

**HOUSE OF REPRESENTATIVES
FINAL BILL ANALYSIS**

BILL #:	CS/HB 977	FINAL HOUSE FLOOR ACTION:	
SPONSOR(S):	Health Quality Subcommittee; Peters; Pigman and others	111 Y's	0 N's
COMPANION BILLS:	CS/CS/SB 1250	GOVERNOR'S ACTION:	Approved

SUMMARY ANALYSIS

CS/HB 977 passed the House on March 2, 2016. The bill was amended by the Senate on March 9, 2016, and subsequently passed the House on March 10, 2016.

Current law requires a recommendation for an involuntary inpatient placement in a treatment facility to be supported by the opinion of a psychiatrist and the second opinion of a clinical psychologist or another psychiatrist, both of whom have examined the patient within the preceding 72 hours. However, in counties with a population of less than 50,000, a physician who has certain training and experience or a psychiatric nurse may provide the second opinion if no psychiatrist or clinical psychologist is available. CS/HB 977 removes the population criterion to allow a qualified physician or psychiatric nurse to provide the second opinion in any county. The bill also allows first opinions, instead of just second opinions to be based on electronic patient examinations.

The bill exempts persons employed with the Department of Corrections in an inmate substance abuse program from background check requirements, unless they have direct contact with unmarried inmates under the age of 18 or with inmates who are developmentally disabled. Current law erroneously states the inverse.

The bill allows persons, who have had a disqualifying offense that occurred 5 or more years ago, who have applied for an exemption from the disqualification, and who work under the supervision of a qualified professional, to work with adults with substance use disorders.

The bill exempts health care practitioners from the registration requirements for prescribing controlled substances to treat nonmalignant chronic pain if they are board eligible or board certified in pain medicine by specified entities. Additionally, the bill provides that only a physician may dispense or prescribe a controlled substance in a registered pain-management clinic.

The bill requires a psychiatric nurse to hold a specialty certification for initial state certification and any recertification as an advanced registered nurse practitioner, unless the Board of Nursing allows by rule a provisional state certification. The bill authorizes a psychiatric nurse to prescribe psychotropic controlled substances within an established protocol with a psychiatrist. The bill also subjects psychiatric nurses to additional disciplinary actions related to prescribing psychotropic controlled substances.

The bill provides legislative findings regarding the need for additional psychiatrists and the use of telemedicine to improve patient care and reduce transportation costs. The bill also recommends that a state medical school without a psychiatry program establish such a program and seek to integrate primary care and psychiatry.

The bill has an insignificant negative fiscal impact on DOH, and has no fiscal impact on local governments.

The bill was approved by the Governor on April 14, 2016, ch. 2016-231, L.O.F., and became effective on that date.

This document does not reflect the intent or official position of the bill sponsor or House of Representatives.

I. SUBSTANTIVE INFORMATION

A. EFFECT OF CHANGES:

Present Situation

Behavioral Health Workforce Shortage

The Institute of Medicine (IOM) has chronicled efforts, beginning as early as the 1970s, which have attempted to deal with some of the workforce issues regarding mental and substance use disorders, but notes that most have not been sustained long enough or been comprehensive enough to remedy the problems.¹ Shortages of qualified workers, recruitment and retention of staff, and an aging workforce have long been cited as problems.² Lack of workers in rural areas and the need for a workforce more reflective of the racial and ethnic composition of the U.S. population create additional barriers to accessing care for many.³ Recruitment and retention efforts are hampered by inadequate compensation, which discourages many from entering or remaining in the field.⁴ In addition, the misperceptions and prejudice surrounding mental and substance use disorders and those who experience them are imputed to those who work in the field.⁵

Of additional concern, a 2012 IOM⁶ report notes that the workforce is unprepared to meet the mental and substance use disorder treatment needs of the rapidly growing population of older adults. The IOM report's data indicate that 5.6 to 8 million older adults, about one in five, have one or more mental health and substance use conditions which compound the care they need. However, there is a dearth of mental health or substance abuse practitioners who are trained to deal with this population.

The 2012 IOM report projects that by 2020, there will be 12,624 child and adolescent psychologists needed, but a supply of only 8,312 is anticipated.⁷ In 2010, the Substance Abuse and Mental Health Services Administration (SAMHSA) reported that more than two-thirds of primary care physicians who tried to obtain outpatient mental health services for their patients reported they were unsuccessful because of shortages in mental health care providers, health plan barriers, and lack of coverage or inadequate coverage.

