

## HOUSE OF REPRESENTATIVES FINAL BILL ANALYSIS

<b>BILL #:</b>	CS/CS/HB 807	<b>FINAL HOUSE FLOOR ACTION:</b>		
<b>SUBJECT/SHORT TITLE</b>	Practices of Substance Abuse Service Providers	115	Y's 0	N's
<b>SPONSOR(S):</b>	Health & Human Services Committee; Children, Families & Seniors Subcommittee; Hager; Harrell and others	<b>GOVERNOR'S ACTION:</b>	Approved	
<b>COMPANION BILLS:</b>	CS/CS/SB 788			

---

### SUMMARY ANALYSIS

CS/CS/HB 807 passed the House, as amended, on April 26, 2017, and subsequently passed the Senate on May 4, 2017.

The Department of Children and Families (DCF) regulates substance abuse treatment and licenses service components. Florida does not license recovery residences, but allows voluntary certification.

The Legislature appropriated funds for FY 2016-17 to the State Attorney for the Fifteenth Judicial Circuit to study how to strengthen investigation and prosecution of criminal and regulatory violations in the substance abuse treatment industry. The task force identified patient brokering and fraudulent marketing as key problems in the industry.

CS/CS/HB 807 implements several task force recommendations to address these and other abusive practices in the substance abuse treatment industry. The bill:

- Expands current prohibitions on referrals between licensed treatment providers and certain recovery residences.
- Prohibits service providers, recovery residence operators, and third parties that provide advertising or marketing services from engaging in deceptive marketing practices and provides criminal penalties for violations.
- Prohibits materially false or misleading statements or information about the identity, products, goods, services, or geographical location of a licensed service provider made to induce a person to seek treatment with that provider.
- Expands the items that may not be used to induce a patient referral to include any "benefit".
- Adds patient brokering to the offenses that constitute "racketeering activities".
- Allows the Office of Statewide Prosecution to investigate and prosecute patient brokering and enhances penalties for higher volumes of patient brokering.
- Requires entities providing substance abuse marketing services to be licensed by the Department of Agriculture and Consumer Services (DACS) under the Florida Telemarketing Act.
- Creates a new provision for applications for disclosure of patient records for individuals receiving substance abuse services in an active criminal investigation, which authorizes disclosure without prior notice.

The bill also strengthens DCF's substance abuse treatment provider licensure program and improves the regulation of service providers. DCF must draft rules on minimum licensure standards and require certain providers to be accredited. The bill also expands DCF's authority to take action against a service provider for violations on a tier-based system and includes fining authority.

The bill will have an insignificant indeterminate negative fiscal impact on DCF and DACS. DCF may have an increased workload associated with increased regulatory oversight and licensure discipline; these costs will be covered by increased fee revenue. DACS may have an increased workload associated with regulation of substance abuse marketing services; these costs will be covered by licensure fees. The bill may also have an insignificant negative fiscal impact on local law enforcement associated with enforcing the new criminal penalties created by the bill.

The bill was approved by the Governor on June 26, 2017, ch. 2017-173, L.O.F., and will become effective on July 1, 2017.

# I. SUBSTANTIVE INFORMATION

## A. EFFECT OF CHANGES:

### Present Situation

#### Substance Abuse

Substance abuse affects millions of people in the United States each year. Substance abuse refers to the harmful or hazardous use of psychoactive substances, including alcohol and illicit drugs.<sup>1</sup>

Substance use disorders occur when the chronic use of alcohol and/or drugs causes significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home.<sup>2</sup> It is often mistakenly assumed that individuals with substance use disorders lack moral principles or willpower and that they could stop using drugs simply by choosing to change their behavior.<sup>3</sup> In reality, drug addiction is a complex disease, and quitting takes more than good intentions or a strong will. In fact, because drugs change the brain in ways that foster compulsive drug abuse, quitting is difficult, even for those who are ready to do so.<sup>4</sup>

According to the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, a diagnosis of substance use disorder is based on evidence of impaired control, social impairment, risky use, and pharmacological criteria.<sup>5</sup> The most common substance use disorders in the United States are from the use of alcohol, tobacco, cannabis, stimulants, hallucinogens, and opioids.<sup>6</sup>

#### *Opioid Abuse*

Opioids are commonly abused, with an estimated 15 million people worldwide suffering from opioid dependence.<sup>7</sup> Drug overdose is now the leading cause of injury-related death in the United States.<sup>8</sup> In 2015, Florida ranked fourth in the nation with 3,228 deaths from drug overdoses, and at least one opioid caused 2,566 of those deaths.<sup>9</sup> Statewide, in 2015, heroin caused 733 deaths, fentanyl caused 705, oxycodone caused 565, and hydrocodone caused 236; deaths caused by heroin and fentanyl increased more than 75% statewide when compared with 2014.<sup>10</sup>

Drug overdose deaths doubled in Florida from 1999 to 2012.<sup>11</sup> Over the same time period, drug overdose deaths occurred at a rate of 13.2 deaths per 100,000 persons.<sup>12</sup> The crackdown on “pill mills” dispensing prescription opioid drugs, such as oxycodone and hydrocodone, reduced the rate of death

### Substance Abuse Treatment

In the early 1970s, the federal government furnished grants for states to develop continuums of care for individuals and families affected by substance abuse.<sup>18</sup> The grants provided separate funding streams and requirements for alcoholism and drug abuse. In response, the Florida Legislature enacted ch. 396, F.S., (alcohol) and ch. 397, F.S. (drug abuse).<sup>19</sup> In 1993, legislation combined ch. 396 and ch. 397, F.S., into a single law, the Hal S. Marchman Alcohol and Other Drug Services Act (“the Marchman Act”).<sup>20</sup> The Marchman Act supports substance abuse prevention and remediation through a system of prevention, detoxification, and treatment services to assist individuals at risk for or affected by substance abuse.

The Department of Children and Families (DCF) administers a statewide system of safety-net services for substance abuse and mental health (SAMH) prevention, treatment, and recovery. SAMH programs include a range of prevention, acute interventions (such as crisis stabilization or detoxification),

residential, transitional housing, outpatient treatment, and recovery support services. Services are provided based upon state and federally-established priority populations.<sup>21</sup>

### *Substance Abuse Treatment Service Regulation*

DCF regulates substance abuse treatment by licensing individual treatment components under ch. 397, F.S., and ch. 65D-30, F.A.C. Licensed service components include a continuum of substance abuse prevention, intervention, and clinical treatment services.<sup>22</sup> Clinical treatment is a professionally directed, deliberate, and planned regimen of services and interventions that are designed to reduce or eliminate the misuse of drugs and alcohol and promote a healthy, drug-free lifestyle.<sup>23</sup> “Clinical treatment services” include, but are not limited to, the following licensable service components:

- Addictions receiving facility,
- Day or night treatment,
- Day or night treatment with community housing,
- Detoxification,
- Intensive inpatient treatment,
- Intensive outpatient treatment,
- Medication-assisted treatment for opiate addiction,
- Outpatient treatment, and
- Residential treatment.<sup>24</sup>

The most commonly licensed service components are outpatient treatment and intensive outpatient treatment. For FY 2015–2016, DCF issued 1,057 licenses for outpatient treatment and 529 licenses for intensive outpatient treatment.

