

**The Florida Senate**  
**BILL ANALYSIS AND FISCAL IMPACT STATEMENT**

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

---

Prepared By: The Professional Staff of the Committee on Health Policy

---

BILL: SB 1518

INTRODUCER: Senator Wright

SUBJECT: Alternative Treatment Options for Veterans

DATE: March 29, 2019

REVISED: \_\_\_\_\_

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	<u>Williams</u>	<u>Brown</u>	<u>HP</u>	<u>Pre-meeting</u>
2.	_____	_____	<u>AHS</u>	_____
3.	_____	_____	<u>AP</u>	_____

---

**I. Summary:**

SB 1518 authorizes the Florida Department of Veterans' Affairs (FDVA) to contract with specified individuals and entities to provide alternative treatment options for veterans who have been diagnosed by a health care practitioner with service-connected posttraumatic stress disorder or a traumatic brain injury. The provision of the alternative treatment services must be under the direction and supervision of an individual licensed as an allopathic physician, an osteopathic physician, a chiropractor, a psychologist, or a clinical social worker, marriage and family therapist, or a mental health counselor. The FDVA is given rulemaking authority for purposes of implementing the bill.

Implementation of the bill is subject to an appropriation.

The bill has an effective date of July 1, 2019.

**II. Present Situation:**

**Veterans' Health Care Services**

Veterans of the United States Armed Forces may be eligible for a range of benefits, which are codified in Title 38 of the United States Code. Certain former members of the Reserves or National Guard who were called to active duty may also be eligible for benefits.<sup>1</sup> The federal Department of Veterans Affairs (VA) is required by law to provide eligible veterans hospital care and outpatient care services that are defined as "needed." The VA defines "needed" as care or services that will promote, preserve, and restore health. This includes treatment, procedures, supplies, or services. This decision of need will be based on the judgment of the veteran's health care provider and in accordance with generally accepted standards of clinical practice.

---

<sup>1</sup> U.S. Department of Veterans Affairs, Health Benefits, <https://www.va.gov/HEALTHBENEFITS/apply/veterans.asp> (last visited Mar. 21, 2019).

There are also specific health programs for which veterans may be eligible, including treatment relating to:

- Blindness rehabilitation;
- Post-traumatic stress;
- Traumatic brain injury;
- Agent Orange exposure;
- Gulf War Syndrome and related illnesses;
- Radiation exposure; and,
- HIV/AIDS.<sup>2</sup>

If a person served in the active military service and was separated under any condition other than “dishonorable,” that individual may be eligible for health care and other benefits under the federal Veterans Health Administration (VHA) through the VA. Most veterans who enlisted after September 7, 1980, or entered active duty after October 16, 1981, must have served at least 24 continuous months; however, this time standard may not apply to those veterans who were discharged due to a disability that was caused or aggravated in the line of duty or under other exceptions.<sup>3</sup>

Veterans must register or apply for health care benefits through the VHA. Certain categories of veterans are provided enhanced enrollment, such as veterans who:

- Are former prisoners of war;
- Are Purple Heart Medal recipients;
- Are Medal of Honor recipients;
- Are classified as having compensable VA-awarded, service-connected disability<sup>4</sup> representing 10 percent or more of the veteran’s functional capacity;
- Receive a VA pension;
- Were discharged from the military because of a disability (not pre-existing), early out, or hardship;
- Served in a theater of operations for five years post discharge;
- Served in the Republic of Vietnam from January 9, 1962, to May 7, 1975;
- Served in the Persian Gulf from August 2, 1990 to November 11, 1998;
- Were stationed or resided at Camp Lejeune for 30 days or more between August 1, 1953, and December 31, 1987;
- Were found catastrophically disabled by the VA; or

<sup>2</sup> U.S. Department of Veterans Affairs, Veteran’s Health Care overview, *available at* <https://www.military.com/benefits/veterans-health-care/veterans-health-care-overview.html#1> (last visited Mar. 21, 2019).

<sup>3</sup> *Supra* note 1.

<sup>4</sup> A service-connected disability is an injury or illness that was incurred or aggravated during active military service. Compensation may also be paid for post-service disabilities that are considered related or secondary to disabilities occurring in service or presumed to be related to circumstances of military services, even if they arise after military service. To be eligible for compensation, the veteran must have been separated or discharged under conditions other than dishonorable. *See* <https://www.benefits.va.gov/compensation/> (last visited Mar. 21, 2019).