As of January 2016, the Health Resources and Services Administration has designated 4,362 Mental Health Professional Shortage Areas, including one or more in each state, the District of Columbia, and each of the territories.⁸

Behavioral Health Practice

In the U.S., states generally require a person to achieve higher levels of education to become a mental health counselor compared to that of a substance abuse counselor. As of 2011, almost all states (98 percent) required a master's degree to qualify as a mental health counselor, but 45 percent of states did not require any college degree to qualify as a substance abuse counselor. For behavioral health care disciplines, independent practice requires a master's degree in most states; however, for addiction counselors, data available a decade ago indicated that about 50-55 percent of those certified or practicing in the field held at least a master's degree, 75 percent held a bachelor's degree, and the remainder had either completed some college or held a high school diploma or equivalent degree.⁹

Because of major changes to the field of behavioral health, including the integration of behavioral health and primary care, a push to accelerate the adoption of evidence-based practices, and a model of care that is recovery-oriented, person-centered, integrated, and utilizes multi-disciplinary teams, behavioral health workers are in need of additional pre-service training and continuing education.¹⁰ Behavioral health has moved to a chronic care, public health model to define needed services. This model recognizes the importance of prevention, the primacy of long-term recovery as its key construct, and is shaped by those with lived experience of recovery.¹¹ This new care model will require a diverse, skilled, and trained workforce that employs a range of workers, including people in recovery, recovery specialists, case workers, and highly trained specialists.¹² In fact, the movement to include primary care providers into the field of behavioral health has meant that there is currently no consensus as to which health care provider types make up the workforce.¹³ Generally, however, the workforce is made up of professionals practicing psychiatry, clinical psychology, clinical social work, advanced practice psychiatric nursing, marriage and family therapy, substance abuse counseling, and counseling.¹⁴

Involuntary Examination and Inpatient Placement under the Baker Act

In 1971, the Legislature passed the Florida Mental Health Act (also known as the Baker Act¹⁵), codified in part I of ch. 394, F.S., to address mental health needs in the state.¹⁶ The Baker Act provides the authority and process for the voluntary and involuntary examination of persons with evidence of a mental illness and the subsequent inpatient or outpatient placement of such individuals for treatment.

¹⁴ *Id.* at 2 (using the Substance Abuse and Mental Health Services Administration definition).

¹⁵ "The Baker Act" is named for its sponsor, Representative Maxine E. Baker, one of the first two women from Dade County elected to office in the Florida Legislature. As chair of the House Committee on Mental Health, she championed the treatment of mental illness in a manner that would not sacrifice a patient's rights and dignity. Baker served five terms as a member of the Florida House of Representatives from 1963-1972 and was instrumental in the passage of the Florida Mental Health Act. See University of Florida Smathers Libraries, *A Guide to the Maxine E. Baker Papers*, available at <http://www.library.ufl.edu/spec/pkyonge/baker.htm> (last accessed March 15, 2016), and Department of Children and Families and University of South Florida, Department of Mental Health and Law, *Baker Act Handbook and User Reference Guide 2014 (2014)*, available at <http://myflfamilies.com/service-programs/mental-health/baker-act> (select "2014 Baker Act Manual") (last accessed March 15, 2016).

¹⁶ Chapter 71-131, s. 1, Laws of Fla.

The Department of Children and Families (DCF) administers the Baker Act through receiving facilities that examine persons with evidence of mental illness. Receiving facilities are designated by the DCF and may be public or private facilities that provide the examination and short-term treatment of persons who meet the criteria under the Baker Act.¹⁷ Subsequent to examination at a receiving facility, a person who requires further treatment may be transported to a treatment facility. Treatment facilities designated by the DCF are state hospitals (e.g. Florida State Hospital) which provide extended treatment and hospitalization beyond what is provided in a receiving facility.¹⁸

Current law provides that an involuntary examination may be initiated if there is reason to believe a person has a mental illness and because of the illness.¹⁹

- The person has refused a voluntary examination after explanation of the purpose of the exam or is unable to determine for himself or herself that an examination is needed; and
- The person is likely to suffer from self-neglect or substantial harm to her or his well-being, or be a danger to himself or herself or others.