<sup>21</sup> These priority populations include, among others, persons diagnosed with co-occurring substance abuse and mental health disorders, persons who are experiencing an acute mental or emotional crisis, children who have or are at risk of having an emotional disturbance, and children at risk for initiating drug use.

<sup>25</sup> Department of Children and Families, *Licensure of Substance Abuse Services*, PowerPoint Presentation to Children, Families, and Seniors Subcommittee on February 16, 2017 (PowerPoint on file with Health and Human Services Committee staff).

All private and publicly-funded entities providing substance abuse services must be licensed for each service component provided, unless exempt. Exemptions are available for:

- Hospitals or hospital-based components licensed under ch. 395, F.S.;
- Nursing home facilities as defined in s. 400.021, F.S.;
- Substance abuse education programs established pursuant to s. 1003.42, F.S.;
- Facilities or institutions operated by the federal government;
- Physicians or physician assistants licensed under ch. 458 or ch. 459, F.S.;
- Psychologists licensed under ch. 490, F.S.;
- Social workers, marriage and family therapists, or mental health counselors licensed under ch. 491, F.S.;
- Facilities licensed under ch. 393, F.S., which, in addition to providing services to persons with developmental disabilities, also provide services to persons developmentally at risk as a consequence of exposure to alcohol or other legal or illegal drugs while in utero; and
- Facilities licensed under s. 394.875, F.S., as crisis stabilization units.<sup>26</sup>

Churches, nonprofit religious organizations, and denominations are also exempt from licensure, if their services are solely religious, spiritual, or ecclesiastical in nature.<sup>27</sup>

The number of substance abuse treatment providers providing treatment under those components has increased significantly over the last three years, particularly in the Southeast Region, which includes Broward, Indian River, Martin, Okeechobee, Palm Beach, and St. Lucie Counties.

Number of Licensed Providers, By DCF Region  
(Duplicated Across Regions)

### Licensure Process

Currently, providers must submit an application to DCF for each licensable component delivered at each service location; however, by June 1, 2017, licenses will no longer be location-specific, and providers will be required to submit an application for each component and list all locations at which that service will be provided.<sup>28</sup> An application for licensure must include:

- Name and address of the applicant service provider and its director, and also of each member, owner, officer, and shareholder, if any;

<sup>26</sup> S. 397.405, F.S.

<sup>27</sup> S. 397.405(8), F.S.

<sup>28</sup> S. 397.407, F.S.; see also, note 25.

- Proof of satisfactory fire, safety, and health inspections, and compliance with local zoning ordinances;
- Proof of financial ability and organizational capability to operate in accordance with statutes;
- Proof of sufficient liability insurance coverage;
- Sufficient information to conduct a background screening<sup>29</sup> on any owner, director, or chief financial officer;
- A comprehensive outline of the proposed services; and
- Information establishing the competency and ability of the applicant service provider and its director to carry out the requirements of ch. 397, F.S.<sup>30</sup>

DCF may issue a probationary, regular, or interim license.<sup>31</sup> A probationary license may be issued to a service provider applicant in the initial stages of developing services that are not yet fully operational upon completion of all application requirements listed above and upon demonstration of the applicant's ability to comply with all applicable statutory and regulatory requirements.<sup>32</sup> A probationary license expires 90 days after issuance and may be reissued once for an additional 90-day period if the applicant has substantially complied with all requirements for regular licensure or has initiated action to satisfy all requirements.<sup>33</sup>

In order to be issued a regular license, the applicant must be in compliance with statutory and regulatory requirements. DCF may issue a regular license to:

- A new applicant at the end of the probationary period;
- A licensed applicant that holds a regular license and is seeking renewal;<sup>34</sup> or
- An applicant for a service component operating under an interim license upon successful satisfaction of the requirements for a regular license.<sup>35</sup>

DCF may issue an interim license<sup>36</sup> to a service provider for a period not exceed 90 days if DCF finds that:

- A service component of the provider is in substantial noncompliance with licensure standards;
- The service provider has failed to provide satisfactory proof of conformance to fire, safety, or health requirements; or
- The service provider is involved in license suspension or revocation proceedings.<sup>37</sup>

An interim license expires 90 days after it is issued; however, it may be reissued once for an additional 90-day period in a case of extreme hardship in which the noncompliance is not attributable to the licensed service provider.

### *Licensure Fees*

DCF must set its licensure fees to cover 50 percent of the cost of regulating the licensure program, and fees for public providers must be less than fees for private providers.<sup>38</sup> The fees range from \$200-\$325

<sup>29</sup> Level 2 background screenings are required for owners, directors, chief financial officers, and anyone working with children or adults with developmental disabilities. S. 397.451, F.S.

<sup>30</sup> S. 397.403(1), F.S.

<sup>31</sup> S. 397.407(5), F.S.

<sup>32</sup> S. 39.407(6), F.S.

<sup>33</sup> During the probationary period DCF must monitor the delivery of services and may order a probationary licensee to cease and desist operations at any time it is found to be substantially out of compliance with licensure standards.

<sup>34</sup> An application for renewal of a regular license must be submitted to DCF at least 60 days before the license expires. A late fee of \$100 applies to applications received after that deadline.

<sup>35</sup> S. 397.407(7), F.S.

<sup>36</sup> An interim license applies only to the licensable service component of the provider's services which is in substantial noncompliance with statutory or regulatory requirements.

<sup>37</sup> S. 397.407(8), F.S.

<sup>38</sup> S. 397.407(1), F.S.

per licensed service component for publicly-funded programs and from \$250-\$375 for privately-funded programs.<sup>39</sup> Additionally, DCF discounts the fees based on volume; the discount for publicly-funded programs ranges from 10%-30% and 5%-25% for privately-funded programs.<sup>40</sup>

### *Inspections*

DCF has the right to enter and inspect a licensed provider at any time to determine statutory and regulatory compliance and may, with permission or warrant, inspect suspected unlicensed providers.<sup>41</sup> DCF must schedule periodic inspections of licensed service providers in order to minimize costs and the disruption of services; these inspections are done annually, unless a provider is accredited, in which case they are done triennially.<sup>42</sup>

Following licensing inspections, district offices shall prepare and distribute to providers a report that includes a list of noncompliance issues, if any, with rule references and a request that the provider submit a plan for corrective action, including required completion dates.<sup>43</sup>

The number of inspections by DCF has increased from 1,953 in FY 2013-14 to 2,591 in FY 2016-16.<sup>44</sup>

### *Licensure Discipline*

DCF may deny, suspend, or revoke a license, or impose reasonable restrictions or penalties if the provider is not in compliance with all statutory and regulatory requirements.<sup>45</sup> However, DCF must give existing providers reasonable time, not to exceed one year, to comply with any new rules.<sup>46</sup> Additionally, DCF may impose a moratorium on admissions if a threat to the public health or safety exists.<sup>47</sup> The only fining authority DCF has is for a \$500 per diem fine for fire-, safety-, and health-related violations.<sup>48</sup> DCF has taken very few licensure discipline actions beyond the issuance of a corrective action plan.

