The bill makes numerous changes to programs and health care professions regulated under the Department of Health. The bill:

- Establishes reporting requirements for certain Child Protection Team medical directors;
- Authorizes DOH to establish patient care networks to plan for the care of individuals with the human immunodeficiency virus (HIV), rather than only those diagnosed with acquired immune deficiency syndrome (AIDS);
- Authorizes DOH to adopt rules to implement the Conrad 30 Waiver program;
- Extends the time for certain cancer centers to pursue a National Cancer Institute designation;
- Revises DOH’s rulemaking authority relating to the minimum standards for ground ambulances;
- Establishes requirements for maintaining and operating radiation machines and the use of radiation machines on humans;
- Authorizes DOH to request a date of birth on a licensure application;
- Authorizes DOH to issue a temporary license that expires 60 days after issuance, rather than 30 days, to certain applicants who have not yet been issued a social security number;
- Repeals a requirement that DOH discipline a healthcare practitioner’s license for failing to repay a student loan;
- Authorizes DOH to issue medical faculty certificates to certain full-time faculty members of Nova Southeastern University and Lake Erie College of Osteopathic Medicine;
- Repeals a requirement that the Board of Medicine triennially review board certification organizations for dermatology;
- Revises the requirements for osteopathic internships and residencies to include those accredited by the Accreditation Council for Graduate Medical Education;
- Repeals a requirement that a Florida-licensed dental practitioners grade the dental licensure examinations;
- Requires dentists and dental hygienists to report adverse incidents to the Board of Dentistry;
- Requires DOH to biennially inspect dental laboratories;
- Repeals the voluntary registration of registered chiropractic assistants;
- Requires an athletic trainer to work within his or her scope of practice and revises licensure requirements;
- Limits massage therapy apprenticeships to those in colonic irrigations, and requires licensure applicants to pass a national licensure examination designated by the Board of Massage Therapy;
- Revises psychology licensure requirements;
- Authorizes the Board of Clinical Social Work, Marriage and Family Therapists, and Mental Health Counseling to approve a one-time exception to the 60-month limit on an internship registration;
- Revises the licensure requirements for Marriage and Family Therapists and Licensed Mental Health Counselors;
- Extends the sunset date for Florida Center for Nursing annual reports on nursing education to January 30, 2025;
- Revives and reenacts health access dental licenses and makes the reenactments retroactive to January 1, 2020; and
- Deletes obsolete language and makes technical and conforming changes.

The bill has an insignificant, positive fiscal impact and an insignificant, negative fiscal impact on the DOH, which current resources are adequate to absorb. The bill has no fiscal impact on local governments.

The bill provides an effective date of July 1, 2020.
I. SUBSTANTIVE ANALYSIS

A. EFFECT OF PROPOSED CHANGES:

Child Protection Teams

Current Situation

A child protection team (CPT) is a medically directed, multidisciplinary team that supplements child protective investigation efforts in cases of child abuse and neglect.¹ CPTs are independent community-based programs contracted by the Department of Health (DOH) Children’s Medical Services that provide expertise in evaluating alleged child abuse or neglect, assess risk and protective factors, and provide recommendations for interventions to protect children and enhance a caregiver’s capacity to provide a safer environment when possible.² The state is divided into 15 circuits and DOH assigns a CPT to each. CPTs serve all 67 counties by utilizing satellite offices and telemedicine services.³ Each of the 15 circuits served by CPTs are supervised by one or multiple CPT directors, depending on the size and subdivision of the particular circuit.⁴

DCF must refer certain reports of child abuse, abandonment, or neglect to CPTs for assessment and other appropriate available support services:

- Injuries to the head, bruises to the neck, or head, burns or fractures in a child of any age;
- Bruises anywhere on a child 5 years of age or under;
- Any report alleging sexual abuse of a child;
- Any sexually transmitted disease in a prepubescent child;
- Reported malnutrition of a child and failure of a child to thrive;
- Reported medical neglect of a child;
- A sibling or other child remaining in a home where one or more children have been pronounced dead on arrival or have been injured and later died as a result of suspected abuse, abandonment, or neglect;
- Symptoms of serious emotional problems in a child when emotional or other abuse, abandonment, or neglect is suspected; and
- A child who does not live in this state who is currently being evaluated in a medical facility in this state.⁵

When a child protective investigator accepts a referral from DCF or law enforcement, CPTs may provide one or more of the following services:

- Medical diagnosis and evaluation;
- Telephone consultation services during emergencies and other situations;
- Psychological and psychiatric evaluations;
- Expert court testimony;
- Multidisciplinary staffings; and
- Specialized forensic interviews.

² Id.
³ Id.
⁴ Id.
⁵ Section 39.303(4), F.S.

STORAGE NAME: h0713e.HHS
DATE: 2/13/2020
CPT staff also train child protective investigators, community providers of child welfare services, and emergency room staff and other medical providers in the community to enable them to develop and maintain their professional skills and abilities in handling child abuse, abandonment, and neglect cases.6

**CPT Medical Directors**

The Statewide Medical Director for Child Protection must be a board-certified pediatrician licensed to practice allopathic or osteopathic medicine in this state who holds a subspecialty certification in child abuse from the American Bard of Pediatrics.7 The State Surgeon General and the Deputy Secretary for Children’s Medical Services, in consultation with the Statewide Medical Director for Child Protection and the Secretary of the Department of Children and Families, are responsible for screening and employment of the circuit CPT medical directors.8

Each circuit CPT medical director must be a board-certified pediatrician or family medicine practitioner.9 A CPT medical director must obtain a subspecialty certification in child abuse from the American Board of Pediatrics or meet the requirements established by a third party credentialing agency for demonstrating specialized competence in child abuse pediatrics. The CPT medical directors are responsible for oversight of the CPTs in the circuits.10

The statute does not define the reporting structure for the Statewide Medical Director for Child Protection or the circuit CPT medical directors.

**Effect of Proposed Changes – Child Protection Teams**

The bill establishes that the Statewide Medical Director for Child Protection is to report directly to the Deputy Secretary for Children’s Medical Services and the CPT medical directors are to report directly to the Statewide Medical Director for Child Protection.

**HIV/AIDS**

**Current Situation**

Human Immunodeficiency Virus (HIV) is an immune system debilitating virus that can lead to fatal acquired immunodeficiency syndrome (AIDS). HIV affects specific cells of the immune system and over time the virus can destroy enough of these cells that the body can no longer fight off infection and disease.11 HIV is transmitted by sexual contact, sharing needles to inject drugs, and by a mother to her baby during pregnancy, birth, or breastfeeding.12 There is no cure for HIV but it can be controlled with proper medical care, including antiretroviral therapy (ART). If taken properly, ART can dramatically prolong the lives of people infected with HIV, keep them healthy, and greatly lower the chance of infecting others.13 However, untreated HIV is almost always fatal.14

There are three stages of HIV infection through which an infected person typically progresses:15

- Stage 1: Acute HIV infection. Within two to four weeks after infection with HIV, an individual may experience a flu-like illness.
- Stage 2: Clinical latency. HIV is still active but reproduces at a very low level. Those who are taking ART may remain at this stage for several decades.

---

6 Section 39.303(3)(h), F.S.
7 Section 39.303(2)(a), F.S.

9 Section 39.303(2)(b), F.S.
10 Id.
12 Id.
13 Id.
14 Id.
15 Id.
• Stage 3: AIDS. This is the most severe phase of HIV infection. Opportunistic infections or cancers take advantage of a very weak immune system and signal that the person has AIDS. Without treatment, a person with AIDS typically survives about three years.

AIDS and HIV in Florida

The Department of Health (DOH) has identified the reduction in the transmission of HIV as one of its priority goals. It has adopted a comprehensive plan to prevent HIV transmission and strengthen patient care activities to reduce the risk of further transmission of HIV from those diagnosed and living with HIV. The plan includes:16

• Implementing routine HIV and sexually transmitted infections (STIs) screening in health care settings and priority testing in non-health care settings;
• Providing rapid access to treatment and ensuring retention in care;
• Improving and promoting access to antiretroviral pre-exposure prophylaxis and non-occupational post-exposure prophylaxis; and
• Increasing HIV awareness and community response through outreach, engagement, and messaging.

There has been an overall decrease in the number of newly diagnosed cases of HIV infection in the last 10 years. However, in the last five years, the number of newly diagnosed cases has increased.

![HIV Diagnoses by Year of Diagnosis, 2009–2018, Florida](image)

Approximately, 1,918 individuals in Florida have AIDS.17 This number has steadily declined in the last 20 years, with 4,646 AIDS cases in the state in 1999.18 With advances in the treatment of HIV with ART, the number of individuals living with HIV has increased. In 2018, there were 119,661 individuals living with HIV in this state.19 In the U.S., approximately 15 percent of individuals who have HIV are unaware that they are infected.20 DOH estimated in 2017, that more than 18,000 Floridians were unaware of their HIV infection.21

Patient Care Networks

Current law authorizes DOH to establish patient care networks for individuals with AIDS in those areas of the state where the number of cases of AIDS and other HIV infections justifies the establishment of such

18 Id.
networks. The patient care networks must plan for the care and treatment of individuals with AIDS and AIDS-related conditions in a cost-effective and dignified manner, which emphasizes outpatient and home care. In establishing the networks, DOH must take into account the natural trade areas and centers of medical excellence in treating AIDS, as well as federal, state, and other funds. The patient care networks have been established in the following geographic areas:

- South Florida, consisting of Dade and Monroe counties;
- Palm Beach County;
- East central Florida, consisting of Orange, Osceola, Seminole, and Brevard counties;
- West central Florida, consisting of Hillsborough, Polk, Pinellas, and Pasco counties; and

Each network must annually make recommendations regarding patient care needs to DOH.

**Effect of Proposed Changes – HIV/AIDS**

The bill expands DOH's authority to establish patient care centers for individuals who carry HIV rather than limiting patient care centers to those who have been diagnosed with AIDS. The inclusion of HIV providers into the network has a planning focus, not a service delivery focus. That planning, with this change, is more inclusive of persons living with HIV.