Courts, law enforcement officers, and certain health care practitioners are authorized to initiate such involuntary examinations.²⁰ A circuit court may enter an *ex parte* order stating a person meets the criteria for involuntary examination. A law enforcement officer²¹ may take a person into custody who appears to meet the criteria for involuntary examination and transport them to a receiving facility for examination. Health care practitioners may initiate an involuntary examination by executing the *Certificate of a Professional Initiating an Involuntary Examination*, an official form adopted in rule by the DCF.²² The health care practitioner must have examined the person within the preceding 48 hours and state that the person meets the criteria for involuntary examination.²³ The Baker Act currently authorizes the following health care practitioners to initiate an involuntary examination by certificate:²⁴

- A physician licensed under ch. 458, F.S., or ch. 459, F.S., who has experience in the diagnosis and treatment of mental and nervous disorders.
- A clinical psychologist, as defined in s. 490.003(7), F.S., with three years of postdoctoral experience in the practice of clinical psychology, inclusive of the experience required for licensure.
- A physician or psychologist employed by a facility operated by the United States Department of Veterans Affairs that qualifies as a receiving or treatment facility.
- A psychiatric nurse licensed under part I of ch. 464, F.S., who has a master's degree or a doctorate in psychiatric nursing, holds a national advanced practice certification as a psychiatric mental health advance practice nurse, and has two years of post-master's clinical experience under the supervision of a physician.
- A mental health counselor licensed under ch. 491, F.S.
- A marriage and family therapist licensed under ch. 491, F.S.
- A clinical social worker licensed under ch. 491, F.S.

¹⁷ Section 394.455(26), F.S.

¹⁸ Section 394.455(32), F.S.

¹⁹ Section 394.463(1), F.S.

²⁰ Section 394.463(2)(a)1.-3., F.S.

²¹ "Law enforcement officer" means any person who is elected, appointed, or employed full time by any municipality or the state or any political subdivision thereof; who is vested with authority to bear arms and make arrests; and whose primary responsibility is the prevention and detection of crime or the enforcement of the penal, criminal, traffic, or highway laws of the state. This definition includes all certified supervisory and command personnel whose duties include, in whole or in part, the supervision, training, guidance, and management responsibilities of full-time law enforcement officers, part-time law enforcement officers, or auxiliary law enforcement officers but does not include support personnel employed by the employing agency. s. 943.10(1), F.S.

²² The Certificate of a Professional Initiating an Involuntary Examination is a form created by the DCF which must be executed by health care practitioners initiating an involuntary examination under the Baker Act. The form contains information related to the person's diagnosis and the health care practitioner's personal observations of statements and behaviors that support the involuntary examination of such person. See Florida Department of Children and Families, CF-MH 3052b, incorporated by reference in Rule 65E-5.280, F.A.C., and available at <http://www.dcf.state.fl.us/programs/samh/MentalHealth/laws/3052b.pdf>. (last visited March 15, 2016).

²³ Section 394.463(2)(a)3., F.S.

²⁴ *Id.*

In 2014, there were 181,471 involuntary examinations initiated in the state. Law enforcement initiated half of the involuntary examinations (50.18 percent), followed closely by mental health professionals (47.86 percent), with the remaining initiated pursuant to *ex parte* orders by judges (1.96 percent).²⁵

Background Screening

Substance abuse treatment programs are licensed by the DCF Substance Abuse Program Office under authority granted in s. 397.401, F.S., which states, “It is unlawful for any person to act as a substance abuse service provider unless it (sic) is licensed or exempt from licensure under this chapter.” In order to obtain a license, a provider must apply to the DCF and submit “sufficient information to conduct background screening as provided in s. 397.451, F.S.”²⁶ According to the administrative rule implementing this section, the required documentation is verification that fingerprinting and background checks have been completed as required by ch. 397, F.S., and ch. 435, F.S.²⁷

Section 397.451, F.S., requires that “all owners, directors, and chief financial officers of service providers are subject to level 2 background screening as provided under chapter 435. . . . All service provider personnel who have direct contact with children receiving services or with adults who are developmentally disabled receiving services are subject to level 2 background screening as provided under chapter 435.” Members of a foster family and persons who live in the foster home who are between 12 and 18 years of age are not required to be fingerprinted, but these youth must have background checks for delinquency records. All other members of a foster family and any other persons residing with a foster family who are over 18 years of age must have complete background checks. Church or nonprofit religious organizations that are exempt from licensure as substance abuse treatment programs must also comply with personnel screening requirements.