Disciplinary Action by Fiscal Year<sup>49</sup>

Year	FY 2013-14	FY 2014-15	FY 2015-16

Suspensions	0	0	0
Revocations	6	0	0

### Recovery Residences

Recovery residences (also known as “sober homes” or “sober living homes”) are alcohol- and drug-free living environments for individuals in recovery who are attempting to maintain abstinence from alcohol

<sup>39</sup> Rule 65D-30.003(5), F.A.C.

<sup>40</sup> Id.

<sup>41</sup> S. 397.411, F.S.

<sup>44</sup> Supra, note 25.

<sup>45</sup> S. 397.415(1), F.S.

<sup>46</sup> S. 397.401(5), F.S.

<sup>47</sup> S. 397.415(1), F.S.

<sup>48</sup> Id.

<sup>49</sup> Supra, note 25.

and drugs.<sup>50</sup> These residences offer no formal treatment but perhaps mandate or strongly encourage attendance at 12-step groups, and are self-funded through resident fees.<sup>51</sup>

Section 397.311(36), F.S., defines a recovery residence as a residential dwelling unit, or other form of group housing, offered or advertised through any means, including oral, written, electronic, or printed means, by any person or entity as a residence that provides a peer-supported, alcohol-free, and drug-free living environment.

### *Benefits of Recovery Residences*

Multiple studies have found that individuals benefit in their recovery by residing in a recovery residence. Specifically, individuals in recovery residing in an Oxford House (OH), a very specific type of recovery residence, had significantly lower substance use, significantly higher income, and significantly lower incarceration rates than those individuals who participate in usual group care.<sup>52</sup>

A cost-benefit analysis regarding residing in Oxford Houses found variation in cost and benefits compared to other residences. The result suggests that the additional costs associated with OH treatment, roughly \$3,000, are returned nearly tenfold in the form of reduced criminal activity, incarceration, and substance use as well as increases in earning from employment.<sup>53</sup> Additionally, another study found that residents of a recovery residence were more likely to report abstaining from substance use at a much higher rate:

- Residents at six months were 16 times more likely to report being abstinent;
- Residents at 12 months were 15 times more likely to report being abstinent; and
- Residents at 18 months were six times more likely to report being abstinent.<sup>54</sup>

### *Federal Law Applicable to Recovery Residences*

The Americans with Disabilities Act (ADA) prohibits discrimination against individuals with disabilities.<sup>55</sup> The ADA requires broad interpretation of the term “disability” so as to include as many individuals as possible under the definition.<sup>56</sup> The ADA defines disability as a physical or mental impairment that substantially limits one or more major life activities.<sup>57</sup> Disability also includes individuals who have a record of such impairment, or are regarded as having such

<sup>50</sup> Douglas L. Polcin, Ed.D., MFT, and Diane Henderson, B.A., *A Clean and Sober Place to Live: Philosophy, Structure, and Purported Therapeutic Factors in Sober Living Houses*, J Psychoactive Drugs, Jun 2008; 40(2): 153–159.

<sup>51</sup> Id.

<sup>52</sup> An Illinois study found that those in the OHs had lower substance use (31.3% vs. 64.8%), higher monthly income (\$989.40 vs. \$440.00), and lower incarceration rates (3% vs. 9%). OH participants, by month 24, earned roughly \$550 more per month than participants in the usual-care group. In a single year, the income difference for the entire OH sample corresponds to approximately \$494,000 in additional production. In 2002, the state of Illinois spent an average of \$23,812 per year to incarcerate each drug offender. The lower rate of incarceration among OH versus usual-care participants at 24 months (3% vs. 9%) corresponds to an annual saving of roughly \$119,000 for Illinois. Together, the productivity and incarceration benefits yield an estimated \$613,000 in savings per year, or an average of \$8,173 per OH member. L. Jason, B. Olson, J., Ferrari, and A. Lo Sasso, *Communal Housing Settings Enhance Substance Abuse Recovery*, 96 Am. J. of Pub. Health 10, (2006), at 1727-1729.

<sup>53</sup> “While treatment costs were roughly \$3,000 higher for the OH group, benefits differed substantially between groups. Relative to usual care, OH enrollees exhibited a mean net benefit of \$29,022 per person. The result suggests that the additional costs associated with OH treatment, roughly \$3000, are returned nearly tenfold in the form of reduced criminal activity, incarceration, and drug and alcohol use as well as increases in earning from employment... even under the most conservative assumption, we find a statistically significant and economically meaningful net benefit to OH of \$17,800 per enrollee over two years.” A. Lo Sasso, E. Byro, L. Jason, J. Ferrari, and B. Olson, *Benefits and Costs Associated with Mutual-Help Community-Based Recovery Homes: The Oxford House Model*, 35 Evaluation and Program Planning (1), (2012).

<sup>54</sup> D. Polcin, R. Korch, J. Bond, and G. Galloway, *Sober Living Houses for Alcohol and Drug Dependence: 18-Month Outcome*, 38 Journal of Substance Abuse Treatment, 356-365 (2010).

<sup>55</sup> 42 U.S.C. § 12101. This includes prohibition against discrimination in employment, State and local government services, public accommodations, commercial facilities, and transportation. U.S. Department of Justice, *Information and Technical Assistance on the Americans with Disabilities Act*, available at [http://www.ada.gov/2010\\_regs.htm](http://www.ada.gov/2010_regs.htm) (last visited MAY 8, 2017).

<sup>56</sup> 42 U.S.C. § 12102.

<sup>57</sup> Id.

impairment.<sup>58</sup> The phrase “physical or mental impairment” includes, among others<sup>59</sup>, drug addiction and alcoholism.<sup>60</sup> However, this only applies to individuals in recovery: ADA protections are not extended to individuals who are actively abusing substances.<sup>61</sup>

Additionally, the Fair Housing Amendment Acts of 1988 (FHA) prohibits housing discrimination based upon an individual’s handicap.<sup>62</sup> A person is considered to have a handicap if he or she has a physical or mental impairment which substantially limits one or more of his or her major life activities.<sup>63</sup> This includes individuals who have a record of such impairment, or are regarded as having such impairment.<sup>64</sup> Drug and alcohol addictions are considered to be handicaps under the FHA.<sup>65</sup> However, current users of illegal controlled substances and persons convicted for illegal manufacture or distribution of a controlled substance are not considered handicapped under the FHA.