- Have a household income that is below the VA’s national income or geographical-adjusted thresholds.<sup>5</sup>

Only certain veterans are required to provide income information to the VA as part of the application process. Veterans who do not have a VA-service connected disability, do not receive a VA pension, or have a special eligibility are required to participate in the financial assessment. While many Veterans qualify for enrollment and cost-free health care services based on a compensable, service-connected condition or other qualifying factors, certain veterans will be asked to complete a financial assessment at the time of enrollment to determine their eligibility for free medical care, medications and/or travel benefits. The assessment is based on the previous year’s gross household income of the veteran and his or her spouse and dependents, if any.

This financial information also may be used to determine the veteran’s enrollment priority group. The gross household income amounts that are used to determine priority groups or eligibility for cost-free care are adjusted annually. These amounts can also vary by geographic based assessments. Unreimbursed medical expenses are deductible from the veteran’s gross income, including medical-travel related expenses, health insurance premiums, and prescriptions.<sup>6</sup>

When a veteran enrolls for benefits, the he or she is assigned to one of eight priority groups that the VA uses to balance the demand for services with available resources. Priority groupings are based on need for services, level of disability, discharge status, and income.<sup>7</sup> The highest priority group are those veterans with service-related injuries with at least a 50 percent service-connected disability and/or the veteran has been determined unemployable.<sup>8</sup> Group 8 is the lowest priority group and includes those veterans whose gross household incomes are above the VA national income threshold and who agree to pay copayments.

**Florida Veterans**

The federal VA system serves more than 1.5 million Floridians, which is the third highest population of veterans in the country behind California and Texas.<sup>9</sup> Over half of the state’s veterans are aged 65 and older, with the majority of those veterans having served during the Vietnam era and with the Gulf Wars second, as noted in the chart below.

<b>Florida’s Veteran Population by Period of Service<sup>10</sup></b>	
<b>Period of Service</b>	<b>Number of Veterans 9/30/2017</b>
WWII	75,794

<b>Florida's Veteran Population by Period of Service<sup>10</sup></b>	
<b>Period of Service</b>	<b>Number of Veterans 9/30/2017</b>
Korea	153,562
Vietnam	532,691
Gulf Wars	500,269
<b>Total</b>	<b>1,559,778</b>

In Florida, 733,037 individuals were enrolled in VA health services and over 500,000 unique enrollees received treatment in Fiscal Year 2017. The VHA operates nine VA inpatient facilities, 69 outpatient facilities, and 24 Vet Centers in the state. For 2016, the VHA reported expending \$6,371,816 for medical care in Florida. Besides health care benefits, over 348,000 Florida veterans also receive disability compensation payments.<sup>11</sup>

### *Uninsured Florida Veterans*

The most recent projections indicate that approximately 49,000 Florida veterans are uninsured, or 7.4 percent of the state's veteran population, which is 5.2 percentage points lower than the state's 2013 uninsured rate of 12.5 percent.<sup>12</sup> Census figures released earlier this year showed that most veterans either had TRICARE<sup>13</sup> or VHA coverage alone or paired it with private coverage (716,228 enrollees) compared with a coupling with public coverage such as Medicare or Medicaid (610,462 enrollees).<sup>14</sup>

A study by the RAND Corporation found that most care provided to non-elderly veterans is delivered outside of the VA system.<sup>15</sup> Federal VA data show that while health care benefits are the largest veterans' benefit program,<sup>16</sup> most veterans are covered by non-VA health insurance even if they are enrolled in the VA. Implementation of the Affordable Care Act was followed by reduction in the number of veterans who lacked any form of health insurance and increases in the number of VA-covered veterans who were dually-enrolled in some non-VA source of insurance.<sup>17</sup>

<sup>13</sup> TRICARE is a military healthcare program for active duty personnel, military retirees, and their dependents, which is managed by the Defense Health Agency under the federal Department of Defense (DOD). TRICARE, formerly known as CHAMPUS, provides comprehensive health care services through military hospitals and clinics with civilian health care networks. The CHAMPVA is managed by DVA, which shares the cost of covered health care services with eligible beneficiaries. *See* <https://www.va.gov/COMMUNITYCARE/programs/dependents/champva/index.asp> (last visited Mar. 22, 2019).