Exemptions from personnel screening requirements include:

- Persons who volunteer at a program for less than 40 hours per month and who are under direct and constant supervision by persons who meet all screening requirements;
- Service providers who are exempt from licensing; and
- Persons employed by the DCF of Corrections in a substance abuse service program who have direct contact with unmarried inmates under the age of 18 or with inmates who are developmentally disabled.²⁸

The requirements for level 1 and level 2 screening are found in ch. 435, F.S. Level 1 screening includes, at a minimum, employment history checks and statewide criminal correspondence checks through the Florida Department of Law Enforcement (FDLE), a check of the Dru Sjodin National Sex Offender Public Website,²⁹ and may include criminal records checks through local law enforcement agencies. Level 2 screening is required for all employees in positions designated by law as positions of trust or responsibility, and it includes security background investigations, which consist of at least fingerprinting, statewide criminal and juvenile records checks through the FDLE, and federal criminal records checks through the Federal Bureau of Investigation (FBI) and may include local criminal records checks through local law enforcement agencies.³⁰

²⁵ Annette Christy & Christina Guenther, Baker Act Reporting Center, College of Behavioral & Community Sciences, University of South Florida, *Annual Report of Baker Act Data: Summary of 2014 Data*, available at http://bakeract.fmhi.usf.edu/document/BA_Annual_2014.pdf (last visited March 15, 2016).

²⁶ Section 397.403, F.S.

²⁷ Rule 65D-30.003(6)(s), F.A.C.

²⁸ Section 397.451(2)(c), F.S.

²⁹ The Dru Sjodin National Sex Offender Public Website is a U.S. government website that links public state, territorial, and tribal sex offender registries in one national search site. The website is available at <https://www.nsopw.gov/> (last visited March 15, 2016).

³⁰ Section 435.04(1), F.S.

Within five working days after starting to work, it is incumbent upon an employee who is in a position for which employment screening is required to submit a complete set of information necessary to conduct a screening to the employer. For level 1 screening, the employer then submits the information to the FDLE within five working days after receiving it. The FDLE conducts a search of its records and responds to the employer who then informs the employee whether screening has revealed any disqualifying information. For level 2 screening, the employer or the licensing agency submits the screening information to the FDLE within five working days after receiving it; the FDLE conducts its search of criminal and juvenile records and requests that the FBI conduct a search. The employee must supply any missing criminal or other necessary information to the employer within 30 days after the employer requests the information or they are subject to automatic disqualification. After the background screening is complete, the FDLE responds to the employer or licensing agency who informs the employee whether screening has revealed disqualifying information.³¹

Under certain circumstances, the DCF may grant an exemption from disqualification as provided in s. 435.07, F.S. These circumstances include:

- Felonies committed more than three years prior to the date of disqualification;
- Misdemeanors prohibited under any of the Florida Statutes cited in the chapter or under similar statutes of other jurisdictions;
- Offenses that were felonies when committed but are now misdemeanors;
- Findings of delinquency; or
- Commissions of acts of domestic violence as defined in s. 741.30, F.S.

Under s. 435.07, F.S., employees bear the burden of proving, by clear and convincing evidence, they should not be disqualified,³² and have administrative hearing rights under ch. 120, F.S., for denials. However, the DCF may not remove a disqualification for or grant an exemption to an individual who is found guilty of, regardless of adjudication, or who has entered a plea of nolo contendere or guilty to any felony covered by s. 435.03, F.S., solely by pardon, executive clemency, or restoration of civil rights.³³

Substance Abuse Treatment Provider Staff

Since many substance abuse treatment programs employ persons who are themselves in recovery, the DCF is authorized to grant additional exemptions from disqualification for employees of substance abuse treatment programs.³⁴ Employees must submit a request for an exemption from disqualification within 30 days after being notified of a pending disqualification. Pending disposition of the exemption request, an employee's employment may not be adversely affect. However, upon disapproval of a request for an exemption the service provider must immediately dismiss the employee from employment.³⁵

³¹ Section 435.05, F.S.