**Conrad 30 Waiver Program**

**Current Situation**

Federal law requires a foreign physician pursuing graduate medical education or training in the United States to obtain a J-1 visa. A holder of a J-1 visa is ineligible to apply for an immigrant visa, permanent residence, or certain nonimmigrant statuses unless he or she has resided and been physically present in his or her country of nationality for at least two years after completion of the J-1 visa program. However, the Conrad 30 Waiver program allows such foreign physicians to apply for a waiver of the two-year residency requirement upon the completion of the J-1 visa program. To be eligible for a Conrad 30 Waiver, the foreign physician must:

- Obtain a contract for full-time employment at a health care facility in an area dedicated as a Health Professional Shortage Area, Medically Underserved Area, or Medically Underserved Population;
- Obtain a "no objection" letter from his or her home country if the home government funded his or her exchange program; and
- Agree to begin employment at the health care facility within 90 days of receipt of the waiver, no later than the date his or her J-1 visa expires.

A state may only sponsor 30 physicians for waivers per year and each state may develop its own application rules and guidelines. DOH does not currently have statutory authority to develop rules and guidelines for its Conrad 30 program.

---

22 Section 381.0042, F.S.
23 Id.
24 Rule 64D-2.001, F.A.C.
25 Supra note 22.
26 Email correspondence with Ty Gentle, Office of Budget and Revenue Management, Department of Health, dated Jan. 21, 2020, on file with the Health Care Appropriations Subcommittee.
28 Id.
Florida has sponsored 30 physicians each year for each of the last 10 years under the program. More than 70 percent, or nearly 450 physicians, have remained in practice in Florida since the inception of the Conrad 30 Waiver Program. Currently, Florida approves these waivers on a first-come basis.

Effect of Proposed Changes – Conrad 30 Program

The bill authorizes DOH to adopt rules to implement the Conrad 30 Waiver program in this state. This allows DOH to set guidelines in addition to those required by federal law. The bill also directs DOH to develop strategies to maximize federal and state resources to recruit physicians to practice in medically underserved and rural areas in the state.

Florida Consortium of National Cancer Center Institute Programs

Current Situation

The National Cancer Institute (NCI) is the federal government's principal agency for cancer research and training. NCI leads the National Cancer Program, which is the largest funder of cancer research in the world. NCI designates cancer centers as either comprehensive cancer centers or cancer centers. Comprehensive cancer centers must demonstrate significant research activities in each of three major scientific areas: laboratory-based research, population-based research, and clinical research, and which have substantial multidisciplinary research efforts. Cancer centers are primarily focused in one or more of the above-listed three scientific areas.

In 2014, the Legislature established the Florida Consortium of National Cancer Institute Centers Program (Program) to enhance the quality and competitiveness of cancer care in Florida, further a statewide biomedical research strategy directly responsive to the health needs of Florida's citizens, and capitalize on the potential educational opportunities available to students. Under the program, DOH makes quarterly distributions to Florida-based cancer centers that are NCI-designated cancer centers or comprehensive cancer centers, as well as cancer centers working toward achieving designation.

DOH calculates allocations on tier-allocated weights for distributing funds to participating cancer centers. The tier-allocated weights are based on the NCI status:

- Tier 1: NCI-designated comprehensive cancer centers.
- Tier 2: NCI-designated cancer centers.
- Tier 3: Cancer centers seeking designation as either an NCI-designated cancer center or NCI-designated comprehensive cancer center.

Three cancer centers participate in the Program:

- Moffitt Cancer Center, which is an NCI-designated a comprehensive cancer center;

---

30 Id.

32 Id.

34 Section 381.915, F.S.

35 Id. Such distributions are subject to an appropriation by the Legislature.

37 Section 381.915(4), F.S.

38 National Cancer Center Institute, Find a Cancer Center, available at: https://www.cancer.gov/research/nci-role/cancer-centers/find#Florida (last visited February 13, 2020).

• Sylvester Comprehensive Cancer Center at the University of Miami, which is an NCI-designated a cancer center; and
• The University of Florida Health Cancer Center, which is pursuing an NCI-designation.

To be eligible to continue receiving funding under the Program with Tier 3 designation, a cancer center seeking NCI-designation must:

• Conduct cancer-related basic scientific research and cancer-related population scientific research;
• Offer and provide the full range of diagnostic and treatment services on site, as determined by the Commission on Cancer of the American College of Surgeons;
• Host or conduct cancer-related interventional clinical trials that are registered with the NCI’s Clinical Trials Reporting Program;
• Offer degree-granting programs or affiliate with universities through degree-granting programs accredited or approved by a nationally recognized agency and offered through the center or through the center in conjunction with another institution accredited by the Commission on Colleges of the Southern Association of Colleges and Schools;
• Provide training to clinical trainees, medical trainees accredited by the Accreditation Council for Graduate Medical Education or the American Osteopathic Association, and postdoctoral fellows recently awarded a doctorate degree; and
• Have more than $5 million in annual direct costs associated with their total NCI peer-reviewed grant funding.

A cancer center’s participation as a Tier 3 cancer center is limited to 6 years. A cancer center that qualified as a designated Tier 3 cancer center before July 1, 2014, must obtain a designation as a cancer center or a comprehensive cancer center by June 30, 2020. The Legislature previously extended this deadline in 2018, from 5 years to 6 years.

The General Appropriations Act or accompanying legislation may limit the number of cancer centers that receive Tier 3 designations or provide additional criteria for such designation.

Effect of Proposed Changes – Florida Consortium of National Cancer Institute Programs

The bill increases the period of time a cancer center may participate in the Tier 3 designation of the Program from 6 years to 10 years, by establishing a deadline of June 30, 2024. The bill also increases the period of time a cancer center that qualifies as a Tier 3 center may pursue NCI designation from 6 years to 10 years, by establishing a deadline of June 30, 2024. This will provide University of Florida Health Cancer Center, which is the only Tier 3 center, four additional years to qualify for NCI designation, for a total of 10 years.

Emergency Medical Transportation Services

Current Situation

The Legislature recognized the need for the uniform and systematic provision of emergency medical services to save lives and reduce disability associated with illness and injury. In 1973, the Florida Legislature passed and enacted what is known today as the Raymond H. Alexander, M.D., Emergency Medical Transportation Services Act (Act). The Act establishes the licensing and operational requirements for emergency medical services.

39 Section 381.915(4)(c), F.S.
40 Section 381.915(4)(c)3., F.S.
41 Section 381.915(4)(c)4., F.S.
42 Chapter 2018-24, Laws of Fla.
43 Section 381.915(4)(c)2., F.S.
44 Section 401.211, F.S.
The Act creates the Emergency Medical Services Advisory Council (Council)\(^{46}\) to act as an advisory body to the emergency medical services within DOH.\(^{47}\) The Council’s duties include, among other things:\(^{48}\)

- Identifying and making recommendations to the DOH regarding the appropriateness of suggested changes to statutes and administrative rules;
- Acting as a clearinghouse for information specific to changes in the provision of medical services and trauma care;
- Providing technical support to the DOH in the areas of emergency medical services and trauma systems design, required medical and rescue equipment, required drugs and dosages, medical treatment protocols and emergency medical services personnel education and training requirements;
- Providing a forum for discussing significant issues facing the emergency medical services and trauma care communities;
- Assisting the DOH in setting program priorities; and
- Providing feedback to the DOH on the administration and performance of the emergency medical services program.

**Licensure**

Current law requires providers of basic or advanced life support transportation services to be licensed by the DOH in their respective fields.\(^{49}\) Basic life support (BLS) service refers to any emergency medical service that uses only basic life support techniques.\(^{50}\) BLS includes basic non-invasive interventions to reduce morbidity and mortality associated with out-of-hospital medical and traumatic emergencies.\(^{51}\) The services provided may include stabilization and maintenance of airway and breathing, pharmacological interventions, trauma care, and transportation to an appropriate medical facility.\(^{52}\)

Advanced life support (ALS) service refers to any emergency medical or non-transport service that uses advanced life support techniques.\(^{53}\) ALS includes the assessment or treatment of a person by a qualified individual, such as a paramedic, who is trained in the use of techniques such as the administration of drugs or intravenous fluid, endotracheal intubation, telemetry, cardiac monitoring, and cardiac defibrillation.\(^{54}\)

To be licensed as a BLS or ALS service, an applicant must comply with the following requirements:

- The ambulances, equipment, vehicles, personnel, communications systems, staffing patterns, and services of the applicant meet the statutory requirement and administrative rules for either a BLS service or an ALS service, whichever is applicable;
- Have adequate insurance coverage or certificate of self-insurance for claims arising out of injury to or death of persons and damage to the property of others resulting from any cause for which the owner of such business or service would be liable; and
- A Certificate of Public Convenience and Necessity from each county in which the applicant will operate.\(^{55}\)

---

\(^{46}\) Section 401.245(2), F.S. The Council consists of 15 members appointed by the State Surgeon General, except that state agency representatives are appointed by the respective agency heads. Members are typically appointed for four year terms, with the chair being designated by the State Surgeon General and Secretary of Health. Additional members include six ex officio representatives appointed by various other state agency heads.

\(^{47}\) Section 401.245(1), F.S.

\(^{48}\) Id.

\(^{49}\) Section 401.25(1), F.S.

\(^{50}\) Section 401.23(8), F.S.

\(^{52}\) Id.

\(^{53}\) Section 401.23(2), F.S.

\(^{54}\) Section 401.23(1), F.S.

\(^{55}\) Section 401.25(2), F.S.
DOH must establish rules for ground ambulance or vehicle design and construction that is at least equal to those recommended by the United States General Services Administration. The federal guideline went into effect in 1974 and was for use by federal agencies and federal grant recipients purchasing ambulances. This federal standard was to be discontinued in 2016, however, it was recently updated in July 2019. Many states use the federal recommendations as there were no standards for ambulance design. In recent years, however, at least two other organizations have created standards: the Commission on Accreditation of Ambulance Services and the National Fire Protection Association.

In addition to the general licensure requirement, DOH provides a list of the equipment and supplies with which each BLS vehicle must be equipped and maintained and the equipment and medication with which each ALS vehicle must be equipped and maintained by rule. Current law requires the list of equipment and supplies established by DOH in rule, be at least as comprehensive as those listed in the most current edition of the American College of Surgeons, Committee on Trauma, list of essential equipment for ambulances. The American College of Surgeons developed this list more than 40 years ago, and in 2000, it jointly produced a list of standardized ambulance equipment with the American College of Emergency Physicians. Since that time, the joint document has been updated and has included participation by the National Association of EMS Physicians, Federal Emergency Medical Services for Children Stakeholder Group, National Association of State EMS Officials, Emergency Nurses Association, and endorsed by the American Academy of Pediatrics.