An individual in recovery from a drug addiction or alcoholism is protected from discrimination under the ADA and FHA. Based on this protected class status, federal courts have held that mandatory conditions placed on housing for people in recovery from either state or sub-state entities, such as ordinances, licenses, or conditional use permits, are overbroad in application and result in violations of the FHA and ADA.<sup>66</sup> Additionally, federal courts have invalidated regulations that require registry of housing for protected classes, including recovery residences.<sup>67</sup> Further, federal courts have enjoined state action that is predicated on discriminatory local government decisions.<sup>68</sup>

State and local governments have the authority to enact regulations, including housing restrictions, which serve to protect the health and safety of the community.<sup>69</sup> However, this authority may not be used as a guise to impose additional restrictions on protected classes under the FHA.<sup>70</sup> Further, these regulations must not single out housing for disabled individuals and place requirements that are

<sup>61</sup> 28 C.F.R. § 35.131.

<sup>62</sup> 42 U.S.C. § 3604. Similar protections are also afforded under the Florida Fair Housing Act, s. 760.23, F.S., which provides that it is unlawful to discriminate in the sale or rental of, or to otherwise make unavailable or deny, a dwelling to any buyer or renter because of a handicap of a person residing in or intending to reside in that dwelling after it is sold, rented, or made available. The statute provides that “discrimination” is defined to include a refusal to make reasonable accommodations in rules, policies, practices, or services, when such accommodations may be necessary to afford such person equal opportunity to use and enjoy a dwelling.

different and unique from the requirements for housing for the general population.<sup>71</sup> Instead, the FHA and ADA require state and local governments to make reasonable accommodations necessary to allow a person with a qualifying disability equal opportunity to use and enjoy a dwelling.<sup>72</sup> The governmental entity bears the burden of proving through objective evidence that a regulation serves to protect the health and safety of the community and is not based upon stereotypes or unsubstantiated inferences.<sup>73</sup>

### *Voluntary Certification of Recovery Residences in Florida*

Florida does not license recovery residences, based on concerns about conflicts with the federal laws discussed above. Instead, in 2015 the Legislature enacted sections 397.487–397.4872, F.S., which establish voluntary certification programs for recovery residences and recovery residence administrators, implemented by private credentialing entities. Under the voluntary certification program, DCF approved two credentialing entities to design the certification programs and issue certificates: the Florida Association of Recovery Residences certifies the recovery residences and the Florida Certification Board certifies recovery residence administrators.

Sections 397.487 and 397.4871, F.S., set criteria for certification, including a requirement that the certified recovery residences be actively managed by a certified recovery residence administrator. Level 2 background screening is required for all recovery residence owners, directors and chief financial officers and for administrators seeking certification. Section 397.4872, F.S., allows DCF to exempt an individual from the disqualifying offenses of a Level 2 background screening if the individual meets certain criteria and the recovery residence attests that it is in the best interest of the program. Under s. 397.487, F.S., the credentialing entities must deny, suspend or revoke certification if a recovery residence or a recovery residence administrator fails to meet and maintain certain criteria. The credentialing entity must inspect recovery residences prior to the initial certification and during every subsequent renewal period, and must automatically terminate certification if it is not renewed within one year of the issuance date. It is a first degree misdemeanor<sup>74</sup> for any entity or person who advertises as a “certified recovery residence” or “certified recovery residence administrator”, respectively, unless the entity or person has obtained certification under this section.<sup>75</sup>

While certification is voluntary, Florida law incentivizes certification. Since July 1, 2016, Florida has prohibited licensed substance abuse service providers from referring patients to a recovery residence unless the recovery residence holds a valid certificate of compliance and is actively managed by a certified recovery residence administrator or is owned and operated by a licensed service provider or a licensed service provider’s wholly owned subsidiary.<sup>76</sup>

DCF publishes a list of all certified recovery residences and recovery residence administrators on its website.<sup>77</sup> As of March 1, 2017, there were 257 certified recovery residences in Florida.<sup>78</sup>

## Grand Jury and Task Force by the Fifteenth Judicial Circuit

In 2016, the Circuit Court of the Fifteenth Judicial Circuit, in Palm Beach, empaneled a Grand Jury and convened a task force focusing on issues with recovery residences and the substance abuse treatment industry.

### *Grand Jury Findings*

The Grand Jury found fraud and abuse occurring between recovery residences and certain providers within the substance abuse treatment industry<sup>79</sup> and that unregulated recovery residences harm their residences and the community.<sup>80</sup>

One of the main problems the Grand Jury focused on was deceptive marketing.<sup>81</sup> The Grand Jury heard testimony on how online marketers representing disreputable treatment providers use harmful practices, including using internet search terms to hijack the name and reputation of prominent respected treatment providers to route the person seeking treatment to an unrelated referral agency. Marketers also encourage individuals to seek the most intensive treatment possible, rather than the treatment in their best interest, in order to generate a larger fee.<sup>82</sup>

Another issue of focus was the illegal rent subsidies that some treatment providers paid to recovery residences for patient referrals. The Grand Jury heard testimony that many residents in recovery residences are in need of financial assistance for housing when they leave a residential treatment setting and move to outpatient; many of these individuals are from out-of-state and do not have jobs. In many instances, this leads to the treatment provider paying the resident's rent at a recovery residence in exchange for the referral by the recovery residence.<sup>83</sup>

Additionally, some recovery residences and treatment providers offer incentives to keep an individual at a particular provider or recovery residence; these incentives include gym memberships, scooters, cigarettes, clothes, and gift cards. Brokers frequently approach individuals offering incentives to get them to move to another treatment provider or recovery residence for the broker's benefit without regard to the needs of the individual.<sup>84</sup>

The Grand Jury also heard testimony about other problems in some recovery residences, including residents being given drugs so that they would fail drug tests and be able to re-engage in services generating insurance payments to providers, residents being sexually abused, and residents being forced to work in labor pools.<sup>85</sup>

### *Task Force Report*

The Legislature appropriated \$275,000 in nonrecurring general revenue funds for FY 2016-17 to the State Attorney for the Fifteenth Judicial Circuit to conduct a study regarding strengthening investigation and prosecution of criminal and regulatory violations within the substance abuse treatment industry. With the appropriation, the State Attorney established three groups: a Law Enforcement Task Force to investigate and arrest the rogue players in the treatment and recovery residence industries, using current laws; a Proviso Task Force, including members of organizations named in the legislative proviso, to study the issues and make specific recommendations for positive change through legislation and regulatory enhancements; and a third, larger and more inclusive group, to further study the

<sup>80</sup> Id. at 5.