³² The employee must set forth sufficient evidence of rehabilitation, such as the circumstances surrounding the criminal incident, the time period that has elapsed since the incident, the nature of the harm to the victim, and the history of the employee since the incident.

³³ Section 435.07(4), F.S.

³⁴ Section 397.451(4)(b), F.S., provides exemptions for crimes under ss. 817.563, 893.13, and 893.147, F.S. These exemptions only apply to providers who treat adolescents age 13 and older; as well as personnel who work exclusively with adults.

³⁵ Section 397.451(1)(f), F.S.

Advanced Registered Nurse Practitioners

Licensure and Regulation

Part I of ch. 464, F.S., governs the licensure and regulation of advanced registered nurse practitioners (ARNPs) in Florida. Nurses are licensed by the DOH and are regulated by the Board of Nursing.³⁶ There are 22,003 actively licensed ARNPs in Florida.³⁷

In Florida, an ARNP is a licensed nurse who is certified in advanced or specialized nursing practice and may practice as a certified registered nurse anesthetist, a certified nurse midwife, or a nurse practitioner.³⁸ Section 464.003(2), F.S., defines “advanced or specialized nursing practice” to include the performance of advanced-level nursing acts approved by the Board of Nursing, which by virtue of postbasic specialized education, training, and experience are appropriately performed by an ARNP.³⁹

Florida recognizes three types of ARNPs: nurse anesthetist, certified nurse midwife, and nurse practitioner. The Board of Nursing, created by s. 464.004, F.S., establishes the eligibility criteria for an applicant to be certified as an ARNP and the applicable regulatory standards for ARNP nursing practices.⁴⁰ To be certified as an ARNP, the applicant must:

- Have a registered nurse license;
- Have earned, at least, a master’s degree; and
- Submit proof to the Board of Nursing of holding a current national advanced practice certification obtained from a board-approved nursing specialty board.⁴¹

All ARNPs must carry malpractice insurance or demonstrate proof of financial responsibility.⁴² An applicant for certification is required to submit proof of coverage or financial responsibility within sixty days of certification and with each biennial renewal.⁴³ An ARNP must have professional liability coverage of at least \$100,000 per claim with a minimum annual aggregate of at least \$300,000, or an unexpired irrevocable letter of credit, which is payable to the ARNP as beneficiary, in the amount of at least \$100,000 per claim with a minimum aggregate availability of at least \$300,000.⁴⁴

Supervision of ARNPs

Pursuant to s. 464.012(3), F.S., ARNPs may only perform nursing practices delineated in an established protocol filed with the Board of Nursing that is filed within 30 days of entering into a supervisory relationship with a physician and upon biennial license renewal.⁴⁵ Florida law allows a primary care physician to supervise ARNPs in up to four offices, in addition to the physician’s primary

³⁶ Pursuant to s. 464.004, F.S., the Board of Nursing is comprised of 13 members appointed by the Governor and confirmed by the Senate who serve 4-year terms. The Board is comprised of three licensed practical nurses who have practiced for at least four years, seven members who are registered numbers who have practiced for at least 4 years; three Florida residents who have never been licensed as nurses, are not connected to the practice of nursing, and have no financial interest in any health care facility, agency, or insurer; and seven members who are registered nurses who have practiced at least four years. Among the seven members who are registered nurses, there must be at least one must be an ARNP, one nurse educator of an approved program, and one nurse executive.

³⁷ E-mail correspondence with the Department of Health (Nov. 9, 2015) (on file with the staff of the Health and Human Services Committee). This number includes all active licenses, including out of state practitioners.

³⁸ Section 464.003(3), F.S.

³⁹ Section 464.003(2), F.S.

⁴⁰ Section 464.012(2), F.S.

⁴¹ Section 464.012(1), F.S., and Rule 64B9-4.002, F.A.C. A nursing specialty board must attest to the competency of nurses in a clinical specialty area, require nurses to take a written examination prior to certification, require nurses to complete a formal program prior to eligibility of examination, maintain program accreditation, and identify standards or scope of practice statements appropriate for each nursing specialty.

⁴² Section 456.048, F.S.