Effect of Proposed Changes – Emergency Medical Transportation Services

The bill repeals a requirement that DOH rules on ground ambulance be at least as comprehensive as the standards published by the American College of Surgeons. DOH may use any standard it deems appropriate to develop the list of required equipment for licensed ground ambulances. The bill also repeals the requirement that DOH’s rules on ambulance or vehicle design be at least equal to those recommended by the U.S. General Services Administration and requires that the rules be based on national standards recognized by DOH.

**Radiation Machines**

**Current Situation**

A radiation machine is a device designed to produce, or which produces, ionizing radiation or nuclear particles when such machine is operated. An example of ionizing radiation is an x-ray. DOH, through the Bureau of Radiation Control, works to reduce exposure to workers and the public from radiation machines by:

- Stopping unauthorized uses and users;
- Preventing accidental or unintended exposures;

---

56 Section 401.35, F.S.
59 Id.
60 Supra note 57.
61 Rule 64J-1.002(4) F.A.C. (Basic Life Support Service License – Ground); Rule 64J-1.003(7), F.A.C. (Advanced Life Support Service License – Ground).
62 Section 401.35, F.S.
64 Section 404.031, F.S.
• Ending ineffective or inappropriate uses of radiation; and
• Reducing the amount of exposure needed to accomplish the task.

DOH must inspect any hospital, health care facility, or other place in the state that has a radiation machine installed to determine if DOH-established measures are being met. Such standards address:

• Radiation machine performance, surveys, calibrations, and spot checks;
• Requirements for quality assurance programs and quality control programs;
• Standards for facility electrical systems, safety alarms, radiation-monitoring equipment, and dosimetry systems;
• Requirements for visual and aural communication with patients;
• Procedures for establishing radiation safety committees for a facility; and
• Qualifications of persons who cause a radiation machine to be used, who operate a radiation machine, and who ensure that a radiation machine complies with DOH requirements.

DOH performs more than 13,000 inspections per year. If a machine poses an immediate threat to public health, DOH immediately requires the machine to be removed from service. For less serious problems, DOH gives the machine owner 90 days to correct the deficiency. DOH collects an annual fee for the registration and inspection of radiation machines.

According to DOH, technological advances since the enactment of this inspection program has resulted in a variety of providers using radiation machines in a manner that was not originally contemplated. For example, dentists and podiatric physicians now use machines that were previously used only by medical doctors.

Effect of Proposed Changes – Radiation Machines

The bill establishes standards for radiation machines that are used to intentionally expose individuals to the useful beam. The bill defines “useful beam” as the portion of radiation emitted from a radiation machine through the aperture of the machines beam-limiting device which is designed to focus the radiation on the intended target to accomplish its purpose. Radiation machines:

• Must be maintained and operated according to manufacturer standards or nationally-recognized consensus standards accepted by DOH;
• Must be operated at the lowest exposure needed to achieve the intended purpose; and
• May not be modified in a manner that cause the machines to operate differently from the manufacturer’s design specification or the parameters approved for the machines and their components by the U.S. Food and Drug Administration.

The bill requires that human beings only be exposed to the useful beam for medical or health care, if the licensed health care practitioner determines that the health benefit outweighs the health risk from exposure or to provide security for facilities or other venues if such exposure is determined to provide a life safety benefit that outweighs the health risk from exposure. The bill requires DOH to adopt rules establishing limits to annual total exposure for security purposes based on national standards.

Health Care Professional Licensure

Current Situation
The Division of Medical Quality Assurance (MQA), within the Department of Health (DOH), has general regulatory authority over health care practitioners. MQA works in conjunction with 22 boards and 4 councils to license and regulate 7 types of health care facilities and more than 40 health care professions. Each profession is regulated by an individual practice act and by ch. 456, F.S., which provides general regulatory and licensure authority for MQA.

**General Licensure Requirements**

There are general licensure provisions that apply to all licensure applications, regardless of profession. For example, all applicants for licensure must apply in writing on an application form approved by DOH or electronically on a web-based application form. Additionally, an applicant must provide his or her social security number for identification purposes. However, an applicant is not required to provide his or her date of birth as DOH is not currently authorized to collect this information.

If, at the time of application, an applicant has not been issued a social security number because he or she is not a U.S. citizen or resident, DOH may process the application using a unique personal identification number. If the applicant is eligible for a license, the applicable board, or DOH when there is no board, may issue a temporary license to the applicant. The temporary license is only valid for 30 days unless the applicant submits a social security number. On average, it takes about two weeks to receive a social security number once all required documentation is submitted to the U.S. Social Security Administration. If the Social Security Administration is unable to immediately verify immigration documents with the U.S. Citizenship and Immigration Services, it may take an additional two weeks to issue the social security number.

**Effect of Proposed Changes – Health Care Professional Licensure**

The bill requires the application for licensure to include the applicant’s date of birth, in addition to the currently required social security number. This will provide DOH an additional method to verify the identity of an individual applicant.

The bill also authorizes DOH to issue a temporary license to an eligible applicant, who has accepted a position with an accredited residency, internship, or fellowship program in Florida and who has submitted an application for registration for such position under s. 458.345, F.S., or s. 459.021, F.S., which expires 60 days, rather than 30 days, after issuance unless the applicant obtains and submits a social security number to DOH.

**Health Care Licensure and Student Loans**

**Current Situation**

---

74 Pursuant to s. 456.001(4), F.S., health care practitioners are defined to include acupuncturists, physicians, physician assistants, chiropractors, podiatrists, naturopaths, dentists, dental hygienists, optometrists, nurses, nursing assistants, pharmacists, midwives, speech language pathologists, nursing home administrators, occupational therapists, respiratory therapists, dieticians, athletic trainers, orthotists, prosthetists, electrologists, massage therapists, clinical laboratory personnel, medical physicists, dispensers of optical devices or hearing aids, physical therapists, psychologists, social workers, counselors, and psychotherapists, among others.

76 Section 456.013, F.S.

77 Id.

78 Id.

79 Id.

81 Id.
Student loans are funds that are lent to students or parents to pay for higher education. Student loans may come from private sources, such as banks or other financial institutions, or from a state or the federal government.82

The Office of Student Financial Assistance (OSFA) within the Florida Department of Education (DOE) is responsible for administering state and federally funded programs and serves as the guarantor agency for certain federally-backed student loans.83 The DOE is directed to exert every lawful and reasonable effort to collect all delinquent unpaid and uncanceled student loans.84

**Increase in Defaults on Student Loans**

An estimated 41.5 million Americans owe more than $1.2 trillion in outstanding federal loan debt. This is more than triple the $340 billion in student loan debt owed by Americans in 2001.85 With this increase in student loan debt owed by Americans, there has been an increase in the number of people who are defaulting on or failing to pay their student loans. For most federal loans, default generally occurs when a payment has not been made for 270 days.86 In 2018, 41,013 borrowers who attended Florida schools had defaulted on their federal student loans used to attend institutions ranging from universities to trade schools.87

**Disciplining Professional Licenses for Defaulting on Student Loans**

In the 1990s, as a result of a rising number of students defaulting on their federally-backed student loans, the federal government urged state legislators to send a message to students, post-secondary institutions, and lenders that high levels of default would not be tolerated. The federal government recommended that states take the following steps to curb student loan default:88

- Enact a state tax-refund offset program;
- Enact a wage garnishment program;
- Deny professional licenses to defaulters until they take steps towards repayment;
- Screen potential applicants for state jobs to prevent the hiring of loan defaulters who have not entered into repayment agreements; and
- Ensure that information available to state agencies such as the Department of Motor Vehicles, the tax department, and the unemployment commission is available to the state’s guarantee agency.

As a result, many states, including Florida, began adopting various forms of disciplinary licensing laws for defaulting on government-backed student loans. By 2010, about half of the states had some form of disciplinary licensing laws for defaulting on government-backed student loans. Since then, based on shifting concerns, there has been a trend to reduce or eliminate such laws. Currently, approximately 15 states, including Florida, still have some form of such laws.89

**Federal Attempts to Prohibit State Disciplinary Licensing Laws**

---

84 Section 1009.95, F.S.

Recently, there have been attempts at the national level to prohibit state disciplinary licensing laws for defaulting on government-backed student loans. Bills were introduced in the United States Congress in 2018 and 2019 that would prohibit states from disciplining or denying state-issued licenses for defaulting on government-backed student loans.90

**DOH Disciplinary Laws**

Section 456.072(1)(k), F.S., authorizes DOH to discipline a health care practitioner for failing to perform any statutory or legal obligation placed upon a health care practitioner, which specifically includes failing to repay a government-backed student loan or comply with a service scholarship obligation. If DOH finds that a health care practitioner has defaulted on his or her student loans or failed to comply with a service scholarship, at a minimum, DOH must:

- Suspend the practitioner’s license until he or she agrees to new loan repayment terms or resumes the scholarship obligation;
- Place the practitioner on probation for the duration of the student loan or scholarship obligation period; and
- Impose a fine equal to 10 percent of the defaulted loan amount.

Every month, DOH must obtain a list from USHHS of Florida-licensed health care practitioners who have defaulted on government-backed student loans.91 Upon learning that a health care practitioner has defaulted on such a student loan, DOH must notify the practitioner that he or she has 45 days to provide DOH with proof of a new repayment plan, or such practitioner will be subject to an emergency order suspending the practitioner’s license. Also, DOH may proceed with additional disciplinary action against the practitioner, regardless if he or she provides proof of entering a new repayment plan.92 DOH must also deny any licensure applicant if the applicant is listed on a USHHS list for defaulting or being delinquent on a student loan.93

During the 2017-2018 Fiscal Year, DOH handled 247 cases against health care practitioners for defaulting on student loans, and during the 2018-2019 Fiscal Year, DOH handled 722 cases.94

**Effect of Proposed Changes – Health Care Licensure and Student Loans**

The bill Exempted licensure applicants from disqualification from licensure based solely on a default or delinquency on a student loan.