<sup>81</sup> Id. at 11, 16.

<sup>82</sup> Id. at 14.

<sup>83</sup> Id. at 18.

<sup>84</sup> Id.

<sup>85</sup> Id. at 17.

problem and recommend solutions (the Task Force).<sup>86</sup> The Task Force submitted its report to the Legislature and the Governor on January 1, 2017.

Like the Grand Jury, the Task Force identified patient brokering and fraudulent marketing as key problems with some providers within the substance abuse treatment industry. The Task Force found that the economic environment of the substance abuse treatment industry in Florida serving patients from out-of-state with private insurance creates the opportunity for abuses such as overbilling for services, deceptive marketing, patient brokering, and incentives to relapse.

With respect to patient brokering, the Task Force found that it was common practice for certain substance abuse treatment providers to pay a weekly fee or kickback to their patients' recovery residences, with the understanding that the recovery residences will allow the patients to live at the residence for free or at a greatly reduced rent while attending the provider's outpatient treatment program. The Task Force found that patient brokering, by providing kickbacks to the recovery residence in exchange for the delivery of a patient, is commonplace among certain treatment providers. Some treatment providers and recovery residences were also offering incentives such as gym memberships, scooters, weekly massages, chiropractic services, cigarettes, clothes, gift cards and more. As a result of patient brokering, there exists an economic incentive for the patient, the substance abuse treatment provider, and the recovery residence for the patient to continually cycle through treatment and relapse.<sup>87</sup> The task force found that this cycle at times ends in the patient's overdose and death.<sup>88</sup>

#### *Recommendations to Address Abuses in the Substance Abuse Treatment Industry*

Based on the testimony it heard, the Grand Jury made the following recommendations:

- Prohibit deceptive advertising;
- Provide disclaimers and other useful information to patients;
- Require marketing entities, marketers, and admissions personnel to be licensed;
- Require licensure and certification of commercial<sup>89</sup> recovery residences;
- Eliminate the statutory provision allowing patient referrals to an uncertified recovery residence owned by a substance abuse treatment provider;
- Prohibit patient referrals from an uncertified recovery residence to a substance abuse treatment provider;
- Treat substance abuse licensure as a privilege rather than a right;
- Provide better resources by raising license and service fees;
- Prohibit the solicitation or receipt of any "benefit" under the patient brokering statute;
- Increase criminal penalties and minimum fines for patient brokering;
- Create penalty enhancements for large-scale patient brokering;
- Add patient brokering to the Statewide Prosecutor's jurisdiction;
- Permit disclosure of patient records, for the purpose of an ongoing criminal investigation, without prior notice; and
- Promote education and interagency collaboration with respect to investigations into the substance abuse treatment industry.<sup>90</sup>

---

<sup>86</sup> *Supra*, note 8 at 2.

<sup>87</sup> *Id.* Often insurers are required to cover each relapse as a separate event; as a result, there is an economic incentive for bad actors in the industry to encourage relapse.

<sup>88</sup> *Id.*

<sup>89</sup> The Grand Jury differentiated between an OH recovery residence model and a "commercial" recovery residence that is a for-profit business operated by a third party; however, federal law applies to both models. See the discussion of Federal Law Applicable to Recovery Residences on pages 8-10, *infra*, for more detail.

<sup>90</sup> *Supra*, note 79, *passim*.

The Task Force made several in-depth recommendations.

1. DCF Licensure. The Task Force recommended that DCF increase its licensure fees and the number of staff it has for licensure inspections. It also recommended increasing DCF's authority to effectively regulate<sup>91</sup> substance abuse treatment providers.<sup>92</sup>
2. Recovery Residence Referrals. The Task Force also recommended that recovery residence referrals be subject to greater restrictions. It recommended expanding the individuals subject to referral provisions and addressing referrals from recovery residences to treatment providers.
3. Patient Records. The Task Force also recommended that the Legislature modify privacy requirements for patient records relating to criminal investigations to allow the court, at its discretion, to enter an order authorizing the disclosure of an individual's substance abuse treatment records without prior notice, so that providers and recovery residence operators are not tipped off to an undercover criminal investigation.<sup>93</sup> Federal law requires adequate notice, but state law requires prior notice; at least one judge has rejected the state's argument that adequate notice does not require prior notice.<sup>94</sup>
4. Patient Brokering. The Task Force identified statutory changes to address patient brokering and recommended that the state impose greater penalties and make other enhancements to the patient brokering statute. It recommended that a licensed substance abuse treatment provider not be allowed to refer a "prospective, current or discharged patient to, or accept a referral from" a recovery residence unless the recovery residence is certified and actively managed by a certified recovery residence administrator.<sup>95</sup> It also recommended that the term "benefit" should be added to the prohibited items solicited or received in the patient brokering statute and that there should be enhanced penalties for multiple patient brokering offenses.<sup>96</sup> Additionally, for the prosecution of patient brokering, the Task Force recommended adding patient brokering to the enumerated list of offenses the Office of Statewide Prosecution,<sup>97</sup> within the Office of the Attorney General, may prosecute and adding patient brokering to the predicate offenses constituting racketeering activities.<sup>98</sup>
5. Marketing Practices. The Task Force recommended that the Legislature create a statutory prohibition of unethical marketing practices within ch. 397, F.S., and create criminal penalties for fraudulent marketing practices.<sup>99</sup>

### Patient Brokering

Florida's patient brokering statute, s. 817.505, F.S., makes it unlawful for any person to engage in patient brokering. Patient brokering is paying to induce, or make a payment in return for, a referral of a patient to or from a health care provider or health care facility. Such payments include commissions, bonuses, rebates, kickbacks, bribes, split-fee arrangements, in cash or in kind, provided directly or indirectly.<sup>100</sup> A violation of the patient brokering statute is a third degree felony<sup>101</sup> and may also be

---

<sup>91</sup> The Task Force found that DCF lacks resources, including adequate staffing, and faces statutory limitations that undermine its ability to regulate substance abuse treatment providers.

<sup>92</sup> *Supra*, note 8 at 5-7.

<sup>93</sup> *Id.* at 15.

<sup>94</sup> *Supra*, note 79.

<sup>95</sup> *Id.* at 12.

<sup>96</sup> *Id.*

<sup>97</sup> The Florida Constitution gives the Office of Statewide Prosecution concurrent jurisdiction with the state attorneys to prosecute violations of criminal laws set out in s. 16.56, F.S., that occur in two or more judicial circuits, or when any such offense is affecting or has affected two or more judicial circuits as provided by general law. Fla. Const. art. IV, s. 4(a).

<sup>98</sup> *Id.* at 14; s. 895.02(8), F.S. enumerates 50 crimes that constitute racketeering activities, several of which relate to fraud, and also incorporates the federal definition of racketeering activities in 18 U.S.C. s. 1961(1).

<sup>99</sup> *Id.* at 13-14.

<sup>100</sup> S. 817.505(1), F.S.

remedied by an injunction or any other enforcement process. Private entities bringing an action under the patient brokering statute may recover reasonable expenses, including attorney fees.<sup>102</sup>

The patient brokering statute applies to any person regulated, or statutorily exempt from regulation, by the Agency for Health Care Administration or the Department of Health, who has a Medicaid provider contract, or who has a contract with DCF to provide substance abuse or mental health services under part IV of chapter 394. It expressly applies to “substance abuse providers” licensed under chapter 397.

The patient brokering statute has been used in cases involving split-fee arrangements; for example, an assignment of benefits scenario in which a non-provider suggested a patient go to a particular MRI facility, paid the facility for the MRI and billed the insurer a greater amount.<sup>103</sup> It has also been used in self-referral arrangements; for example, an arrangement by which a series of shell companies, nominee owners and independent contractors were used to conceal relationships that generated a high-volume of personal injury protection patients to a particular provider through a toll-free referral number.<sup>104</sup>

#### *Arrests of Substance Abuse Treatment Provider and Recovery Residence Personnel*

Since Fall 2016, law enforcement has arrested at least seventeen individuals for patient brokering in Palm Beach County.<sup>105</sup> The first arrest was the CEO of Whole Life Recovery, which provided intensive outpatient treatment.<sup>106</sup> By November 23, five more individuals had been arrested for patient brokering under s. 817.505, F.S.<sup>107</sup> In December 2016, six individuals were charged in a federal complaint that included patient brokering, insurance fraud, and allegations of human trafficking.<sup>108</sup> Most recently, the owner of Chapters Recovery, which provides outpatient treatment and intensive outpatient treatment, was arrested on 93 counts of patient brokering.<sup>109</sup> According to the arrest report, he paid \$325,000 to three sober home operators who enrolled residents living in their sober homes in treatment programs at Chapters Recovery.<sup>110</sup> Most recently, the co-owner of Epiphany’s Treatment Center was arrested on 15 counts of patient brokering.<sup>111</sup>

#### Deceptive Marketing and Unfair Practices

The Florida Deceptive and Unfair Trade Practices Act<sup>112</sup> (FDUTPA) makes unlawful unfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce. Violations of FDUTPA are investigated and prosecuted by state attorneys, or the Department of Legal Affairs in the Office of the Attorney General if the violations affect more than

<sup>112</sup> Ss. 501.201-501.213, F.S.

one judicial circuit.<sup>113</sup> Violations may be remedied by declaratory judgment, injunction, or an action for actual damages; in addition, a court may order other legal or equitable relief.<sup>114</sup> In addition, a court may assess civil penalties of up to \$10,000 per violation.<sup>115</sup> FDUTPA imposes larger penalties for willful violations against senior citizens (age 60 or older), persons with disabilities, and military service members and their families. In this context, a person with a disability is one who has a mental or educational impairment. The civil penalty for a violation of this sort is not more than \$15,000.<sup>116</sup>

Courts have defined an “unfair practice” as “one that offends established public policy and one that is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.”<sup>117</sup> Similarly, courts have defined a “deceptive act” as one in which there is a “representation, omission, or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer's detriment.”<sup>118</sup>

FDUTPA has been used in cases involving similarly-named companies, which could lead consumers to believe them to be the same<sup>119</sup>; in “bait-and-switch” cases<sup>120</sup>; and instances of unreasonable pricing<sup>121</sup>, among many other types of activities. FDUTPA applies broadly, to any person who engages in this conduct, and would apply to this conduct by substance abuse treatment providers and recovery residences.

### Florida Telemarketing Act

The Department of Agriculture and Consumer Services (DACS) regulates telemarketing businesses, including “commercial telephone sellers,” pursuant to pt. IV, ch. 501, F.S. A commercial telephone seller is defined as any person who engages in commercial telephone solicitation<sup>122</sup> on his or her own behalf or through salespersons; this includes, but is not limited to, owners, operators, officers, directors, partners, or other individuals engaged in the management activities of a business entity. Commercial telephone sellers must be licensed by DACS, unless specifically exempted from regulation.<sup>123</sup> DACS regulates commercial telephone sellers doing business in Florida, which includes either telephone solicitation from a location in Florida or solicitation from other states or nations of purchasers located in Florida.<sup>124</sup>

#### *Licensure Requirements*

An applicant must submit a \$1,500 application fee and provide a bond, letter of credit, or certificate of deposit with the application for licensure.<sup>125</sup> An applicant for a license as a commercial telephone seller must submit certain identifying information for the applicant and related entities to DACS, as well as disclose whether the applicant has ever been involved in any activities that lead to prosecution for any offense involving fraud, theft, embezzlement, fraudulent conversion, or misappropriation of property.<sup>126</sup>

<sup>122</sup> Commercial telephone solicitation includes a written or oral notification or advertisement transmitted through any means to a person where a telephone call response is invited. S. 501.603(1)(b), F.S.

<sup>123</sup> S. 501.605, F.S.

<sup>124</sup> *Id.*

<sup>125</sup> *Id.*

<sup>126</sup> *Id.*

As part of the application, there are additional disclosures for any affiliated commercial seller or salesperson identified in the application. The applicant must disclose any affiliated commercial seller or salesperson who has:

- Ever been involved in any activities that lead to prosecution for or any offense involving fraud, theft, embezzlement, fraudulent conversion, or misappropriation of property;
- Ever had any action taken against a license to do business or practice an occupation or trade;
- Ever made any untrue or misleading representation or used any unfair, unlawful, or deceptive trade practice; or
- Filed for bankruptcy, been adjudged bankrupt, or been reorganized because of insolvency in the last seven years.<sup>127</sup>

Section 501.616, F.S. requires all commercial telephone sellers to be licensed and prohibits them from employing or being affiliated with any unlicensed salespersons. It also prohibits a salesperson from being employed by or affiliated with an unlicensed commercial telephone seller.

#### *Licensure Discipline*

DACS may discipline a commercial telephone seller or salesperson or any person applying for licensure as a commercial telephone seller or salesperson, including, but not limited to, owners, operators, officers, directors, partners, or other individuals engaged in the management activities of a business entity, if it finds that the seller or salesperson has:

- Been convicted or found guilty of, or has entered a plea of guilty or a plea of nolo contendere to, any felony, racketeering or any offense involving fraud, theft, embezzlement, fraudulent conversion, or misappropriation of property, or any other crime involving moral turpitude;
- Had entered against him or any business for which he has worked or been affiliated, any order, in any action involving racketeering, fraud, theft, embezzlement, fraudulent conversion, or misappropriation of property, or for the use of any untrue or misleading representation in an attempt to sell or dispose of real or personal property or the use of any unfair, unlawful, or deceptive trade practice;
- Worked or been affiliated with any company that has ever been subject to any order relating to a business activity as the result of any action brought by a governmental agency, including any action affecting any license to do business or practice an occupation or trade;
- Filed for bankruptcy, been adjudged bankrupt, or been reorganized because of insolvency within the last seven years;
- Been a principal, director, officer, or trustee of, or a general or limited partner in, or had responsibilities as a manager in, any corporation, partnership, joint venture, or other entity that filed the bankruptcy, was adjudged bankrupt, or was reorganized because of insolvency within one year after the person held that position;
- Been convicted of or found to have been acting as a salesperson or commercial telephone seller without a license in any jurisdiction;
- Falsified or willfully omitted any material information asked for in any application, document, or record required to be submitted or retained under this part;
- Made a material false statement in response to any request or investigation by DACS or the state attorney;
- Refused or failed, after notice, to produce any document or record or disclose any information required to be produced or disclosed under pt. IV, ch. 501, F.S., or applicable rules;
- Been found not to be of good moral character; or
- Otherwise violated or is operating in violation of any of the provisions of pt. IV, ch. 501, F.S., or applicable rules.<sup>128</sup>

---

<sup>127</sup> S. 501.606, F.S.

<sup>128</sup> S. 501.612(1), F.S.

Upon a finding of any of the above violations, DACS may impose a fine; place the licensee on probation; or suspend, revoke or deny a license.<sup>129</sup> In addition, for violations of the Telemarketing Act, DACS may bring an action to obtain a declaratory judgement or to enjoin a violation.<sup>130</sup> In such civil actions, the court may assess the expenses and attorney's fees and costs against a commercial telephone seller found in violation.<sup>131</sup>

## **Effect of the Bill**

CS/HB 807 implements several of the recommendations from the Task Force to address the problems within the substance abuse treatment industry. The bill makes several changes to DCF's licensure program for substance abuse treatment providers in ch. 397.

### Substance Abuse Licensure

The bill revises the licensure application requirements and process, requiring providers as part of the application to provide proof that they have obtained accreditation by the 2nd renewal. Providers must also provide detail in the application about the clinical services they will provide. DCF must set licensure fees sufficient to cover the cost of regulation. The bill limits DCF to issuing only one probationary license per provider and only when doing so would not place the health, safety, or welfare of individuals at risk. DCF is also prohibited from issuing a license if staff do not pass background screenings and subsequently fail to obtain exemptions.

The bill increases penalties for operating without a license, making it a third-degree felony punishable by up to five years in prison.

The bill creates s. 397.410, F.S., which requires DCF to draft rules on minimum licensure standards by January 1, 2018, that address administrative management; standards for clinical and treatment best practices; qualifications of all personnel, including staffing ratios; and service provider facility standards.

The bill addresses the quality of substance abuse treatment by specifying that DCF must establish provider staff qualifications in rule, including what services must be provided by licensed or certified personnel. DCF must report to the Legislature and the Governor by December 1, 2020, on the appropriateness of licensure requirements for qualifications of personnel providing direct clinical treatment. The bill also creates a definition for "clinical supervisor" and requires background screening for this position.

The bill authorizes DCF to inspect providers on an announced or unannounced basis to see if minimum requirements are met and grants DCF more flexibility in scheduling inspections.

The bill also expands DCF's authority to take action against a service provider. DCF must classify violations by scope and nature. DCF must use a tier-based system of classifying violations and issuing fines or requiring other action. It allows for each day a violation occurs to be considered a separate violation. The bill authorizes use of corrective action plans; allows moratoria or immediate license suspensions for client health, safety or welfare; requires visible posting of notice of a moratorium or suspension; and allows DCF to deny, suspend, or revoke a license due to:

- False representation;
- An act affecting client health or safety;
- A violation of statute or rule;

---

<sup>129</sup> S. 501.612(2), F.S.

<sup>130</sup> Any injunctive order, whether temporary or permanent, issued by the court shall be effective throughout the state unless otherwise provided in the order. S. 501.618, F.S.

<sup>131</sup> Ss. 501.618 and 501.621, F.S.

- A demonstrated pattern of deficient performance; or
- Failure to remove personnel failing background screening.

DCF may also, at its discretion, deny an application for renewal of a regular license, if the applicant submits the renewal application fewer than 30 days before the license expires. Those who submit their applications fewer than 60 days before their licenses expire will still be subject to a \$100 late fee.

The bill also reorganizes pt. II of ch. 397 by renumbering several sections. It also repeals s. 397.471, F.S., as its provisions are incorporated into new section s. 397.410, F.S. The bill also conforms cross-references.

### Recovery Residence Referrals

The bill expands current prohibitions on referrals to address referrals from certified recovery residences to licensed service providers. Current law prohibits referrals by licensed service providers to uncertified recovery residences; the bill would prohibit referrals by uncertified recovery residences to licensed service providers. The bill also includes prospective patients in these referral prohibitions. After June 30, 2019, violators are subject to a \$1,000 fine per occurrence.

The bill removes the exemption for referrals to a recovery residence that is owned and operated by a licensed service provider or its wholly owned subsidiary on or after July 1, 2018; however, it creates exceptions for referrals by licensed treatment providers under contract with a managing entity, as defined in s. 394.9082, F.S., and for referrals by an uncertified recovery residence to a licensed service provider when the recovery residence does not benefit directly or indirectly from the referral.

### Patient Records

The bill creates a new provision for applications for disclosure of patient records for individuals receiving substance abuse services in an active criminal investigation. For criminal investigations, the court, at its discretion, will be able to enter an order authorizing the disclosure of an individual's substance abuse treatment records without prior notice. Existing law would continue to apply to applications filed alone or as part of a pending civil investigation.

### Patient Brokering

The bill adds the term "benefit" to the list of items solicited or received that may not be used to induce the referral of a patient. The bill also adds patient brokering to the offenses that can be investigated and prosecuted by the Office of Statewide Prosecution and to the crimes that constitute racketeering activities.

The bill creates a \$50,000 fine for patient brokering. Additionally, the bill creates enhanced penalties for higher volumes of patient brokering. For brokering of 10 to 19 patients, the crime is a second-degree felony punishable as provided in ss. 775.082 or 775.084, F.S., and includes a \$100,000 fine. For brokering of 20 or more patients, the crime is a first-degree felony punishable as provided in ss. 775.082 or 775.084, F.S., and includes a \$500,000 fine. The bill also adds patient brokering into the offense severity ranking chart; this will dictate the number of points that will be added to an offender's scoresheet for sentencing purposes.

### Marketing Prohibitions

#### *Deceptive Marketing*

The bill expands the types of deceptive actions prohibited beyond those covered under FDUTPA, and provides criminal penalties. It makes a legislative finding that consumers of substance abuse treatment have disabling conditions and that such consumers and their families are vulnerable and at risk of

being easily victimized by fraudulent marketing practices that adversely impact the delivery of health care.

Based on this finding, the bill prohibits a service provider, an operator of a recovery residence, or a third party who provides any form of advertising or marketing services to a service provider or an operator of a recovery residence from engaging in any of the following marketing practices:

- Making a false or misleading statement or providing false or misleading information about the provider's, operator's, or third party's products, goods, services, or geographical locations in its marketing, advertising materials, or media or on its website. This is a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, F.S.<sup>132</sup>
- Including on its website false information or electronic links, coding, or activation that provides false information or that surreptitiously directs the reader to another website. This is a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, F.S.
- Conduct prohibited by the patient brokering statute, s. 817.505, F.S.
- Entering into a contract with a marketing provider who agrees to generate referrals or leads for the placement of patients with a service provider or in a recovery residence through a call center or a web-based presence, unless the service provider or the operator of the recovery residence discloses specified information to the prospective patient.<sup>133</sup> This is a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, F.S.

#### *Fraudulent Marketing*

The bill makes it unlawful for any person to knowingly and willfully make a materially false or misleading statement or provide false or misleading information about the identity, products, goods, services, or geographical location of a licensed service provider, as defined in chapter 397, F.S., in marketing, advertising materials, or other media or on a website with the intent to induce another person to seek treatment with that service provider. Such fraudulent marketing is a felony of the third degree, punishable as provided in ss. 775.082, 775.083, or 775.084, F.S.<sup>134</sup>

#### *Licensure of Entities Providing Substance Abuse Marketing*

The bill requires entities providing marketing services in accordance with s. 397.55, F.S., to be licensed by DACS under the Florida Telemarketing Act. These entities will be required to pay the \$1,500 licensure fee, but the bill exempts them from the bond, line of credit, and certificate of deposit requirement. The bill only subjects the entities, and not the individuals, to licensure. They will be regulated and subject to discipline in the same manner as commercial telephone sellers; in addition to any civil or criminal penalties for fraudulent or deceptive practices under current law, the bill will subject them to licensure discipline for such actions.

Salespersons working for entities providing substance abuse marketing services will not be required to be personally licensed.

The bill provides an effective date of July 1, 2017.

---

<sup>132</sup> A first-degree misdemeanor is punishable by up to one year in jail and a \$1,000 fine.

<sup>133</sup> If the marketing provider provides instructions that allow the prospective patient to easily (1) determine whether the marketing provider represents specific licensed service providers or recovery residences that pay a fee to the marketing provider and the identity of such service providers or recovery residences and (2) access lists of licensed service providers and recovery residences on the department website, it is exempt from this prohibition.

<sup>134</sup> A third-degree felony is punishable by up to five years in prison and a \$5,000 fine.

## II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

### A. FISCAL IMPACT ON STATE GOVERNMENT:

#### 1. Revenues:

Indeterminate. DCF will experience additional fee revenue from raising the fees for each licensed service component to cover the cost of regulation. DCF may also experience additional revenue from the imposition of licensure fines under the new authority in the bill. The amount of additional revenue from licensure fees and fines depends on the amounts set by rule and the number of licensees paying them, which is indeterminate.

Additionally, the Clearinghouse will receive \$48 in revenue for each additional background check.<sup>135</sup> These fees will go into the Florida Department of Law Enforcement's Operating Trust Fund.<sup>136</sup>

DACS will experience additional fee revenue from licensing entities providing marketing services in accordance with s. 397.55, F.S., under pt. IV of ch. 501, F.S.; these fees will be used to cover the cost of regulation.

#### 2. Expenditures:

Indeterminate. DCF will have to do rulemaking to establish the minimum standards for licensure and the classifications of licensure violations; these costs can be absorbed within existing resources.

DCF may have an increased workload associated with increased regulatory oversight of substance abuse treatment providers, including evaluation of compliance with minimum standards and increased background screenings,<sup>137</sup> which would be covered through the increase in licensure fees.

DCF may also have an increased workload associated with licensure discipline, including ch. 120, F.S., proceedings at the Division of Administrative Hearings, which would be covered through the increase in licensure fees.

DCF may eventually see a decrease in workload associated with inspections as providers of clinical treatment services become accredited; under current law, DCF must inspect accredited licensees triennially instead of annually.

DACS may have an increased workload associated with the regulatory oversight of entities providing marketing services in accordance with s. 397.55, F.S., which will be covered through the cost of licensure.<sup>138</sup>

### B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

#### 1. Revenues:

None.

---

<sup>135</sup> Florida Department of Law Enforcement, Agency Analysis of 2017 House Bill 807, (Mar. 20, 2017) (on file with Health and Human Services Committee Staff).

<sup>136</sup> *Id.*

<sup>137</sup> DCF is unable to estimate the number of clinical supervisors who would need to be background screened. The number of background screens impacts DCF's costs of conducting screenings and fees for participation in the Background Screening Clearinghouse administered by the Agency for Health Care Administration (AHCA); DCF will have to pay AHCA if additional individuals are background screened.

<sup>138</sup> Email from Andrew Liebert, Deputy Director, Office of Legislative Affairs, Florida Department of Agriculture and Consumer Services, FW: HB 807, (Apr. 3, 2017) (on file with Health and Human Services Committee staff).

2. Expenditures:

Local law enforcement may see an increase in cost associated with enforcing the new criminal penalties created by the bill.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

If the changes to patient brokering statutes deter treatment providers and recovery residence operators from giving persons in recovery from substance abuse inducements such as gym memberships, scooters, cigarettes, clothes, and gift cards, these individuals will receive fewer such inducements.

Substance abuse treatment providers and recovery residence operators who are engaging in practices made illegal under the bill will be subject to monetary fines and criminal penalties unless they adapt their business practices.

Licensed service providers will need to pay for background screenings for clinical supervisors, unless these individuals are exempt, such as due to having already been screened within five years. The background check will cost \$60 per individual.<sup>139</sup>

Licensed service providers of clinical services who are not already accredited will need to obtain accreditation by the second renewal. The cost of accreditation ranges from \$7,500 to \$15,000 and is valid for a three-year period.

Licensed service providers who commit certain violations will be subject to fines and other licensure actions such as moratoria, license suspension, revocation, and denial, which could have an economic impact on such providers.

D. FISCAL COMMENTS:

The volume and complexity of patient brokering cases that the Office of Statewide Prosecution may choose to prosecute is unknown. The Office of Statewide Prosecution can absorb these prosecutions. If the Office elects to prosecute a large number of patient brokering cases, it may need to divert employees from prosecuting other offenses.
