(8) A hospital may not be licensed or relicensed if:

Any transfer of beds, or other agreements that result in the establishment of a hospital or hospital services within the intent of this section, shall be subject to subsection (8). Unless the hospital is otherwise exempt under subsection (8), the agency shall deny or revoke the license of a hospital that violates any of the criteria set forth in that subsection.

(10) The agency may adopt rules implementing the licensure requirements set forth in subsection (8). Within 21 days after publication of the agency's decision, any authorized person may file a request for an administrative hearing. In administrative proceedings challenging the approval, denial, or revocation of a license pursuant to subsection (8), the hearing must be based on the
facts and law existing at the time of the agency's proposed agency action. Existing hospitals may initiate or intervene in an administrative hearing to approve, deny, or revoke licensure under subsection (8) based upon a showing that an established program will be substantially affected by the issuance or renewal of a license to a hospital within the same district or service area.

ensuring that:

(f) All hospitals submit such data as necessary to conduct certificate-of-need reviews required under part I of chapter 408. Such data shall include, but shall not be limited to, patient origin data, hospital utilization data, type of service reporting, and facility staffing data. The agency may not collect data that identifies or could disclose the identity of individual patients. The agency shall utilize existing uniform statewide data sources when available and shall minimize reporting costs to hospitals.

(9) The agency shall establish a technical advisory panel, pursuant to s. 20.052, to develop procedures and standards for measuring outcomes of pediatric cardiac catheterization programs and pediatric cardiovascular surgery programs.

(b) Voting members of the panel shall include: 3 at-large members, including 1 cardiologist who is board certified in caring for adults with congenital heart disease and 2 board-certified pediatric cardiologists, neither of whom may be employed by any of the hospitals specified in subparagraphs 1.-10. or their affiliates, each of whom is appointed by the Secretary of Health Care Administration, and 10 members, and an alternate for each member, each of whom is a pediatric cardiologist or a pediatric cardiovascular surgeon, each appointed by the chief executive officer of the following hospitals:
1. Johns Hopkins All Children's Hospital in St. Petersburg.
2. Arnold Palmer Hospital for Children in Orlando.
4. Nicklaus Children's Hospital in Miami.
5. St. Joseph's Children's Hospital in Tampa.
6. University of Florida Health Shands Hospital in Gainesville.
7. University of Miami Holtz Children's Hospital in Miami.
8. Wolfson Children's Hospital in Jacksonville.
9. Florida Hospital for Children in Orlando.
10. Nemours Children's Hospital in Orlando.

Appointments made under subparagraphs 1.-10. are contingent upon the hospital's maintenance of pediatric certificates of need and the hospital's compliance with this section and rules adopted thereunder, as determined by the Secretary of Health Care Administration. A member appointed under subparagraphs 1.-10. whose hospital fails to maintain such certificates or comply with such standards may serve only as a nonvoting member until the hospital restores such certificates or complies with such standards.

(12) Each provider of diagnostic cardiac catheterization services shall comply with rules adopted by the agency that establish licensure standards governing the operation of adult
inpatient diagnostic cardiac catheterization programs. The rules shall ensure that such programs:

(a) Comply with the most recent guidelines of the American College of Cardiology and American Heart Association Guidelines for Cardiac Catheterization and Cardiac Catheterization Laboratories.

(b) Perform only adult inpatient diagnostic cardiac catheterization services and will not provide therapeutic cardiac catheterization or any other cardiology services.

(c) Maintain sufficient appropriate equipment and health care personnel to ensure quality and safety.

(d) Maintain appropriate times of operation and protocols to ensure availability and appropriate referrals in the event of emergencies.

(e) Demonstrate a plan to provide services to Medicaid and charity care patients.

(13) Each provider of adult cardiovascular services or operator of a burn unit shall comply with rules adopted by the agency which establish licensure standards that govern the provision of adult cardiovascular services or the operation of a burn unit. Such rules shall consider, at a minimum, staffing, equipment, physical plant, operating protocols, the provision of services to Medicaid and charity care patients, accreditation, licensure period and fees, and enforcement of minimum standards.