The bill expressly states that failing to repay a government-backed student loan does not constitute grounds for licensure discipline and repeals the requirement that DOH must issue an emergency order suspending a health care practitioner’s license for a student loan default absent timely proof of a new

---

91 Section 456.0721, F.S.
92 Section 456.074(4), F.S.
93 Section 456.0635, F.S.
94 E-mail correspondence with Gary Landry, Office of Legislative Planning, Department of Health, dated Oct. 30, 2019, on file with the Health Quality Subcommittee.
repayment plan. DOH no longer has to obtain a monthly list from the USHHS of the Florida health care practitioners who have defaulted on their student loans. The bill also repeals DOH’s authority to discipline a health care practitioner for failing to comply with a scholarship obligation and the associated mandatory disciplinary action. The bill exempts licensure applicants from disqualification from licensure based solely on a default or delinquency on a student loan.

**Medical Faculty Certificates**

**Current Situation**

The Board of Medicine may issue a medical faculty certificate to a qualified physician to practice in conjunction with a full-time faculty appointment at one of the following accredited medical school and its affiliated clinical facilities or teaching hospitals.95

- University of Florida;
- University of Miami;
- University of South Florida;
- Florida State University;
- Florida International University;
- University of Central Florida;
- Mayo Clinic College of Medicine and Science in Jacksonville, Florida;
- Florida Atlantic University; or
- Johns Hopkins All Children’s Hospital in St. Petersburg, Florida

Although the applicant does not have to sit for and successfully pass a national examination, the applicant must meet specified statutory criteria for the medical faculty certificate.

There is no limit on the number of initial certificates a medical school or teaching institution may receive. However, the number of medical faculty certificates that may be renewed by each medical school or teaching institution is statutorily limited.96 All medical schools, except the Mayo Clinic College of Medicine in Jacksonville, Florida, are limited to 30 renewed medical faculty certificates. The Mayo Clinic College of Medicine is limited to 10 renewed medical faculty certificates. The H. Lee Moffitt Cancer Center and Research Institute is also permitted to have up to 30 renewed faculty certificates.97

An annual review of each medical faculty certificate recipient is made by the dean of the certificate recipient’s accredited 4-year medical school and reported to the BOM within the DOH on an annual basis.98 Currently, there are 62 physicians holding a medical faculty certificate.99

**Effect of Proposed Changes – Medical Faculty Certificates**

The bill expands the current medical faculty certificate eligibility by allowing a medical faculty certificate to be issued without examination to an individual who has been offered and accepted a full-time faculty appointment to teach at Nova Southeastern University and Lake Erie College of Osteopathic Medicine. The Board of Medicine may issue up to 30 medical faculty certificates to each of the institutions.

**Board Certification of Physicians**

**Current Situation**
Medical licensure of physicians sets the minimum competency requirements to diagnose and treat patients; it is not specialty specific. Medical specialty certification is a voluntary process that gives a physician a way to develop and demonstrate expertise in a particular specialty or subspecialty.

**Board Certification and Florida Licensure**

DOH does not license a physician by specialty or subspecialty based upon board certification; however, ch. 458 and ch. 459, F.S., limit which physicians may hold themselves out as board-certified specialists. An allopathic physician licensed under ch. 458, F.S., may not hold himself or herself out as a board-certified specialist unless he or she has received formal recognition as a specialist from a specialty board of the American Board of Medical Specialties (ABMS) or other recognizing agency approved by the allopathic board.

Under Florida law, an allopathic physician may not hold himself or herself out as a board-certified specialist in dermatology unless the recognizing agency, whether authorized in statute or by rule, is triennially reviewed and reauthorized by the allopathic board. Similarly, an osteopathic physician licensed under ch. 459, F.S., may not hold himself or herself out as a board-certified specialist unless he or she has successfully completed the requirements for certification by the American Osteopathic Association (AOA) or the Accreditation Council on Graduate Medical Education (ACGME) and is certified as a specialist by a certifying agency approved by the board. These limitations on advertising are set out in rule 64B8-11.001, F.A.C. for allopathic physicians and rule 64B15-14.001, F.A.C., for osteopathic physicians.

---

101 Id.
102 The allopathic board has approved the specialty boards of the ABMS as recognizing agencies. Rule 64B8-11.001(1)(f), F.A.C.
103 Section 458.3312, F.S.
104 Id.
105 The osteopathic board has approved the specialty boards of the ABMS and AOA as recognizing agencies. Rule 64B15-14.001(h), F.A.C.
106 Section 459.0152, F.S.
Effect of Proposed Changes – Board Certification of Physicians

Currently, dermatology is the only physician specialty that statutorily requires the allopathic board to review and authorize the recognizing agency. The bill repeals the prohibition against a physician holding himself or herself out as a board-certified dermatologist unless the recognizing agency is triennially reviewed and reauthorized by the Board of Medicine.

Osteopathic Medicine

Current Situation

Following graduation from an AOA-approved medical school, osteopathic physicians (DOs) must complete an approved 12-month internship. 107 Interns rotate through hospital departments, including internal medicine, family practice, and surgery. They may then choose to complete a residency program in a specialty area, which requires two to six years of additional training. 108

Florida law requires DOs to complete an AOA-approved residency for licensure. 109 However, the Board of Osteopathic Medicine will accept a residency accredited by the ACGME 110 for licensure if the applicant demonstrates good cause, such as:111

- Personal limitation created by a documented physical or medical disability;
- Unique documented opportunity otherwise unavailable that meets a practice area of critical need;
- Documented legal restriction which requires the physical presence in a particular state or local area;
- Documented unusual or exceptional family circumstances which limit training opportunities;
- The previous program met all AOA requirements, but due to documented circumstances beyond the control of the applicant, was discontinued;
- Documented inability to relocate to another geographic area with undue hardship; or
- Documented inability to obtain an AOA internship.

Single Graduate Medical Education Accreditation System

In 2014, the ACGME, AOA, and American Association of Colleges of Osteopathic Medicine entered into a Memorandum of Understanding to transition to a single accreditation system for graduate medical education (GME). 112 Under this agreement, graduates of all allopathic and osteopathic medical schools complete residencies or fellowships in ACGME-accredited programs. 113 On July 1, 2015, the AOA and the ACGME began transitioning to a single GME accreditation system. 114

108 Id.
109 Section 459.055(1)(l), F.S.
110 The Accreditation Council for Graduate Medical Education sets the standards for U.S. graduate medical education (residency and fellowship) programs and accredits such programs based on compliance with these standards. In 2017-2018, there were 830 ACGME-accredited institutions sponsoring more than 11,000 residency and fellowship programs. See Accreditation Council for Graduate Medical Education, What We Do, available at https://www.acgme.org/What-We-Do/Overview (last visited November 25, 2019).
111 Rule 64B15-16, F.A.C.
114 Id.
The parties to this agreement indicate that a single accreditation system will:

- Establish and maintain consistent evaluation and accountability for the competency of resident physicians across all accredited GME programs;
- Eliminate duplication in GME accreditation;
- Achieve efficiencies and cost savings for institutions that sponsor both AOA-accredited and ACGME-accredited programs; and
- Ensure all residency and fellowship applicants are eligible to enter all accredited programs in the nation and can transfer from one accredited program to another without repeating training or causing a sponsoring institution to lose Medicare funding.

The AOA will cease accrediting GME programs on June 30, 2020. The single accreditation system requires all training programs to be ACGME-accredited by that date. If a program is solely AOA-accredited, the program must apply for ACGME accreditation or stop accepting trainees by June 30, 2020. However, the terms of the agreement allow the AOA to extend a program’s accreditation if the program has made a good faith effort to obtain ACGME accreditation but has not transitioned to ACGME accreditation by June 30, 2020.

**Effect of Proposed Changes – Osteopathic Medicine**

To qualify for licensure as an osteopathic physician, an applicant must currently complete a resident internship approved by the Board of Trustees of the American Osteopathic Association or an internship program approved by the osteopathic board. The bill requires that such internship or residency be approved by the American Osteopathic Association or the Accreditation Council for Graduate Medical Education, and repeals the authority of the osteopathic board to approve an internship program.

**Chiropractic Assistants**

**Current Situation**

There are two types of chiropractic assistants: certified and registered. A certified chiropractic assistant is an allied health professional who, under supervision, performs tasks or a combination of tasks traditionally performed by a chiropractic physician. A registered chiropractic assistant is a professional, multi-skilled person dedicated to assisting in all aspects of chiropractic medical practice under the direct supervision of a chiropractic physician or certified chiropractic assistant.

A registered chiropractic assistant voluntarily registers with the Board of Chiropractic Medicine. There are no educational or eligibility standards set in statute or rule for such registration. However, a person who becomes a registered chiropractic assistant must adhere to ethical and legal standards of professional practice, recognize and respond to emergencies, and demonstrate professional characteristics. A registered chiropractic assistant may:

- Prepare patients for the chiropractic physician’s care;
- Take vital signs;
- Observe and report patients’ signs and symptoms;

119 Rule 64B2-18(5), F.A.C.
120 Section 460.4166(1), F.S.
121 Section 460.4166(3), F.S.
122 Supra note 121.
123 Supra note 121.
124 Section 460.4166, F.S.
• Administer basic first aid;
• Assist with patient examinations or treatments other than manipulations or adjustments;
• Operate office equipment;
• Collect routine laboratory specimens as directed by the chiropractic physician or certified chiropractic assistant;
• Administer nutritional supplements as directed by the chiropractic physician or certified chiropractic assistant; and
• Perform office procedures under the direct supervision of by the chiropractic physician or certified chiropractic assistant.

There are 3,991 registered chiropractic assistants. DOH does not regulate the practice of registered chiropractic assistants.

**Effect of Proposed Changes – Chiropractic Assistants**

Currently, registered chiropractic assistants may voluntarily register with DOH. The bill repeals this voluntary registration, thereby eliminating registered chiropractic assistants.

**Board of Nursing**

**Current Situation**

**Rulemaking Authority**

The Board of Nursing has the authority to adopt rules to implement ch. 464, F.S., which regulates the practice of nursing in this state. The Board of Nursing oversees the licensure and practice of certified nursing assistants, licensed practical nurses, registered nurses, and advanced registered nurse practitioners.

**Certified Nursing Assistants**

Certified Nursing Assistants (CNAs) provide care and assist individuals with tasks relating to the activities of daily living, such as those associated with personal care, nutrition and hydration, maintaining mobility, toileting, safety and cleaning, end-of-life care, cardiopulmonary resuscitation and emergency care. An applicant for certification as a CNA must complete an approved training program, pass a competency examination, and pass a background screening. A CNA who is certified in another state, is listed on that state’s CNA registry and has not been found to have committed abuse, neglect, or exploitation in that state, is eligible for certification by endorsement in Florida. However, a CNA from a territory of the United States or the District of Columbia is not eligible for certification by endorsement.