## **Veterans' Health Care Delivery System**

Nationally, the VA has 155 inpatient sites and over 1,000 outpatient sites with another 300 Vet Centers that provide counseling services, outreach, and referral services to combat veterans and their families. Veterans can receive health care services at any VA health care facility in the country. Health care enrollment and utilization has increased with outpatient visits growing from 46.5 million visits in 2002 to 95.2 million visits in 2015.<sup>18</sup>

Health care is primarily delivered through 21 regional networks known as Veterans Integrated Service Networks, or VISNs, nationwide. For Florida, two networks cover the state with one responsible for 60 counties in the northern, central, and southern regions of the state<sup>19</sup> and the other network covering the remaining seven counties in northwest Florida.<sup>20</sup>

### ***Veterans Choice Program***

Congress directed the VA through the Veterans Access, Choice, and Accountability Act of 2014 (VACCA)<sup>21</sup>, and specifically, the Veterans Choice Program (VCP), to furnish hospital care and medical services through alternative means when veterans could not access services in a timely manner. To be eligible, a veteran may optionally enroll if he or she faces an unacceptable burden in accessing a provider of more than 40 miles driving distance to the nearest VA medical facility and has been identified to have an appointment more than 30 days out from a preferred appointment date; faces other geographic challenges; encounters environmental challenges; or has a medical condition that impairs the veterans ability to travel.

When a veteran attempts to schedule an appointment at a VHA medical facility or meets the driving condition or one of the other special circumstances and cannot be seen within 30 days, the veteran is placed on the Veterans Choice List (VCL). Once the veteran is placed on this list, the veteran has the ability to opt into the program and receive care from the designated third party administrator (TPA) managed provider network.

The legislation also mandated other changes such as requiring the use of electronic waiting lists (ECLs), making such waiting lists accessible so veterans can make informed choices about whether to receive care at such facilities, requiring VCP cards be issued to certain veterans, requiring non-VA health care providers to have the same credentials as VA health care providers, requiring the establishment of performance metrics, setting appointment access standards, requiring a number of reports, and publishing wait times of VA facilities publicly.

The VCP was initially funded by Congress with \$10 billion. The legislation would sunset upon either the exhaustion of the funds or three years from the its enactment, whichever occurred

<sup>19</sup> VISN 8 is the Sunshine Healthcare Network and covers 60 Florida counties, 19 rural counties in South Georgia, and Puerto Rico and the U.S. Virgin Islands. VISN 8 includes seven outpatient clinics of which six are located in Florida and one is located in Puerto Rico. For more information on VISN 8, see <https://www.visn8.va.gov/VISN8/about/index.asp> (last visited Mar. 22, 2019).

<sup>20</sup> VISN 16 is the South Central VA Health Care Network and serve veterans in Arkansas, Louisiana, Mississippi, and parts of Texas, Missouri, Alabama, Oklahoma, and Florida. VISN 16 has eight Veterans Affairs Medical Centers (VAMC) of which none are located in Florida, one outpatient clinic in Texas, and 68 outpatient sites or Vet Centers of which six are located in Florida. For more information on VISN 16, see <https://www.visn16.va.gov/about/> (last visited Mar. 22, 2019).

<sup>21</sup> Pub. Law No. 113-146.

managed nationally by one of two TPA managed provider networks based on where the veteran is located.

### *The Veterans Choice Programs*

Collectively known as the Veterans Choice Programs (Choice), the VA provides veterans with options under the VCP, the PC3, and non-VA fee programs for pre-authorized medical care only. Millions of appointments had been provided under the programs and billions of dollars had been expended in health care funds with an additional \$235 million spent on administrative costs to the health care networks over a several year time span.<sup>28</sup>

The Inspector General (IG) of the DVA reported on contacts received by its office from October 1, 2015, through January 31, 2017, and noted they fell into four general complaint categories:

- 48 percent had concerns about appointments and scheduling;
- 35 percent had concerns about referrals, authorizations, or consults;
- 12 percent had concerns about veteran and provider payments; and
- 5 percent had concerns about program eligibility or enrollment.<sup>29</sup>

The IG reviewed appointment wait times, authorization practices, scheduling procedures, and timeliness of care of various offices and facilities. Several barriers to care were found, including 1.2 million appointments from November 1, 2014, through September 30, 2015 for veterans in the various VHA programs waiting over 30 days for care at VHA medical facilities.<sup>30</sup> In the October 2016 report, the IG published its review of the Phoenix, Arizona, VA Health System in which it had determined that more than 22,000 patients had 34,000 open consults. One patient waited in excess of 300 days for a consult.<sup>31</sup> The review of the Phoenix office included services delivered in both the traditional and non-traditional VA care settings.