⁴³ Rule 64B9-4.002(5), F.A.C.

⁴⁴ *Id.*

⁴⁵ Physicians are also required to provide notice of the written protocol and the supervisory relationship to the Board of Medicine or Board of Osteopathic Medicine, respectively. See ss. 458.348 and 459.025, F.S.

practice location.⁴⁶ If the physician provides specialty health care services, then only two medical offices, in addition to the physician's primary practice location, may be supervised.

The supervision limitations do not apply in the following facilities:

- Hospitals;
- Colleges of medicine or nursing;
- Nonprofit family-planning clinics;
- Rural and federally qualified health centers;
- Nursing homes;
- Assisted living facilities;
- Student health care centers or school health clinics; and
- Other government facilities.⁴⁷

To ensure appropriate medical care, the number of ARNPs a supervising physician may supervise is limited based on consideration of the following factors:

- Risk to the patient;
- Educational preparation, specialty, and experience in relation to the supervising physician's protocol;
- Complexity and risk of the procedures;
- Practice setting; and
- Availability of the supervising physician or dentist.⁴⁸

Delegable Tasks

Within the framework of a written physician protocol, an ARNP may:

- Monitor and alter drug therapies;
- Initiate appropriate therapies for certain conditions;
- Order diagnostic tests and physical and occupational therapy;
- Perform certain acts within his or her specialty;
- Perform medical acts authorized by a joint committee; and
- Perform additional functions determined by rule.⁴⁹

Florida law does not authorize ARNPs to prescribe, independently administer, or dispense controlled substances.⁵⁰

⁴⁶ Sections 458.348(4) and 459.025(3), F.S.

⁴⁷ Sections 458.348(4)(e), and 459.025(3)(e), F.S.

⁴⁸ Rule 64B9-4.010, F.A.C.

⁴⁹ Section 464.012(3), F.S. Pursuant to s. 464.012(4), F.S., certified registered nurse anesthetists, certified nurse midwives, and certified nurse practitioners are authorized to perform additional acts that are within their specialty and authorized under an established supervisory protocol.

⁵⁰ Sections 893.02(21) and 893.05(1), F.S. The definition of practitioner does not include ARNPs.

Psychiatric Nurses

A psychiatric nurse is defined under s. 394.455, F.S., as an ARNP certified under s. 464.012 who has a master's or doctoral degree in psychiatric nursing, holds a national advanced practice certification as a psychiatric mental health advanced practice nurse, and has 2 years of post-master's clinical experience under the supervision of a physician.

Under the Baker Act, psychiatric nurses are authorized to certify after examining a person within the preceding 48 hours that the person appears to meet the criteria for involuntary examination,⁵¹ examine a patient at a receiving facility⁵² or release a patient from a receiving facility⁵³ while performing within the framework of an established protocol with a psychiatrist, and perform assessments of mental health residents of assisted living facilities.⁵⁴

Additionally, in a receiving facility in a county having a population of fewer than 50,000, and when a psychiatrist or clinical psychologist is not available to provide a second opinion about the involuntary outpatient or involuntary inpatient placement of a patient, a psychiatric nurse may provide the second opinion.⁵⁵ A psychiatric nurse may also assess a treatment plan proposed by an involuntary outpatient service provider for a patient to determine if the plan is clinically appropriate.⁵⁶

Controlled Substances

Controlled substances are drugs with the potential for abuse. Chapter 893, F.S., sets forth the Florida Comprehensive Drug Abuse Prevention and Control Act (Act) and classifies controlled substances into five categories, known as schedules.⁵⁷ The distinguishing factors between the different drug schedules are the "potential for abuse" of the substance and whether there is a currently accepted medical use for the substance. Schedules are used to regulate the manufacture, distribution, preparation and dispensing of the substances. The Act provides requirements for the prescribing and administering of controlled substances by health care practitioners and proper dispensing by pharmacists and health care practitioners.⁵⁸

Controlled Substance Prescribing for Chronic Nonmalignant Pain in Florida

As of January 1, 2012, every physician, podiatrist, or dentist, who prescribes controlled substances in the state for the treatment of chronic nonmalignant pain,⁵⁹ must register as a controlled substance prescribing practitioner and comply with certain practice standards specified in statute and rule.⁶⁰ Before prescribing controlled substances for the treatment of chronic nonmalignant pain, a practitioner must:

- Document certain characteristics about the nature of the patient's pain, success of past treatments, and a history of alcohol and substance abuse;
- Develop a written plan for assessing the patient's risk for aberrant drug-related behavior and monitor such behavior throughout the course of controlled substance treatment;

⁵¹ Section 394.463, F.S.