(14) In establishing rules for adult cardiovascular...
services, the agency shall include provisions that allow for:

(a) Establishment of two hospital program licensure levels: a Level I program authorizing the performance of adult percutaneous cardiac intervention without onsite cardiac surgery and a Level II program authorizing the performance of percutaneous cardiac intervention with onsite cardiac surgery.

(b) 1. For a hospital seeking a Level I program, demonstration that, for the most recent 12-month period as reported to the agency, the hospital has provided a minimum of 300 adult inpatient and outpatient diagnostic cardiac catheterizations or, for the most recent 12-month period, has discharged or transferred at least 300 patients with the principal diagnosis of ischemic heart disease and that it has a formalized, written transfer agreement with a hospital that has a Level II program, including written transport protocols to ensure safe and efficient transfer of a patient within 60 minutes.

2. a. A hospital located more than 100 road miles from the closest Level II adult cardiovascular services program does not need to meet the diagnostic cardiac catheterization volume and ischemic heart disease diagnosis volume requirements in subparagraph 1. if the hospital demonstrates that it has, for the most recent 12-month period as reported to the agency, provided a minimum of 100 adult inpatient and outpatient diagnostic cardiac catheterizations or that, for the most recent
12-month period, it has discharged or transferred at least 300
patients with the principal diagnosis of ischemic heart disease.

b. A hospital located more than 100 road miles from the
closest Level II adult cardiovascular services program does not
need to meet the 60-minute transfer time protocol requirement in
subparagraph 1. if the hospital demonstrates that it has a
formalized, written transfer agreement with a hospital that has
a Level II program. The agreement must include written transport
protocols to ensure the safe and efficient transfer of a
patient, taking into consideration the patient's clinical and
physical characteristics, road and weather conditions, and
viability of ground and air ambulance service to transfer the
patient.

3. At a minimum, the rules for adult cardiovascular
services must require nursing and technical staff to have
demonstrated experience in handling acutely ill patients
requiring intervention, based on the staff member's previous
experience in dedicated cardiac interventional laboratories or
surgical centers. If a staff member's previous experience is in
a dedicated cardiac interventional laboratory at a hospital that
does not have an approved adult open heart surgery program, the
staff member's previous experience qualifies only if, at the
time the staff member acquired his or her experience, the
dedicated cardiac interventional laboratory:

a. Had an annual volume of 500 or more percutaneous
b. Achieved a demonstrated success rate of 95 percent or greater for percutaneous cardiac intervention procedures.

c. Experienced a complication rate of less than 5 percent for percutaneous cardiac intervention procedures.

d. Performed diverse cardiac procedures, including, but not limited to, balloon angioplasty and stenting, rotational atherectomy, cutting balloon atheroma remodeling, and procedures relating to left ventricular support capability.

(c) For a hospital seeking a Level II program, demonstration that, for the most recent 12-month period as reported to the agency, the hospital has performed a minimum of 1,100 adult inpatient and outpatient cardiac catheterizations, of which at least 400 must be therapeutic catheterizations, or, for the most recent 12-month period, has discharged at least 800 patients with the principal diagnosis of ischemic heart disease.

(d) Compliance with the most recent guidelines of the American College of Cardiology and American Heart Association guidelines for staffing, physician training and experience, operating procedures, equipment, physical plant, and patient selection criteria to ensure patient quality and safety.

(3) It is the intent of the Legislature that, in reviewing a certificate-of-need application to add beds to an existing nursing home facility, preference be given to the application of a licensee who has been awarded a Gold Seal as provided for in s. 400.235, if the applicant otherwise meets the review criteria specified in s. 408.035.

Section 16. Subsections (3), (4), and (5) of section 400.606, Florida Statutes, are amended to read:

Any contract entered into between a hospice and a health care facility or service provider must specify that the hospice retains the responsibility for planning, coordinating, and prescribing hospice care and services for the hospice patient and family. A hospice that contracts for any hospice service is prohibited from charging fees for services provided directly by the hospice care team that duplicate contractual services provided to the patient and family.

