Be It Enacted by the Legislature of the State of Florida:

2425

Section 1. Section 456.4501, Florida Statutes, is created to read:

27

2.6

456.4501 Use of telehealth to provide services.—

(1) DEFINITIONS.—As used in this section, the term:

2829

(a) "Information and telecommunications technologies" means

597-02153-18 2018280c1

those secure electronic applications used by health care practitioners and health care providers to provide health care services, evaluate health care information or data, provide remote patient monitoring, or promote healthy behavior through interactions that include, but are not limited to, live video interactions, text messages, or store and forward transmissions.

- (b) "Store and forward" means the type of telehealth encounter which uses still images of patient data for rendering a medical opinion or patient diagnosis. The term includes the asynchronous transmission of clinical data from one site to another site.
- (c) "Synchronous" means live or two-way interactions using a telecommunications system between a provider and a person who is a patient, caregiver, or provider.
- (d) "Telecommunications system" means the transfer of health care data through advanced information technology using compressed digital interactive video, audio, or other data transmission; clinical data transmission using computer image capture; and other technology that facilitates access to health care services or medical specialty expertise.
- (e) "Telehealth" means the mode of providing health care services and public health services by a Florida licensed practitioner, within the scope of his or her practice, through synchronous and asynchronous information and telecommunications technologies where the practitioner is located at a site other than the site where the recipient, whether a patient or another licensed practitioner, is located.
- (f) "Telehealth provider" means a person who provides health care services and related services through telehealth and

597-02153-18 2018280c1

who is licensed under chapter 457; chapter 458; chapter 459; chapter 460; chapter 461; chapter 462; chapter 463; chapter 464; chapter 465; chapter 466; chapter 467; part I, part III, part IV, part V, part X, part XIII, or part XIV of chapter 468; chapter 478; chapter 480; parts III and IV of chapter 483; chapter 484; chapter 486; chapter 490; or chapter 491; or who is certified under s. 393.17 or part III of chapter 401.

- (2) PRACTICE STANDARDS.—
- (a) The standard of care for a telehealth provider providing medical care to a patient is the same as the standard of care generally accepted for a health care professional providing in-person health care services to a patient. A telehealth provider may use telehealth to perform a patient evaluation. If a telehealth provider conducts a patient evaluation sufficient to diagnose and treat the patient, the telehealth provider is not required to research the patient's medical history or conduct a physical examination of the patient before using telehealth to provide services to the patient.
- (b) A telehealth provider and a patient may be in separate locations when telehealth is used to provide health care services to the patient.
- (c) A nonphysician telehealth provider using telehealth and acting within his or her relevant scope of practice is not deemed to be practicing medicine without a license under any provision of law listed in paragraph (1)(f).
- (d) A telehealth provider who is authorized to prescribe a controlled substance named or described in Schedules I through V of s. 893.03 may use telehealth to prescribe a controlled substance, except that telehealth may not be used to prescribe a

597-02153-18 2018280c1

controlled substance to treat chronic nonmalignant pain as defined in ss. 458.3265(1)(a) and 459.0137(1)(a) or to issue a physician certification for marijuana pursuant to s. 381.986. This paragraph does not prohibit a physician from using telehealth to order a controlled substance for an inpatient admitted to a facility licensed under chapter 395 or a patient of a hospice licensed under chapter 400.

- (e) By January 1, 2019, the department, in coordination with the applicable boards, shall develop and disseminate educational materials for the licensees listed in paragraph (1) (f) on the use of telehealth modalities to treat patients.
- (3) RECORDS.—A telehealth provider shall document in the patient's medical record the health care services rendered using telehealth according to the same standard used for in-person health care services pursuant to ss. 395.3025(4) and 456.057.
- (4) CONSENT.—Patients are not required to provide specific authorization for treatment through telehealth, but must authorize treatment that meets the requirements of the applicable practice acts and s. 766.103, and must be allowed to withhold consent for any specific procedure or treatment through telehealth.

Section 2. This act shall take effect July 1, 2018.