The Board of Nursing may discipline a CNA for two violations:

• Obtaining or attempting to obtain certification or an exemption, or possessing or attempting to possess certification or letter of exemption, by bribery, misrepresentation, deceit, or through an error of the board; or
• Intentionally violating any provision of ch. 464, F.S., the practice act for nursing professions, ch. 456, F.S., the general licensing act, or the rules adopted by the Board of Nursing.

---

125 Supra note 75.
126 Section 464.006, F.S.
127 Section 464.201(5), F.S.
128 Section 464.203, F.S. See also Department of Health, Board of Nursing, Certified Nursing Assistant (CNA) by Examination, available at http://floridasnursing.gov/licensing/certified-nursing-assistant-examination/ (last visited November 25, 2019). An applicant who fails the competency examination 3 times, may not take the exam again until he or she completes an approved training program.
129 A CNA Registry is a listing of CNAs who received certification and maintain an active certification. (Rule 64B9-15.004, F.A.C.)
130 Section 464.204, F.S.
When seeking to discipline a CNA for violating the nurse practice act, the general licensing act, or a rule adopted thereunder, the Board of Nursing must prove that such violation is intentional. Therefore, if the Board of Nursing cannot prove intent or if a CNA acts negligently, the Board of Nursing is unable to discipline the CNA.

**Effect of Proposed Changes – Board of Nursing**

The bill authorizes the Board of Nursing to adopt rules related to disciplinary procedures and the standards of practice for CNAs. The bill authorizes CNA applicants who are licensed in other territories of the United States or the District of Columbia to qualify for licensure by endorsement. The bill also authorizes the Board of Nursing to discipline CNAs for any violation of a law or rule regulating CNA practice, repealing the requirement that such violation be intentional.

**Florida Center for Nursing**

**Current Situation**

The Florida Center for Nursing (center) was created in 2001 to address the issues of supply and demand for nursing, including issues of recruitment, retention, and utilization of nurse workforce issues. The center collects and analyzes nursing workforce data, develops and disseminates a strategic plan for nursing, develops and implements reward and recognition activities for nurses, and promotes nursing excellence programs, image building, and recruit into the profession.

In 2009, the Legislature created a statutory framework for approving nursing education programs, which was revised in 2010 and 2014. In 2014, the Legislature directed the center and the Office of Program Policy Analysis and Government Accountability (OPPAGA) to produce an annual report to the Governor and Legislature on nursing education programs until January 2020. In 2017, the report became the sole responsibility of the center.

The annual report includes data and measurements on:

- The number of programs and slots available;
- The number of applications, qualified applicants, and accepted students;
- The number of program graduates;
- Program retention rates;
- Graduate passage rates on the National Council of State Boards of Nursing Licensure Examination;
- The number of graduates who become employed in the state; and
- The programs progress in meeting accreditation requirements.

The report also evaluates the Board of Nursing’s implementation of the program approval process and accountability processes.

134 Chapter 2014-92, L.O.F.
135 Chapter 2017-134, L.O.F.
136 Section 464.019(10), F.S.
137 Id.
Effect of Proposed Changes – Florida Center for Nursing

The bill extends the date of the scheduled sunset of the annual report on nursing education programs produced by the Florida Center for Nursing from January 30, 2020, to January 30, 2025.

Dentistry

Current Situation

Examination for Licensure

Any person wishing to practice dentistry in this state must apply to DOH and meet specified requirements. Section 466.006, F.S., requires dentistry licensure applicants to sit for and pass the following licensure examinations:

- The National Board of Dental Examiners dental examination (NBDE);
- A written examination on Florida laws and rules regulating the practice of dentistry; and
- A practical examination, which is the American Dental Licensing Examination developed by the American Board of Dental Examiners, Inc., and graded by a Florida-licensed dentist employed by DOH for such purpose.\(^{138}\)

To qualify to take the Florida dental licensure examination, an applicant must be 18 years of age or older, be a graduate of a dental school accredited by the American Dental Association Commission on Dental Accreditation (CODA) or be a student in the final year of a program at an accredited institution, and have successfully completed the NBDE dental examination.\(^{139}\) If the applicant is not a graduate of a CODA-accredited program, the applicant must demonstrate that he or she holds a degree from an accredited American dental school or has completed two years at a full-time supplemental general dentistry program accredited by CODA.\(^{140}\) DOH indicates that there is confusion on whether these programs may include specialty or advanced education programs.\(^{141}\)

Any person wishing to be licensed as a dental hygienist must apply to DOH and meet the following qualifications:\(^{142}\)

- Be 18 years of age or older;
- Be a graduate of an accredited dental hygiene college or school;\(^{143}\) and
- Obtain a passing score on the:
  - Dental Hygiene National Board Examination;
  - Dental Hygiene Licensing Examination developed by the American Board of Dental Examiners, Inc., which is graded by a Florida-licensed dentist or dental hygienist employed by DOH for such purpose; and
  - A written examination on Florida laws and rules regulating the practice of dental hygiene.

According to DOH, limiting the grading to Florida-licensed dentists and dental hygienists has created a shortage of dentists and dental hygienists available to grade the examinations.\(^{144}\)

\(^{138}\) A passing score is valid for 365 days after the date the official examination results are published. A passing score on an examination obtained in another jurisdiction must be completed on or after October 1, 2011.

\(^{139}\) Section 466.006(2), F.S.

\(^{140}\) Section 466.006(3), F.S.

\(^{141}\) Department of Health, 2020 Agency Legislative Analysis for SB 230, on file with the Health Quality Subcommittee. SB 230 is substantively similar to HB 713.

\(^{142}\) Section 466.007, F.S.

\(^{143}\) If the school is not accredited, the applicant must have completed a minimum of 4 years of postsecondary dental education and received a dental school diploma, which must be reviewed and approved by the Board of Dentistry.

\(^{144}\) Supra note 141, at p. 4.
Health Access Dental Licenses

The health access dental license was established in 2008 to attract out-of-state dentists to practice in underserved health access settings\(^{145}\) in this state, without supervision.\(^{146}\) In Fiscal Year 2018-2019, the Board of Dentistry issued 50 health access dental licenses.\(^{147}\)

With this license, a dentist who holds a valid, active license in good state issued by another state, the District of Columbia, or a U.S. territory may practice in a health access setting if the dentist:\(^{148}\)

- Applies to the Board of Dentistry and pays the appropriate fee;
- Has not been convicted of or pled nolo contendere to, regardless of adjudication, any felony or misdemeanor related to the practice of a health care profession;
- Submits proof of graduation from an accredited dental school;
- Submits documentation that the dentist has completed, or will obtain prior to licensure, continuing education equivalent to Florida’s requirement for dentists for the last full reporting biennium;
- Submits proof of successful passage of parts I and II of the National Board of Dental Examiners and a state or regional clinical dental examination approved by the Board of Dentistry;
- Has never had a license revoked in another state, the District of Columbia, or a U.S. territory;
- Has never failed the Florida dental licensing examination, unless the dentist was reexamined and received a license to practice in Florida;
- Has not been reported to the National Practitioner Data Bank, unless the applicant successfully appealed to have his or her name removed from the databank; and
- Submits proof that he or she has been actively engaged in the clinical practice of dentistry providing direct patient care for the five years immediately preceding application, or proof of continuous clinical practice providing direct patient care since graduation if the applicant graduated less than 5 years from his or her application.

Health access dental licenses must be renewed biennially\(^{149}\). A licensee must meet the same continuing education requirements as a Florida-licensed dentists.\(^{150}\) Additionally, a licensee must continue to meet all the requirements met for initial license.\(^{151}\)

The Board of Dentistry may revoke a health access dental license if the licensee is terminated from employment at the health access setting, practices outside of the health access setting, fails the Florida dental examination, or is found to have violated the Dental Practice Act, other than a minor violation or a citation offense.\(^{152}\)

The program was repealed effective January 1, 2020, as the Legislature did not reenact DOH’s authority to issue such licenses by the scheduled repeal date.\(^{153}\)

**Adverse Incident Reporting**

Dentists and dental hygienists certified by DOH to administer anesthesia must report, in writing, any adverse incident that occurs to the Board of Dentistry within 48 hours by registered mail.\(^{154}\) An adverse incident in an office setting is defined as any mortality that occurs during or as the result of a dental procedure, or an incident that results in a temporary or permanent physical or mental injury the requires

\(^{145}\) Section 466.003(14), F.S., defines “health access setting” as a program or institution operated by the Department of Children and Families, Department of Health, Department of Juvenile Justice, a nonprofit health care center, a Head Start center, a federally-qualified health center or a lookalike, a school-based prevention program, a clinic operated by an accredited college of dentistry, or certain accredited dental hygiene program.

\(^{146}\) Chapter 2008-64, L.O.F., codified at s. 466.0067, F.S.

\(^{147}\) Supra note 75.

\(^{148}\) Section 466.0067, F.S.

\(^{149}\) Section 466.00671, F.S.

\(^{150}\) Id.

\(^{151}\) Id.

\(^{152}\) Section 466.00672, F.S.

\(^{153}\) Section 466.00673, F.S.

\(^{154}\) Rule 64B5-14.006, F.A.C.
hospitalization or emergency room treatment of a patient as a direct result of the use of general anesthesia,\textsuperscript{155} deep sedation,\textsuperscript{156} moderate sedation,\textsuperscript{157} pediatric moderate sedation,\textsuperscript{158} minimal sedation,\textsuperscript{159} nitrous oxide,\textsuperscript{160} or local anesthesia.\textsuperscript{161} The dentist must file a complete written report with the Board of Dentistry within 30 days.\textsuperscript{162}

Allopathic and osteopathic physicians are statutorily required to report adverse incidents in office practice settings.\textsuperscript{163} Although required by rule, there is no statutory requirement that dentists or dental hygienists report adverse incidents that occur in the office practice settings.