⁵² *Id.*

⁵³ *Id.* The psychiatric nurse may also work under the framework of an established protocol with an attending emergency department physician with experience in the diagnosis and treatment of mental and nervous disorders. However, a psychiatric nurse may only release patients from the receiving facility if it is owned or operated by a hospital or health system.

⁵⁴ Section 394.4574, F.S.

⁵⁵ Section 394.4655, F.S. and s. 394.467, F.S.

⁵⁸ Sections 893.04 and 893.05, F.S.

⁵⁹ "Chronic nonmalignant pain" is defined as pain unrelated to cancer which persists beyond the usual course of disease or the injury that is the cause of the pain or more than 90 days after surgery. Section 456.44(1)(e), F.S.

⁶⁰ Chapter 2011-141, s. 3, Laws of Fla. (creating ss. 456.44, F.S., effective July 1, 2011).

- Develop an written individualized treatment plan for each patient stating the objectives that will be used to determine treatment success; and
- Enter into a controlled substance agreement with each patient that must be signed by the patient or their legal representative and by the prescribing practitioner. Such agreements must include:
 - The number and frequency of prescriptions and refills;
 - A statement outlining expectations for patient compliance and reasons for which the drug therapy may be discontinued, such as violation of the agreement; and
 - An agreement that the patient’s chronic nonmalignant pain only be treated by a single treating practitioner unless otherwise authorized and documented in the medical record.⁶¹

Patients being treated with controlled substances for chronic nonmalignant pain must be seen by their prescribing practitioners at least once every three months to monitor progress and compliance, and detailed medical records relating to such treatment must be maintained.⁶² Patients at special risk for drug abuse or diversion may require consultation with or a referral to an addiction medicine physician or a psychiatrist.⁶³ Anyone with signs or symptoms of substance abuse must be immediately referred to a pain-management physician, an addiction medicine specialist, or an addiction medicine facility.⁶⁴

Drug Enforcement Administration

The Drug Enforcement Administration (DEA), housed within the U.S. Department of Justice, enforces the controlled substances laws and regulations of the United States, including preventing and investigating the diversion of controlled pharmaceuticals.⁶⁵

Any health care professional wishing to prescribe controlled substances must apply for a registration number from the DEA. Registration numbers are linked to state licenses and may be suspended or revoked upon any disciplinary action taken against a licensee.⁶⁶ The DEA will grant registration numbers to a wide range of health care professionals, including physicians, nurse practitioners, physician assistants, optometrists, dentists, and veterinarians, but such professionals may only prescribe controlled substances as authorized under state law.⁶⁷ The DEA provides that a controlled substance prescription may only be issued by a registered practitioner who is:

- Authorized to prescribe controlled substances by the jurisdiction in which the practitioner is licensed to practice; and
- Registered with the DEA, or exempt from registration (e.g., Public Health Service, Federal Bureau of Prisons, or military practitioners); or
- A qualified agent or employee of a hospital or other institution acting in the normal course of business or employment under the DEA registration number of the hospital or other institution which is registered in lieu of the individual practitioner being registered.⁶⁸

The DEA’s Practitioner Manual includes requirements for valid prescriptions. The DEA defines “prescription” as an order for medication which is dispensed to or for an ultimate user, but is not an

order for a medication dispensed for immediate administration to the user, such as an order to dispense a drug to a patient in a hospital setting.⁶⁹

Controlled Substance Prescriptive Authority for ARNPs in Other States

ARNPs

An ARNP's ability to prescribe, dispense, or administer controlled substances is dependent on his or her specific state's law. Forty-nine states authorize ARNPs to prescribe controlled substances.⁷⁰ Twenty-one states and the District of Columbia allow an ARNP to practice independently, including evaluating, diagnosing, ordering, and interpreting diagnostic tests, and managing treatment, including prescribing medications, of a patient without physician supervision.⁷¹ Twenty-two states specifically prohibit certified registered nurse anesthetists from prescribing controlled substances.⁷²

