant death that is broader than SIDS called, "Sudden Unexpected Infant Death," which includes infant death resulting from: SIDS, accidental suffocation, metabolic errors, injury or trauma and unclassified or accidental causes.

The bill amends the legislative intent, definitions, training requirements for first responders, autopsy requirements performed by medical examiners, and the protocol for medical and legal investigations to reflect the new SUID standard. The bill requires that the child protection teams within DOH's Division of Children's Medical Services be consulted on the development of the training curriculum that is part of the CDC SUID Initiative and all other DOH duties relating to SUID. The bill amends the timeframe that an autopsy must be performed from within 24 hours to 72 hours after death or as soon as feasible.

Additionally, the bill deletes references to SIDS, and the SIDS hotline. The bill makes technical changes by restructuring the language to improve readability and deleting unnecessary words and an obsolete date. The bill amends the rulemaking provision to direct DOH to adopt and modify rules when necessary to the CDC SUID Initiative curriculum.

B. SECTION DIRECTORY:

Section 1. Amends s. 383.3362, F.S., relating to sudden infant death syndrome.

Section 2. Provides an effective date of July 1, 2013.

II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

A. FISCAL IMPACT ON STATE GOVERNMENT:

1. Revenues:

None.

2. Expenditures:

An insignificant increase in state expenditures is possible. This increase may be absorbed within agency existing resources associated with rule development and promulgation.

²² S. 383.3362(4)(c), F.S.

²³ S. 383.3364(4)(b), F.S. The Administrative Rule governing the SIDS Autopsy Protocol was repealed May 21, 2012. See ch. 11G-2.0031, F.A.C.

²⁴ Florida Department of Law Enforcement, Medical Examiners Commission, Practice Guidelines: Infant Deaths. Available at: <http://www.fdle.state.fl.us/Content/getdoc/916d04c4-f522-4d8a-b16b-15fe90a9b28e/Practice-Guidelines-2009-Adopted.aspx> (last viewed Feb. 5, 2013).

²⁵ *Id.*

B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

1. Revenues:

None.

2. Expenditures:

Not applicable. This bill does not appear to: require counties or municipalities to spend funds or take an action requiring the expenditure of funds; reduce the authority that counties or municipalities have to raise revenues in the aggregate; or reduce the percentage of a state tax shared with counties or municipalities.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

An insignificant economic impact on the private sector is possible related to the requirement that hospitals that provide birthing services incorporate information on safe sleep practices and the possible causes of SUID.

D. FISCAL COMMENTS:

None.

III. COMMENTS

A. CONSTITUTIONAL ISSUES:

1. Applicability of Municipality/County Mandates Provision:

This bill does not appear to require counties or municipalities to take an action requiring the expenditure of funds, reduce the authority that counties or municipalities have to raise revenue in the aggregate, nor reduce the percentage of state tax shared with counties or municipalities.

2. Other:

None Identified.

B. RULE-MAKING AUTHORITY:

The Department of Health has sufficient authority to implement the provisions of the bill.

C. DRAFTING ISSUES OR OTHER COMMENTS:

None.

IV. AMENDMENTS/ COMMITTEE SUBSTITUTE CHANGES

On February 7, 2013, the Health Quality Subcommittee adopted a strike-all amendment and reported the bill favorably as a committee substitute. The amendment:

- Requires the DOH to consult with the child protection teams under DOH's Children's Medical Services when developing training curricula for emergency medical service personnel.
- Requires the DOH to consult with the child protection teams when performing other SUID duties.
- Reinstates that the DOH is to coordinate with the Florida SIDS Alliance.

On March 12, 2013, the Health Care Appropriations Subcommittee adopted a strike-all amendment and reported the bill favorably as a committee substitute. The amendment:

- Requires that birth center clients receive information on safe sleeping practices and the possible causes of SUID.

- Corrects references to the Children’s Medical Services program to the Division of Children’s Medical Services.
- Requires that basic training program curriculum required for specific public safety personnel certification is consistent with the CDC SUID Initiative.
- Requires that if an autopsy is performed, it must be performed within 48 hours after death or as soon as feasible.
- Requires that a hospital that provides birthing services shall incorporate information on safe sleeping practices and the possible causes of SUID into postpartum instruction on the care of newborns.

On March 22, 2013, the Health & Human Services Committee adopted two amendments and reported the bill favorably as a committee substitute. The amendments:

- Provides that the Centers for Disease Control SUID Initiative curriculum must be “adopted and modified, when necessary, by rule” instead “develop and adopted, by rule”.
- Require the Medical Examiner to perform an autopsy on an infant younger than one year old, within 72 hours of death, if an autopsy is performed.

This analysis is drafted to the committee substitute as adopted by the Health & Human Services Committee.