**Dental Laboratories**

A dental laboratory is a facility that supplies or manufactures artificial substitutes for natural teeth, or that furnishes, supplies, constructs, reproduces, or repairs a prosthetic denture, bridge, or appliance to be worn in the human mouth or that otherwise holds itself out as a dental laboratory.\textsuperscript{164} Dental laboratories must biennially register with DOH, and the owner or at least one employee must complete 18 hours on continuing education each biennium.\textsuperscript{165} A dental laboratory must:\textsuperscript{166}

- Maintain and make available to DOH a copy of the laboratory’s registration;
- Be clean and in good repair;
- Properly dispose of all waste materials at the end of each day in accordance with local restrictions;
- Maintain the original or a copy of a prescription from a dentist for each appliance or artificial restorative oral device authorizing its construction or repair for 4 years;
- Maintain a written policy and procedure manual on sanitation; and
- Have a designated receiving area.

A dental laboratory may not have dental chairs, x-ray machines, or anesthetics, sedatives, or medicinal drugs.\textsuperscript{167} A dental laboratory may not solicit or advertise to the general public.\textsuperscript{168}

DOH inspects dental laboratories at least once each year, and such inspections may occur with or without notice.\textsuperscript{169}

**Effect of Proposed Changes – Dentistry**

**Dental Licensure**

\textsuperscript{155} General anesthesia is a controlled state of unconsciousness, produced by a pharmacologic agent, accompanied by a partial or complete loss of protective reflexes, including inability to independently maintain an airway and respond purposefully to physical stimulation or verbal command. (Rule 64B5-14.001(2), F.A.C.)

\textsuperscript{156} Deep sedation is a controlled state of depressed consciousness accompanied by partial loss of protective reflexes, including either or both the inability to continually maintain an airway independently or to respond appropriately to physical stimulation or verbal command, produced by pharmacologic or non-pharmacologic method or combination thereof. (Rule 64B5-14.001(3), F.A.C.)

\textsuperscript{157} Moderate sedation is a depressed level of consciousness produced by the administration of pharmacologic substances, that retains the patient’s ability to independently and continuously maintain an airway and respond appropriately to physical stimulation and verbal command. (Rule 64B5-14.001(4), F.A.C.)

\textsuperscript{158} Pediatric moderate sedation is a depressed level of consciousness produced by the administration of pharmacologic substances, that retains a child patient’s ability to independently and continuously maintain an airway and respond appropriately to physical stimulation or verbal command. (Rule 64B5-14.001(5), F.A.C.)

\textsuperscript{159} Minimal sedation involves the perioperative use of medication to relieve anxiety before or during a dental procedure and does not produce a depressed level of consciousness and maintains the patient’s ability to maintain an airway independently and to respond appropriately to physical and verbal stimulation. (Rule 64B5-14.001(10), F.A.C.)

\textsuperscript{160} The use of nitrous oxide produces an altered level of consciousness that retains the patient’s ability to independently and continuously maintain an airway and respond appropriately to physical stimulation or verbal command. (Rule 64B5-14.001(6), F.A.C.)

\textsuperscript{161} Local anesthesia involves the loss of sensation of pain in a specific area of the body. (Rule 64B5-14.001(7), F.A.C.)

\textsuperscript{162} *Supra* note 154.

\textsuperscript{163} See ss. 458.351 and 459.026, F.S.

\textsuperscript{164} Section 466.031, F.S.

\textsuperscript{165} Section 466.032, F.S. However, dental laboratories that are located in another state or country that provides services to a Florida-licensed dentist is not required to register with the state and may provide services to a dentist in this state.

\textsuperscript{166} Rule 64B27-1.001, F.A.C.

\textsuperscript{167} Id. Personal prescriptions are permissible.

\textsuperscript{168} Section 466.035, F.S.

\textsuperscript{169} Rule 64B27-1.001(1), F.S.
Current law requires that a dental licensure applicant who does not attend an accredited dental school must submit proof that he or she completed at least 2 academic years at a full-time supplemental general dentistry program approved by the American Dental Association. The bill clarifies that a supplemental dentistry program does not include an advanced dental education program in a dental specialty.

The bill repeals a requirement that a Florida-licensed dentist grade the American Dental Licensing Examination, and that either a Florida-licensed dentist or dental hygienist grade Dental Hygienist Examination produced by the American Board of Dental Examiners, Inc., for applicants for licensure in this state. Therefore, dentists or dental hygienist licensed in other states may grade such licensure examinations.

*Health Access Dental Licenses*

The bill revives, reenacts, and repeals the scheduled January 1, 2020 sunset of health access dental licenses. The bill makes these changes apply retroactively to January 1, 2020.

*Dental Adverse Incidents*

Dentists and dental hygienists are currently required to submit adverse incidents related to the administration of anesthesia under rules adopted by the Board of Dentistry. The bill statutorily requires a dentist to report an adverse incident that occurs in his or her office to DOH in writing by certified mail and postmarked within 48 hours after the incident occurs. The bill defines an adverse incident as any death that occurs during or as a result of a dental procedure, or a temporary or permanent physical or mental injury that requires hospitalization or emergency room treatment as a result of the use of general anesthesia, deep sedation, conscious sedation, pediatric conscious sedation, oral sedation, minimal sedation, nitrous oxide, or local anesthesia.

The bill also requires a dentist to report any death or other adverse incident that occurs in the dentist’s outpatient facility to the Board of Dentistry in writing by certified mail within 48 hours of such occurrence. Within 30 days, the dentist must file a complete report with the Board of Dentistry.

The bill requires a certified dental hygienist who holds a certificate to administer local anesthesia to notify the Board of Dentistry in writing by registered mail within 48 hours of an adverse incident that was related to or the result of the administration of local anesthesia. The dental hygienist must file a complete report with the Board of Dentistry within 30 days.

DOH must review each adverse incident report to determine whether the incident involved conduct by a health care practitioner that warrants disciplinary action by the applicable regulatory board. A dentist or dental hygienist who fails to timely and completely report adverse incidents as required is subject to disciplinary action by the Board of Dentistry.

*Dental Laboratories*

The bill authorizes an employee or independent contractor of a dental laboratory to engage in onsite consultations with a dentist during a dental procedure if such person is acting as an agent of the dental laboratory. The bill also requires DOH to biennially inspect dental laboratories, rather than annually as currently required by rule.

*Athletic Trainers*

*Current Situation*

Athletic trainers provide service and care to individuals related to the prevention, recognition, evaluation, management, disposition, treatment, or rehabilitation of a physically active person who sustained an
injury, illness, or other condition involving exercise, sport, recreation, or related physical activity.\textsuperscript{171} To be licensed as an athletic trainer, an applicant must:\textsuperscript{172}

- Hold a bachelor’s degree or higher from an accredited athletic training degree program and pass the national examination to be certified by the Board of Certification;\textsuperscript{173}
- If graduated before 2004, hold a current certification from the Board of Certification;
- Hold a current certification in both cardiopulmonary resuscitation and the use of an automated external defibrillator at the professional rescue level; and
- Pass a background screening.

Prior to 2004, athletic trainers could obtain training through a Board of Certification internship program to qualify for licensure.\textsuperscript{174} Current law does not allow applicants who completed such an internship prior to 2004 to qualify for licensure.

An athletic trainer must renew his or her license biennially. During each biennial renewal period, an athletic trainer must complete at least 24 hours of continuing education, hold a current certification in both cardiopulmonary resuscitation and the use of an automated external defibrillator, and a current certification from the Board of Certification.\textsuperscript{175} Although licensees must show current certification from the Board of Certification, there is no statutory requirement that a licensee maintain such certification without lapse and in good standing.

An athletic trainer must practice under the direction of an allopathic, osteopathic, or chiropractic physician,\textsuperscript{176} and may provide care such as:\textsuperscript{177}

- Injury prevention, recognition, and evaluation;
- First aid and emergency care;
- Injury management and treatment;
- Rehabilitation through the use of safe and appropriate physical rehabilitation practices;
- Conditioning;
- Performance of tests and measurements to prevent, evaluate, and monitor acute and chronic injuries;
- Therapeutic exercises;
- Massage;
- Cryotherapy and thermotherapy;
- Therapy using other agents such as water, electricity, light, or sound; and
- The application of topical prescription medications at the direction of a physician.

The physician must communicate his or her direction through oral or written prescriptions or protocols, and the athletic trainer may not provide, offer to provide, or represent that he or she is qualified to provide any care or service that he or she lacks the education, training, or experience to provide, or that he or she is otherwise prohibited by law from providing.\textsuperscript{178}
Effect of Proposed Changes – Athletic Trainers

The bill requires athletic trainers to work within her or his scope of practice as defined by the Board of Athletic Training in rule. The bill adds another route to licensure by authorizing individuals who hold a bachelor’s degree, completed a Board of Certification internship, and hold a certification from the Board of Certification to be eligible for licensure.

The bill establishes that a licensed athletic trainer must maintain his or her certification from the Board of Certification in good standing to be eligible for licensure renewal. The bill authorizes the Board of Athletic Training to establish rules for the supervision of an athletic training student.

Orthotists and Prosthetists

Current Situation

The Board of Orthotists and Prosthetists oversees the licensure and regulation of orthotists and prosthetists. A person applying for licensure must first apply to DOH to take the appropriate licensure examination. The board may accept the exam results of a national orthotic or prosthetic, standards organization in lieu of administering the state exam. The board must verify that an applicant for licensure examination meets the following requirements:

- Has completed the application form and paid all applicable fees;
- Is of good moral character;
- Is 18 years of age or older;
- Has completed the appropriate educational preparation, including practical training requirements; and
- Has successfully completed an appropriate clinical internship in the professional area for which the license is sought.

In addition to the requirements listed above, an applicant must meet the following requirements for each license he or she is seeking:

- A Bachelor of Science degree in Orthotics and Prosthetics from a regionally accredited college or university from an accredited college or university recognized by the Commission on Accreditation of Allied Health Education Programs, or a bachelor’s degree with a certificate in orthotics or prosthetics from a program recognized by the Commission on Accreditation of Allied Health Education Programs, or its equivalent;
- An internship of one year of qualified experience or a residency program recognized by the board;
- Completion of the mandatory classes; and
- Passage of the state orthotic examination or board-approved orthotic examination if applying for an orthotist license, or the state prosthetic examination or board-approved examination if applying for a prosthetist license.

Currently, a person who qualifies to be registered as both an orthotist and a prosthetist must obtain two separate registrations.

Effect of Proposed Changes – Orthotists and Prosthetists

180 An orthotist is a health care professional who evaluates, formulates treatment, measures, designs, fabricates, assembles, fits, adjusts, services or provides necessary training to accomplish the fitting of an orthosis or pedorthics (s. 468.80(9)-(10), F.S.)

181 An orthotist is a health care professional who evaluates, formulates treatment, measures, designs, fabricates, assembles, fits, adjusts, services or provides necessary training to accomplish the fitting of a prosthesis (s. 468.80(15)-(16), F.S.)

182 Section 468.803(4), F.S. The Board has approved the American Board for Certification in Orthotics, Prosthetics, and Pedorthics (ABC) exam for orthotist and prosthetist applicants (r. 64B14-4.001, F.A.C.)

183 Section 468.803(5), F.S. Licenses must be renewed biennially.

184 Pursuant to r. 64B14-5.005, F.A.C., mandatory courses include two hours on Florida laws and rules, two hours on the prevention of medical errors, one hour on infection disease control, and a CPR certification course.
The bill authorizes the Board of Orthotists and Prosthetists to issue a single registration for prosthetics and orthotics practice. Currently, an individual must hold two separate registrations: one as a prosthetist and one as an orthotist. For purposes of resident registration, DOH may recognize a dual certificate in prosthetics and orthotics for an applicant who holds a bachelor’s degree from a regionally accredited college or university. The bill also authorizes the completion of a dual residency program to qualify for the licensure examination.

**Massage Therapy**

**Current Situation**

**Massage Therapists**

To be licensed as a massage therapist, an applicant must:186

- Be at least 18 years of age or have received a high school diploma or graduate equivalency diploma;
- Complete a course of study at a board-approved massage school or apprentice program;
- Pass a board-approved examination;187 and
- Pass a background screening.

In the 2017-2018 fiscal year, 3,380 individuals were granted licensure, 13 of which qualified for licensure by completing an approved Florida apprenticeship program.188 Massage therapy education has become more formalized and massage therapists are trained in licensed massage schools. Florida is one of a very small number of states that continue to allow apprenticeship as an acceptable course of study for licensure as a massage therapist.189

---

186 Section 480.041, F.S. DOH must deny an application if the applicant has been convicted or found guilty of, or entered a plea of nolo contendere to a crime related to prostitution or a felony offense related to certain other crimes.
187 In r. 64B27-25.001(3), F.A.C., the Board of Massage Therapy has approved the following national licensure examinations: Massage and Bodywork Licensing Examination administered by the Federation of State Massage Therapy Boards, National Certification Board for Therapeutic Massage and Bodywork Examination, National Certification Examination for Therapeutic Massage, National Exam for State Licensure option administered by the National Certification Board for Therapeutic Massage and Bodywork, and for colonic irrigation, The National Board for Colon Hydrotherapy Examination.
188 Supra note 141.
189 Department of Health, 2019 Agency Legislative Analysis for HB 7031, on file with the Health Quality Subcommittee.
Colonic Irrigation Apprenticeship Programs

A massage therapist, a massage apprentice, or a student in a board-approved massage therapy school may study colonic irrigation under the direct supervision of a sponsor. The sponsor must be licensed to practice massage, authorized to practice colonic irrigation, and have practiced colonic irrigation for at least 3 years. The apprenticeship must be completed within 12 months of commencement and must consist of a minimum of 100 hours of training, including 45 hours of clinical practicum with a minimum of 20 treatments given. Few schools in Florida offer a colonic irrigation program so apprenticeships are the primary method of training. There are 21 individuals certified to complete an apprenticeship in colonic irrigation.

Effect of Proposed Changes – Massage Therapy

The bill limits apprenticeships to only those in colonic irrigations. A licensed massage therapist practicing colonic irrigation must supervise a colonic irrigation apprentice. The bill eliminates a massage therapy apprenticeship as a path to licensure. However, if an individual has been issued a license as a massage therapy apprentice before July 1, 2020, he or she may continue to perform massage therapy until the license expires. A massage therapist apprentice may apply for full licensure upon completion of the apprenticeship and before July 1, 2023.

The bill authorizes the Board of Massage Therapy to designate a national examination for licensure and repeals provisions requiring DOH to develop a licensure examination.

Psychologists

Current Situation

Licensure Requirements

The Board of Psychology oversees the licensure and regulation of psychologists. To receive a license to practice psychology, an individual must:

- Meet one of the following educational requirements:
  - Received a doctoral-level psychological education from an accredited school in the United States or Canada and a psychology program within that institution that is accredited from an agency recognized and approved by the U.S. Department of Education;
  - Received the equivalent of a doctoral-level education from a program at a school or university located outside of the United States or Canada, which is officially recognized by the government of the country in which it is located as a program or institution to train students to practice professional psychology;
  - Received and submitted, prior to July 1, 1999, certification of an augmented doctoral-level psychological education from a doctoral-level psychology program accredited by an agency recognized and approved by the U.S. Department of Education; or
  - Received and submitted, prior to August 31, 2001, certification of a doctoral-level program that at the time the applicant was enrolled and graduated maintained a standard of education and training comparable to the standard of training of a doctoral-level psychology program.

---

190 Colonic irrigation is a method of hydrotherapy used to cleanse the colon with the aid of a mechanical device and water (s. 480.033(6), F.S.).
191 Rule 64B7-29.001, F.A.C.
192 Id.
193 Rule 64B7-29.007, F.A.C.
194 Rule 64B7-25.001, F.A.C.
195 Supra note 141.
196 Section 490.004, F.S.
197 Section 490.005(1), F.S.
198 Section 490.003(3), F.S., defines doctoral-level education as a Psy.D, an Ed.D., or a Ph.D in psychology.

STORAGE NAME: N0713e.HHS
DATE: 2/13/2020
program accredited by an agency recognized and approved by the U.S. Department of Education;
- Complete 2 years or 4,000 hours of supervised experience;
- Pass the Examination for Professional Practice in Psychology;\textsuperscript{199} and
- Pass an examination on Florida laws and rules.

The American Psychological Association (APA) is recognized by the U.S. Department of Education and the Council for Higher Education Accreditation as the national accrediting authority for professional education and training in psychology.\textsuperscript{200} The APA no longer accredits programs in Canada.\textsuperscript{201}

An applicant who holds an active, valid license in another state may also qualify for licensure in this state if at the time the license was issued, the requirements were substantially equivalent to or more stringent than those in Florida at that time.\textsuperscript{202} Such individuals must have 20 years of experience as a licensed psychologist in any jurisdiction of the U.S. within the 25 years preceding the date of application. DOH indicates that under this standard, a law-to-law comparison is difficult and applicants who may otherwise qualify for licensure may be denied.\textsuperscript{203}

\textit{School Psychologists}

To be licensed as a school psychologist, an applicant must: \textsuperscript{204}

\begin{itemize}
\item Hold a doctorate, specialist, or equivalent degree from a program primarily psychological in nature and have completed 60 semester hours or 90 quarter hours of graduate study in an area related to school psychology from a college or university which at the time the applicant was enrolled and graduated was accredited by an accrediting agency recognized and approved by the Commission on Recognition of Postsecondary Accreditation or an institution recognized as a member in good standing with the Association of Universities and Colleges of Canada;
\item Have a minimum of 3 years of experience in school psychology, 2 of which must be supervised by a licensed school psychologist or other qualified school psychologist supervisor; and
\item Pass the PRAXIS II School Psychology examination.\textsuperscript{205}
\end{itemize}

The Commission on Recognition of Postsecondary Accreditation was dissolved in 1997, and its successor organization is the Council on Higher Education Accreditation.\textsuperscript{206} The Association of Universities and Colleges of Canada changed its name to Universities Canada.\textsuperscript{207}

\textsuperscript{204} Section 490.005(2), F.S.
\textsuperscript{207} Universities Canada, About Us, available at https://www.univcan.ca/about-us/ (last visited December 2, 2019).
Effect of Proposed Changes – Psychologists

The bill requires psychology programs within educational institutions to be accredited by the American Psychological Association (APA), which is recognized as the national accrediting authority for professional education and training in psychology by the U.S. Department of Education and the Council for Higher Education Accreditation.208 The bill replaces references to the Commission on Recognition of Postsecondary Accreditation to its successor organization, the Council for Higher Education Accreditation.209 For applicants for licensure who obtained their education in Canada, the bill requires those applicants to demonstrate that they have completed a program comparable to APA-accredited programs.

The bill repeals a provision that allowed an applicant for licensure by endorsement to hold a license from another state that has licensure standards that are equivalent or more stringent than Florida to qualify for licensure. However, an individual may apply for licensure by endorsement if he or she has a doctoral degree in psychology and has practiced for at least 10 years of the last 25 years, rather than 20 years as required in current law.

The bill repeals obsolete provisions related to applicants for licensure prior to July 1, 1999.

Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling

Current Situation

Intern Registration

To be licensed as a clinical social worker, marriage and family therapist, or mental health counselor, an applicant must meet educational requirements, complete at least 2 years of postgraduate or postmaster’s clinical practice supervised by a licensed practitioner, and pass a theory and practice examination.210 During the time in which an applicant is completing the required supervised clinical experience or internship, he or she must register with the DOH as an intern.211 The supervised clinical experience may be met by providing at least 1,500 hours of face-to-face psychotherapy with clients, which may not be accrued in less than 100 weeks.212

An applicant seeking registration as an intern must:213

- Submit a completed application form and the nonrefundable fee to the DOH;
- Complete education requirements;
- Submit an acceptable supervision plan for meeting the practicum, internship, or field work required for licensure that was not satisfied by graduate studies; and
- Identify a qualified supervisor.

An intern registration expires 60 months after the date of issue and may only be renewed if the candidate has passed the theory and practice examination required for full licensure.214 DOH has no authority to extend an intern registration beyond the 60 months if there are extenuating circumstances.