(2) With respect to contractual arrangements for inpatient hospice care:

(b) Hospices contracting for inpatient care beds shall not be required to obtain an additional certificate of need for the number of such designated beds. Such beds shall remain licensed to the health care facility and be subject to the appropriate inspections.

Section 20. Subsection (6) of section 408.806, Florida Statutes, is amended to read:

408.806 License application process.—

(6) The agency may not issue an initial license to a health care provider subject to the certificate-of-need provisions in part I of this chapter if the licensee has not been issued a certificate of need or certificate-of-need exemption, when applicable. Failure to apply for the renewal of a license prior to the expiration date renders the license void.

Section 21. Subsection (3) of section 408.808, Florida Statutes, is amended to read:

408.808 License categories.—

(3) INACTIVE LICENSE.—An inactive license may be issued to a hospital, a nursing home, an intermediate care facility for the developmentally disabled, or an ambulatory surgical center health care provider subject to the certificate-of-need provisions in part I of this chapter when the provider is
currently licensed, does not have a provisional license, and
will be temporarily unable to provide services due to
construction or renovation but is reasonably expected to resume
services within 12 months. Before an inactive license is issued,
the licensee must have construction or renovation plans approved
by the agency. Such designation may be made for a period not to
exceed 12 months but may be renewed by the agency for up to 12
additional months upon demonstration by the licensee of the
provider's progress toward reopening. However, if after 20
months in an inactive license status, a statutory rural
hospital, as defined in s. 395.602, has demonstrated progress
toward reopening, but may not be able to reopen prior to the
inactive license expiration date, the inactive designation may
be renewed again by the agency for up to 12 additional months.
For purposes of such a second renewal, if construction or
renovation is required, the licensee must have had plans
approved by the agency and construction must have already
commenced pursuant to s. 408.032(4); however, if
construction or renovation is not required, the licensee must
provide proof of having made an enforceable capital expenditure
greater than 25 percent of the total costs associated with the
construction or renovation hiring of staff and the purchase of
equipment and supplies needed to operate the facility upon
opening. A request by a licensee for an inactive license or to
extend the previously approved inactive period must be submitted
to the agency and must include a written justification for the
inactive license with the beginning and ending dates of
inactivity specified, a plan for the transfer of any clients to
other providers, and the appropriate licensure fees. The agency
may not accept a request that is submitted after initiating
closure, after any suspension of service, or after notifying
clients of closure or suspension of service, unless the action
is a result of a disaster at the licensed premises. For the
purposes of this section, the term "disaster" means a sudden
emergency occurrence beyond the control of the licensee, whether
natural, technological, or manmade, which renders the provider
inoperable at the premises. Upon agency approval, the provider
shall notify clients of any necessary discharge or transfer as
required by authorizing statutes or applicable rules. The
beginning of the inactive license period is the date the
provider ceases operations. The end of the inactive license
period shall become the license expiration date. All licensure
fees must be current, must be paid in full, and may be prorated.
Reactivation of an inactive license requires the approval of a
renewal application, including payment of licensure fees and
agency inspections indicating compliance with all requirements
of this part, authorizing statutes, and applicable rules.

Section 22. Subsection (10) of section 408.810, Florida
Statutes, is amended to read:

408.810 Minimum licensure requirements.—In addition to the
licensure requirements specified in this part, authorizing
statutes, and applicable rules, each applicant and licensee must
comply with the requirements of this section in order to obtain
and maintain a license.

(10) The agency may not issue a license to a health care
provider subject to the certificate-of-need provisions in part I
of this chapter if the health care provider has not been issued
a certificate of need or an exemption. Upon initial licensure of
any such provider, the authorization contained in the
certificate of need shall be considered fully implemented and
merged into the license and shall have no force and effect upon
termination of the license for any reason.

to read:
