

The Florida Senate
BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Appropriations Subcommittee on Transportation, Tourism, and Economic Development

BILL: SB 7020

INTRODUCER: Infrastructure and Security Committee

SUBJECT: Emergency Staging Areas

DATE: January 28, 2020

REVISED: _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
	<u>Price</u>	<u>Miller</u>		IS Submitted as Committee Bill
1.	<u>McAuliffe</u>	<u>Hrdlicka</u>	<u>ATD</u>	Recommended: Favorable
2.	<u> </u>	<u> </u>	<u>AP</u>	

I. Summary:

SB 7020 authorizes the Florida Department of Transportation (FDOT) to plan, design, and construct staging areas for emergency response on the turnpike system. These areas are for the staging of emergency supplies, equipment, and personnel to facilitate the prompt provision of emergency assistance to the public in response to a declared state of emergency.

The bill directs the FDOT, in consultation with the Division of Emergency Management (DEM), to consider certain factors when selecting a proposed site, and the FDOT is authorized to acquire property necessary for such staging areas. The bill requires the FDOT to give priority consideration to placement of such staging areas in counties with a population of 200,000 or less in which a multi-use corridor of regional significance is located.

The bill grants the FDOT power to authorize other uses of a staging area and requires that staging-area projects be included in the FDOT's work program.

The fiscal impact of this bill is indeterminate. The FDOT must first exercise the authority granted in this bill and select a site or sites, in consultation with DEM, and estimate the costs to plan, design, and construct the staging areas. These costs are unknown at this time. Increased availability of staging areas along the turnpike system may offset future costs.

The bill takes effect July 1, 2020.

II. Present Situation:

Emergency Declaration and Staging Areas

Chapter 252, F.S., confers certain emergency powers upon the Governor, the DEM, and the governing bodies of each political subdivision of the state when an emergency or disaster occurs

in Florida.¹ Section 252.36(2), F.S., authorizes the Governor to declare a state of emergency by executive order or proclamation if the Governor finds an emergency or the threat of an emergency has occurred or is about to occur.² The Governor's order or proclamation, among other items:

- Activates the emergency mitigation, response, and recovery aspects of the applicable state, local, and inter-jurisdictional emergency management plans, and
- Activates plans and resources to carry out the distribution of any supplies, equipment, and materials, and facilities relating to emergencies.

Section 252.359, F.S., charges DEM with establishing “a statewide system to facilitate the transportation and distribution of essentials in commerce”...“to meet the needs of residents affected during a declared emergency and to ensure continuing economic resilience of communities impacted by disaster.”³ Similarly, among other related authority, political subdivisions are authorized to obtain and distribute equipment, materials, and supplies for emergency management purposes.⁴

Generally, when the Governor declares a state of emergency, the acquisition of property for staging area purposes involves similar processes at both the state and local level – identification of a potential site and execution of an agreement for use of the site. For example, DEM logistics personnel work with regional coordination teams and other DEM field staff to identify potential staging area sites suitable for the expected emergency. For purposes of executing a memorandum of agreement (MOU), the DEM requires the site location and owner, a point of contact, the square footage of the site, and photos or maps of the site. Locations are finalized after a site visit with the site owner to verify the site's feasibility for use. If agreement is reached, an MOU is executed. The acquired sites are mobilized to ensure resources are logged, prepared, and readied for redeployment to an impacted area.⁵

Pre-designated sites are also used for staging. For example, the FDOT allows utility providers and first responders to use commercial motor vehicle weigh stations as staging areas, most of which are along I-75. The FDOT also uses its maintenance yards and operations centers to stage FDOT crews and contracted crews.^{6, 7}

¹ Section 252.32(1)(b), F.S.

² The law provides that the state of emergency continues until the Governor finds the emergency conditions no longer exist and terminates the state of emergency. However, a state of emergency may not exist for more than 60 days unless the Governor renews it. The Legislature may terminate a state of emergency at any time by concurrent resolution.

³ Section 252.359, F.S., defines the term, “essentials,” to mean goods that are consumed or used as a direct result of a declared emergency, or that are consumed or used to preserve, protect, or sustain life, health, safety, or economic well-being.

⁴ Section 252.38(3), F.S.

⁶ See the FDOT email to Senate Infrastructure and Security Committee staff November 18, 2019 (copy on file in the Senate Infrastructure and Security Committee).

⁷ For a map of the FDOT's maintenance yards and operations centers, see FDOT, *Transportation Organizational Partners Map*, select Legend icon, bottom left, available at <https://fdot.maps.arcgis.com/apps/webappviewer/index.html?id=659db618c58d4a279bc95386ab20fe30> (last visited January 10, 2020).

At the local level, both pre-designated sites and sites identified in anticipation of need may be used. For example, Leon County Emergency Management staff advise that both the county and the City of Tallahassee have regularly used public property (such as the fairgrounds and the airport), as well as private property for staging areas.⁸

Florida's Turnpike

The Florida Turnpike Enterprise (FTE) within the FDOT is empowered to plan, construct, maintain, repair, and operate the Florida Turnpike System. The term, “turnpike system,” is defined to mean “those limited access toll highways and associated feeder roads and other structures, appurtenances, or rights previously designated, acquired, or constructed pursuant to the Florida Turnpike Enterprise Law and such other additional turnpike projects as may be acquired or constructed as approved by the Legislature.”⁹ The turnpike system currently includes the mainline from Miami to Central Florida, as well as the Homestead Extension, Sawgrass Expressway, Seminole Expressway, Beachline Expressway, Southern Connector Extension, Veterans Expressway, Suncoast Parkway, Polk Parkway, Western Beltway, and the I-4 Connector.¹⁰

In addition, any future multi-use corridor of regional significance (M-CORES corridor) constructed as authorized under s. 338.2278, F.S., will be part of the turnpike system. Enacted during the 2019 Regular Session, M-CORES is a program designed to advance construction of regional corridors that will accommodate multiple modes of transportation and multiple types of infrastructure. The specific purpose of the program is to revitalize rural communities, encourage job creation in those communities, and provide regional connectivity while leveraging technology, enhancing quality of life and public safety, and protecting the environment and natural resources. The following three corridors comprise the M-CORES Program:

- Southwest-Central Florida Connector (Collier County to Polk County);
- Suncoast Connector (Citrus County to Jefferson County); and
- Northern Turnpike Connector (northern terminus of the Florida Turnpike northwest to the Suncoast Parkway).¹¹

FDOT Acquisition of Property

Section 338.04, F.S., grants the FDOT's FTE (and others, collectively called “authorities”) authorization to acquire private or public property and property rights for limited access facilities and service roads in the same manner as they are authorized to acquire property or property rights for highways. That process involves negotiated sales or, failing successful negotiation, the power of eminent domain granted to the FDOT under s. 337.27, F.S.

¹¹ For additional detailed M-CORES information, see the FDOT M-CORES site, available at <https://floridamcores.com/#home> (last visited January 10, 2020).

Eminent domain is the constitutional power of the government to take private property for public use. Chapters 73 and 74, F.S., provide for eminent domain and proceedings supplemental to eminent domain, respectively. Chapter 73, F.S., specifies the pre-suit negotiation requirements, the petition filing requirements, the service of process and publication requirements, the pretrial process, jury trial process, and post-trial process. Chapter 74, F.S., sets out the supplemental proceedings to eminent domain, including provisions allowing a governmental entity to take possession and title of property in advance of entry of final judgment by depositing with the court an amount no less than the governmental entity's good faith estimate of the value of the property being sought.

Before an eminent domain proceeding can be filed, the FDOT must attempt to negotiate in good faith with the fee owner of the property to be acquired and attempt to reach an agreement regarding the amount of compensation to be paid for the owner's property.¹² The condemning authority must meet additional requirements, such as providing the owner with a written offer, notifying the owner of statutory rights to receive fees and costs,¹³ and notifying business owners of all of their rights.¹⁴ Once a petition for eminent domain is filed, both the FDOT and the owner must make offers of judgment; *i.e.*, an offer to have judgment entered for payment of compensation for amounts specified in the offers.

In accordance with s. 73.071, F.S., eminent domain trials for valuation of property are argued before a twelve-person jury. The amount of compensation is determined as of the date of trial, or the date upon which title passes, whichever occurs first. The jury determines solely the amount of compensation to be paid. Generally, whether the parties settle prior to or after a petition is filed, the landowners and business owners are entitled to attorney fees¹⁵ and reasonable costs incurred, including appraisal fees and accountant fees.¹⁶

The Florida Transportation Code

The Florida Transportation Code (code)¹⁷ includes all Florida Statutes governing the duties and responsibilities for the FDOT. The code authorizes FDOT to provide space to facilitate the conduct of research and demonstration projects relative to innovative transportation technologies¹⁸ or serve as staging areas for the FDOT's construction and maintenance contractors.¹⁹ The sites may provide additional or overflow parking for both commercial motor vehicles and other vehicular traffic²⁰ or serve other functions, such as making fuel or food services available to travelers.²¹

III. Effect of Proposed Changes:

The bill authorizes the FDOT to plan, design, and construct staging areas for emergency response as part of the turnpike system. The sites are intended to be designated areas for the staging of emergency supplies, equipment, and personnel to facilitate the prompt provision of emergency assistance to the public in response to a declared state of emergency. The bill provides that emergency supplies, such as water, fuel, generators, vehicles, equipment, and other related materials, staged at key geographic points will aide in emergency response and assistance, including evacuations, deployment of emergency-related supplies and personnel, and restoration of essential services.

In selecting a proposed site, the bill directs the FDOT, in consultation with the DEM, to consider the extent to which a proposed site for a staging area:

- Is located in a geographic area that best facilitates wide dissemination of emergency-related supplies and equipment;
- Provides ease of access to major highways and other transportation facilities;
- Is sufficiently large to accommodate staging of a significant amount of emergency-related supplies and equipment;
- Provides space in support of emergency preparedness and evacuation activities, such as fuel reserve capacity;
- Could be used during non-emergency periods for commercial motor vehicle parking or other uses; and
- Is consistent with other state and local emergency management considerations.

The FDOT must give priority consideration to placement of emergency staging areas in counties with a population of 200,000 or less in which an M-CORES corridor is located.²²

The bill authorizes the FDOT to acquire property and property rights necessary for such staging areas as provided in s. 338.04, F.S., through negotiated sales or the eminent domain process. The FDOT is also granted the power to authorize other uses of a staging area, as provided in the Florida Transportation Code, including, but not limited to, commercial motor vehicle parking to comply with federal hours of service off-duty and sleeper berth requirements and for other vehicular parking to provide rest for drivers.

Lastly, the bill requires that staging area projects be included in the FDOT's work program.²³

The increased availability of staging areas may elevate the efficiency of response to emergencies in this state, thereby facilitating faster recovery from such emergencies for both the public and private sectors, including, but not limited to, quicker resumption of market activity, such as tourism. Authorization for other appropriate uses of the proposed staging areas during non-emergency periods may result in other economic efficiencies.

²² The county population is as determined by the most recent official state estimate pursuant to s. 186.901, F.S.

²³ The FDOT's work program is developed pursuant to s. 339.175, F.S. FDOT is responsible for developing a five-year plan of transportation projects in partnership with other entities such as communities, metropolitan planning organizations, local governments, other state and federal agencies, modal partners, and regional entities.

The bill takes effect July 1, 2020.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

D. State Tax or Fee Increases:

None.

E. Other Constitutional Issues:

None.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

Increased availability of staging areas on the turnpike system may provide the general public with earlier provision of essential emergency supplies during emergencies and may provide additional benefits, such as increased availability of parking on the turnpike system, during non-emergency periods. The business community may experience a positive impact in that more efficient emergency response may allow for a faster return to normal market activity. The FDOT's maintenance and construction contractors may benefit from increased availability of staging areas during non-emergency periods.

C. Government Sector Impact:

The fiscal impact of this bill is indeterminate. The FDOT must first exercise the authority granted in this bill and select a site or sites, in consultation with DEM, and estimate the costs to plan, design, and construct the staging areas. These costs are unknown at this time. However, having such staging areas in place may reduce costs associated with providing necessary staging areas for emergency response purposes, for both state and local governments, and may reduce costs incurred by the FDOT for the provision of other uses authorized by the bill during non-emergency periods of time.

VI. Technical Deficiencies:

None.

VII. Related Issues:

None.

VIII. Statutes Affected:

This bill creates section 338.236 of the Florida Statutes.

IX. Additional Information:

A. Committee Substitute – Statement of Changes:

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

None.

B. Amendments:

None.