In February 2016, another IG report looked at timely care in Colorado Springs. Out of 450 consults and appointments, 288 veterans in Colorado Springs encountered wait times in excess of 30 days. Of those 288 who had wait times in excess of 30 days, none of those 288 veterans were added to the VCL or were not added in a timely manner, which would make them eligible to receive services under that program.<sup>32</sup>

### ***Access to Care in Florida***

News reports and other OIG reports indicate that the VA struggled to implement the new Choice programs from November 1, 2014, through September 30, 2015, including the special OIG Choice Implementation report requested by Congress.<sup>33</sup> Within this audit, one Florida facility was included, the North Florida/South Georgia Veterans Health System. The audit noted the struggles of the VA to meet the expedited 90-day implementation timeline of the original 2014 legislation, inadequate provider networks once the program was implemented, third party liability concerns by veterans for non-payment of medical bills to providers, appointment wait times in excess of 30 days, and provider administrative burden issues.<sup>34</sup>

In its response to the audit report, the Secretary of the DVA noted that the Choice programs have changed dramatically since implementation and had seen a growth rate in authorizations from October 2015 to March 2016 of 103 percent.<sup>35</sup> The DVA requested authorization to consolidate all of the Community Care Programs into a singular authority tied to Medicare reimbursement for like services to address issues related to provider network adequacy and administrative burdens on both the DVA and the provider.<sup>36</sup>

### ***Alternative Treatment Options for Veterans***

Complementary and integrative health (CIH) consists of products and practices that are not currently part of mainstream, conventional medical practice. CIH emphasizes patient empowerment, self-activation, preventive self-care, and wellness, often in conjunction with traditional medical treatment or in other alternative treatment settings. These approaches may be considered complementary (i.e., used in place of or used along with standard medical care). Integrative medicine refers to care that blends both mainstream and alternative practices. The boundaries between CIH and conventional medicine are not absolute, although most CIH approaches fall into one of two subgroups: natural products (e.g., herbs, vitamins and minerals, and probiotics) and mind and body practices (e.g., yoga, meditation, massage therapy, acupuncture, and relaxation techniques).<sup>37</sup>

In the United States, CIH approaches have gained popularity in recent years, and, as a result, more research is focusing on how CIH may improve various patient outcomes. According to the National Center for Complementary and Integrative Health (NCCIH) of the National Institutes of Health, more than 30 percent of American adults and about 12 percent of children use health care approaches developed outside of mainstream conventional medicine.<sup>38</sup>

In the VA, complementary and integrative health (CIH) approaches are most commonly used to improve veterans' mental health, manage pain, and promote general wellness. More specifically, these approaches are often used to treat posttraumatic stress disorder (PTSD), depression, back

<sup>38</sup> Id

pain, headache, arthritis, fibromyalgia, and substance abuse. One of the greatest challenges in CIH is critically examining the effectiveness of approaches that have not been rigorously tested through formal research. VA researchers remain committed to addressing these scientific gaps. They are conducting studies to determine which approaches are truly safe and effective, and for which conditions and populations they work best.<sup>39</sup>

Through its Center for Compassionate Care Innovation (CCI)<sup>40</sup> and as part of its mission to better meet the needs of veterans on an ongoing basis, the VA provides a wide array of state-of-the-art treatments and evidence-based therapies, and is a leader in research and innovation. The VA is committed to providing the best health care available to veterans and is interested in learning about new treatment modalities used in the private sector that result in positive health outcomes. The CCI is a program within the Office of Community Engagement (OCE). The mission of CCI is to explore emerging therapies that are safe and ethical to enhance veteran physical and mental well-being when other treatments have not been successful. CCI focuses on the conditions that may be resistant to standard treatments, including: chronic pain, PTSD, suicidality, and traumatic brain injury (TBI).

Given that there may be numerous innovative treatment approaches for each of the above conditions, the CCI is tasked with prioritizing proposals that have a current or emerging evidence-base documenting their efficacy, are cleared by the federal Food and Drug Administration (FDA) for their intended purpose and are designed to offer sustained benefits to the target population. The CCI has a review process in order to identify proposals that are appropriate for implementation. Proposals shared with the CCI should be aligned with the CCI's mission, not already available within the VHA network, feasible to implement, and developed in accordance with the CCI's guidelines.<sup>41</sup>

To accomplish its mission, the CCI:

- Maintains integrity of the fundamental principle to “Do No Harm.”
- Evaluates emerging modalities, devices, and interventions that are safe and ethical in order to augment and support current the evidence-based program.
- Advocates for shared decision-making where veterans are active participants in choosing treatments, interventions, or therapies.
- Examines innovative proposals that may provide help and hope to veterans who have not responded to standard treatments.
- Collaborates with experts across health care disciplines to consider noteworthy, safe, and ethical emerging therapies that are not currently in widespread clinical use in VA.<sup>42</sup>

A sampling of alternative treatments being provided by the federal VA at present include things such as light emitting diode (LED) therapy for mild TBI, stellate ganglion block (SGB) for treatment of PTSD, various services delivered via telehealth, yoga and meditation, acupuncture,

the training and use of service dogs, equine therapy, music therapy, accelerated resolution therapy, and various outdoor therapies including horseback riding, hiking, and rafting.<sup>43,44</sup>

### **Florida Department of Veterans' Affairs**

In 1988, Florida citizens voted to create the Department of Veterans' Affairs (department or FDVA) by constitutional amendment.<sup>45</sup> The department is responsible for advocating on behalf of Florida's veterans to improve their quality of life and to facilitate access to federally funded medical care for eligible veterans.

The department also manages one assisted living facility and six state veterans' nursing homes with nursing homes seven and eight in construction stages in St. Lucie County and Orange County. To be eligible for admission to these state facilities, a veteran must have had an honorable discharge, be a state resident prior to admission, and have received a certification of need of assisted living or skilled nursing care as determined by a VA physician.

Other services are available to veterans in county services offices which may be co-located in VA Regional Offices in Bay Pines, each federal VA Medical Center and many of the federal VA Outpatient Clinics.

Currently, the FDVA offers primary care at each of the state veterans' nursing homes and at the domiciliary for the residents. At present, the department does not offer secondary, specialized, or alternative care.<sup>46</sup>

### **III. Effect of Proposed Changes:**

**Section 1** creates s. 295.156, F.S., to authorize the Florida Department of Veterans' Affairs (FDVA) to contract with specified individuals and entities to provide alternative treatment options for veterans who have been diagnosed with service-connected posttraumatic stress disorder or a traumatic brain injury by a health care practitioner.

The alternative treatment options specified in the bill are: accelerated resolution therapy, equine therapy, hyperbaric oxygen therapy, music therapy, and service animal training therapy.

Definitions are provided for 11 relevant terms used in the bill: accelerated resolution therapy, alternative treatment, equine therapy, facility, hyperbaric oxygen therapy, music therapy, physician, service animal training therapy, traumatic brain injury, and veteran.

The bill authorizes the FDVA, subject to a legislative appropriation, to contract with one or more individuals, not-for-profit corporations, state universities, hospitals, or Florida College System institutions for purposes of service provision.

---

<sup>43</sup> News Release, U.S. Department of Veterans Affairs, *VA Exploring Alternative Treatments for TBI and PTSD* (Dec. 7, 2017) available at <https://www.va.gov/opa/pressrel/pressrelease.cfm?id=3986> (last visited Mar. 26, 2019).

<sup>44</sup> Florida Department of Veterans' Affairs, *Senate Bill 1518 Analysis*, (Mar. 20, 2019) (on file with the Senate Committee on Health Policy).

<sup>45</sup> See FLA. CONST. art IV, s. 11.

<sup>46</sup> *Supra* note 44

The provision of the alternative treatment services must be under the direction and supervision of an individual licensed as: an allopathic physician under ch. 458, F.S., an osteopathic physician under ch. 459, F.S., a chiropractor under ch. 460, F.S., a psychologist under ch. 490, F.S., or a clinical social worker, marriage and family therapist, or a mental health counselor under ch. 491, F.S.

The FDVA is given rulemaking authority for purposes of implementing the bill.

**Section 2** specifies that the bill has an effective date of July 1, 2019.

**IV. Constitutional Issues:**

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

D. State Tax or Fee Increases:

None.

E. Other Constitutional Issues:

None.

**V. Fiscal Impact Statement:**

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

None.

C. Government Sector Impact:

SB 1518 provides that implementation is subject to an appropriation. As of this writing, SB 2500, the Senate's proposed General Appropriations Act for fiscal year 2019-2020, includes a \$50,000 nonrecurring appropriation from the General Revenue Fund to the University of South Florida for "Alternative Treatment for Veterans" under Specific Appropriation 575A.

In addition to funding for services, the FDVA also indicates the need for one full-time equivalent position to implement the bill.<sup>47</sup>

**VI. Technical Deficiencies:**

None.

**VII. Related Issues:**

None.

**VIII. Statutes Affected:**

This bill creates the following section of the Florida Statutes: 295.156

**IX. Additional Information:**

**A. Committee Substitute – Statement of Changes:**

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

None.

**B. Amendments:**

None.

---

This Senate Bill Analysis does not reflect the intent or official position of the bill's introducer or the Florida Senate.