Some states have specific limitations regarding ARNPs prescribing authority for Schedule II controlled substances.⁷³ For example, 7 states authorize ARNPs to prescribe all levels of scheduled drugs, except for Schedule II. Some states have specific education requirements for those ARNPs who wish to prescribe Schedule II substances or require additional registration for ARNPs to be authorized to prescribe.⁷⁴

Effect of the Bill

Behavioral Health Workforce Shortage

The bill addresses a behavioral health workforce shortage in the state through several different mechanisms. A legislative intent provision in the bill states that the Legislature finds:

- A need for additional psychiatrists and recommends the establishment of an additional psychiatry program to be offered by one of Florida's schools of medicine, which shall seek to integrate primary care and psychiatry, and other evolving models of care for persons with mental health and substance use disorders.
- The use of telemedicine for patient evaluation, case management, and ongoing care will improve management of patient care and reduce costs of transportation.

Current law provides that a recommendation for an involuntary inpatient placement in a treatment facility must be supported by the opinion of a psychiatrist and the second opinion of a clinical psychologist or another psychiatrist, both of whom have examined the patient within the preceding 72 hours. However, in counties with a population of less than 50,000, a physician who has certain training and experience or a psychiatric nurse may provide the second opinion if no psychiatrist or clinical psychologist is available. CS/HB 977 removes the population criterion to allow a qualified physician or psychiatric nurse to provide the second opinion in any county. The bill also allows any opinion, instead of just the second opinion, for a recommendation for an involuntary inpatient placement to be based on an electronic examination of the patient.

⁷³ *Supra* note 89.

⁷⁴ *Id.*

The bill expands who is eligible to be a service provider under a substance abuse program by allowing those persons who have had a disqualifying offense that occurred 5 or more years ago and who have requested an exemption from disqualification to work with adults with substance use disorders. These individuals must work under the supervision of a qualified psychologist, clinical social worker, marriage and family therapist, mental health counselor, or a master's level certified addiction professional until the Department of Children and Families makes a final determination regarding the request for an exemption from disqualification.

The bill exempts persons employed with the Department of Corrections in an inmate substance abuse program from a fingerprinting and background check requirement, unless they have direct contact with unmarried inmates under the age of 18 or with inmates who are developmentally disabled. The current law erroneously states the inverse.

Psychiatric Nurse Controlled Substance Prescribing Authority

The bill seeks to increase access to behavioral health treatment, by allowing psychiatric nurses, within the framework of an established protocol with a psychiatrist, to prescribe psychotropic controlled substances for the treatment of mental disorders.

The bill provides additional restrictions or oversight requirements pertaining to a psychiatric nurse's prescribing authority for psychotropic controlled substances. The bill prohibits a psychiatric nurse from dispensing or prescribing a controlled substance on the premises of a registered pain management clinic by limiting such authority to licensed physicians.

The bill adds acts related to the prescribing of controlled substances into s. 464.018, F.S., which a psychiatric nurse is prohibited from performing and which, if performed, constitute grounds for denial of license or disciplinary actions.

The bill adds psychiatric nurse to the definition of practitioner in ch. 893, F.S., the Florida Comprehensive Drug Abuse Prevention and Control Act (Act), thus requiring psychiatric nurses to comply with the prescribing and dispensing requirements and limitations under the Act. This definition also requires practitioners to hold a valid federal DEA controlled substance registry number.

Registration as a Controlled Substance Prescribing Practitioner

The bill expands the health care practitioners who are exempt from the registration requirements for prescribing controlled substances to treat nonmalignant chronic pain. Specifically, the bill exempts from registration a medical specialist board-eligible or board-certified in pain medicine by the American Board of Interventional Pain Physicians or the American Association of Physician Specialists.

The bill provides that it will take effect upon becoming a law.

II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

A. FISCAL IMPACT ON STATE GOVERNMENT:

1. Revenues:
None.

2. Expenditures:
None.

B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

1. Revenues:
None.

2. Expenditures:
None.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

Health care entities may experience some cost savings associated with the efficiencies of allowing additional practitioners (psychiatric nurses) to provide treatment and care, which cost savings may be passed on to patients.

D. FISCAL COMMENTS:

None.