210 Section 491.005, F.S. A procedure for licensure by endorsement is provided in s. 491.006, F.S.
211 Section 491.0045, F.S.
212 Rule 64B4-2.001, F.A.C.
213 Section 491.0045(2), F.S.
214 Section 491.0045(6), F.S.
Marriage and Family Therapists

Marriage and family therapy incorporates marriage and family therapy, psychotherapy, hypnotherapy, sex therapy, counseling, behavior modification, consultation, client-centered advocacy, crisis intervention, and the provision of needed information and education to clients. An applicant seeking licensure as a mental health counselor must:

- Possess a master’s degree from an accredited program;
- Complete 36 semester hours of graduate coursework that includes a minimum of 3 semester hours of graduate-level coursework in:
  - The dynamics of marriage and family systems;
  - Marriage therapy and counseling theory;
  - Family therapy and counseling theory and techniques;
  - Individual human development theories throughout the life cycle;
  - Personality or general counseling theory and techniques;
  - Psychosocial theory; and
  - Substance abuse theory and counseling techniques.
- Complete at least one graduate-level course of 3 semester hours in legal, ethical, and professional standards;
- Complete at least one graduate-level course of 3 semester hours in diagnosis, appraisal, assessment, and testing for individual or interpersonal disorder or dysfunction;
- Complete at least one graduate-level course of 3 semester hours in behavioral research;
- Complete at least one supervised clinical practicum, internship, or field experience in a marriage and family counseling setting, during which the student provided 180 direct client contact hours of marriage and family therapy services;
- Complete two years of post-master’s supervised experience under the supervision of a licensed marriage and family therapist with five years of experience or the equivalent who is a qualified supervisor as determined by the board;
- Pass a board-approved examination; and
- Demonstrate knowledge of laws and rules governing the practice.

DOH must verify that an applicant’s education matches the specified courses and hours as outlined in statute. However, there are organizations that accredit marriage and family therapy education programs, including the Commission on Accreditation for Marriage and Family Therapy Education and the Council for the Accreditation of Counseling and Related Educational Programs that establish the minimum standards to meet the requirements to practice the profession.

Mental Health Counselors

A mental health counselor is an individual who uses scientific and applied behavioral science theories, methods, and techniques to describe, prevent, and treat undesired behavior and enhance mental health and human development and is based on research and theory in personality, family, group, and organizational dynamics and development, career planning, cultural diversity, human growth and development, human sexuality, normal and abnormal behavior, psychopathology, psychotherapy, and rehabilitation. To qualify for licensure as a mental health counselor, an individual must:

---

215 Id.
216 Section 491.005(3), F.S. An individual may qualify for a dual license in marriage and family therapy if he or she passes an examination in marriage and family therapy and has held an active license for at least three years as a psychologist, clinical social worker, mental health counselor, or advanced registered nurse practitioner who is determined by the Board of Nursing to be a specialist in psychiatric mental health (s. 491.0057, F.S.)
218 Sections 491.003(6) and (9), F.S.
219 Section 491.005(4), F.S.
- Have a master’s degree from a mental health counseling program accredited by the Council of the Accreditation of Counseling and Related Educational Programs, or a program related to the practice of mental health counseling that includes coursework and a 1,000-hour practicum, internship, or fieldwork of at least 60 semester hours that meet certain requirements;
- Have at least two years of post-master’s supervised clinical experience in mental health counseling;
- Pass an examination from the Professional Examination Service for the National Academy of Certified Clinical Mental Health Counselors; and
- Pass an eight-hour course on Florida laws and rules approved by the Board of Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling.\textsuperscript{220}

Currently, an applicant for a mental health counselor license must, by rule, pass the National Clinical Mental Health Counseling Examination. Current law refers to an outdated mental health counseling examination.

\textit{Effect of Proposed Changes - Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling}

\textit{Intern Registration}

The bill authorizes the Board of Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling to make a one-time exception to the 60-month limit on an internship registration. Such exceptions may only be granted in an emergency or hardship case, as defined by rule. The bill deletes obsolete language related to biennial renewals of intern registrations.

\textit{Marriage and Family Therapists}

The bill requires that an applicant for licensure hold a master’s degree with an emphasis in marriage and family therapy from a program accredited by the Commission of Accreditation for Marriage and Family Therapy Education or a Florida university program accredited by the Council for Accreditation of Counseling and Related Educational Programs. An applicant may also qualify for licensure if he or she holds a master’s degree in a closely related field and has completed graduated courses approved by the Board of Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling. The bill eliminates specified coursework and clinical experience required for licensure that is currently enumerated in statute.

To be licensed as a marriage and family therapist, s. 491.005(3), F.S., requires an applicant to complete two years of clinical experience. However, later in the same paragraph, it states the clinical experience required is three years. The bill corrects the scrivener’s error in the paragraph to clarify that two years of clinical experience is required for licensure.

\textit{Licensed Mental Health Counselors}

The bill updates the name of the organization that administers the licensure examination for mental health counseling licensure applicants to the National Board for Certified Counselors or its successor. This will conform the law to current practice.\textsuperscript{221} The bill revises the content areas that must be included in educational programs used to qualify for licensure to include substance abuse; legal, ethical, and professional standards issues in the practice of mental health counseling; and diagnostic processes.

The bill reduces the number of hours required for the clinical practicum or internship from 1,000 hours to 700 hours to conform the number of hours to the accreditation standards established by the Council for Accreditation of Counseling and Related Educational Programs. The bill requires the clinical practicum or internship to include at least 280 hours of direct client services.

\textsuperscript{220} Section 491.005(4), F.S., and r. 64B4-3.0035, F.A.C.
\textsuperscript{221} Supra note 141.
The bill requires that applicants who apply for licensure after July 1, 2025, to hold a master’s degree from a program accredited by the Council for Accreditation of Counseling and Related Educational Programs.

Licensure by Endorsement

The bill repeals educational requirements for applicants for licensure by endorsement. Such applicant qualifies for licensure if he or she holds a valid, active license to practice in another state for 3 of the 5 years preceding the date of application, passes an equivalent licensure examination, and is not under investigation for and has not been found to have committed any act that would constitute a licensure violation in Florida.

The bill clarifies that DOH may deny or impose penalties on the license of a certified master social worker who violates the practice act or ch. 456, F.S., the general regulatory statute by deleting an inaccurate reference to psychologists. This will alleviate confusion regarding the authority of DOH to impose such discipline or deny a license.

The bill deletes obsolete language and makes other technical and conforming changes.

The bill provides an effective date of July 1, 2020.

B. SECTION DIRECTORY:

Section 1: Amends s. 39.303, F.S., relating to Child Protection Teams and sexual abuse treatment programs; services; eligible cases.
Section 2: Amends s. 381.0042, F.S., relating to patient care for persons with HIV infection.
Section 3: Amends s. 381.4018, F.S., relating to physician workforce assessment and development.

Section 45: Amends s. 491.007, F.S., relating to renewal of license, registration, or certificate.
Section 46: Amends s. 491.009, F.S., relating to discipline.
Section 47: Amends s. 491.0046, F.S., relating to provisional license; requirements.
Section 48: Amends s. 945.42, related to definitions; ss. 945.40-945.49, F.S.
Section 49: Provides an effective date of July 1, 2020.

II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

A. FISCAL IMPACT ON STATE GOVERNMENT:

1. Revenues:

   DOH will experience a recurring decrease in revenue due to the loss of the 10% fine imposed on student loan default cases. In Fiscal Year 2018-2019 DOH received $461 in fine revenue.222

   DOH will experience a loss of revenue from biennial registration fees due to the deregulation of registered chiropractic assistants. The estimated biennial loss of revenue is approximately $166,125.223 However, the loss of revenue will be offset by eliminating the cost of registering chiropractic assistants.

   DOH may experience a loss of revenue due to the authorization of a single prosthetist-orthotist registration. It is unknown how many single registrations may be issued but it is estimated the loss of revenue will be insignificant.

2. Expenditures:

   The bill will have an insignificant, negative fiscal impact on DOH related to various rulemaking provisions. The bill authorizes DOH, or the appropriate regulatory board, to adopt or amend rules related to emergency medical transportation services, Conrad 30 Waiver program, general licensure requirements, medical faculty certificates, dermatology, osteopathic physician licensure, disciplinary guidelines and standards of practice for CNAs, dental licensure, athletic trainer licensure and supervision, massage therapy, psychology, licensed clinical social work, marriage and family therapy, and mental health counseling. Additionally, DOH will need to repeal adopted rules related to the deregulation of registered chiropractic assistants. Current resources are adequate to absorb these costs.

222 Email correspondence with Daniel Leon, Office of Legislative Planning, Department of Health, dated Jan. 22, 2020, on file with the Health Care Appropriations Subcommittee
223 Supra note 141.
DOH may experience an increase in workload related to reviewing and investigating dental adverse incidents for disciplinary action. It is unknown how many adverse incidents may be reported, however, current resources are estimated to be adequate to absorb these costs.

DOH will experience a reduction in workload and costs due to the repeal of DOH’s authority to discipline a health care practitioner for failing to repay government-backed student loans, changing the inspections of dental laboratories from annual to biennial, repealing the registration of chiropractic assistants, and reviewing and determining whether an applicant for osteopathic medicine licensure has demonstrated good cause completing an ACGME-accredited residency instead of an AOA-approved residency.

DOH will also incur costs associated with making minor changes to its LEIDS licensure system to reflect changes made in the bill, which current resources are adequate to absorb.224

B. FISCAL IMPACT ON LOCAL GOVERNMENTS:
   1. Revenues:
      None.
   2. Expenditures:
      None.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:
   Individuals who voluntarily registered as chiropractic assistants will no longer have to pay fees associated with such registration due to the bill’s repeal of the registration program.

   Individuals who wish to obtain a single prosthetist-orthotist registration may save money because they will no longer have to obtain separate prosthetic and orthotic registrations.

D. FISCAL COMMENTS:
   None.

III. COMMENTS

A. CONSTITUTIONAL ISSUES:
   1. Applicability of Municipality/County Mandates Provision:
      Not applicable. This bill does not appear to affect county or municipal governments.
   3. Other:
      None.

B. RULE-MAKING AUTHORITY:
   The bill provides sufficient rulemaking authority for DOH or the applicable regulatory boards to implement the bill’s provisions.

C. DRAFTING ISSUES OR OTHER COMMENTS:
   None.
IV. AMENDMENTS/ COMMITTEE SUBSTITUTE CHANGES

On December 11, 2019, the Health Quality Subcommittee adopted two amendments and reported the bill favorably as a committee substitute. The amendments:

- Revised DOH rulemaking authority relating to the minimum standards for ground ambulance and vehicle equipment, supplies, design, and construction;
- Removed references to particular association standards and recommendations that DOH must consider when developing rules for ground ambulances and vehicles;
- Required DOH to adopt rules based on national standards for ambulance and vehicle design and construction;
- Repealed a requirement that DOH discipline a licensee for failing to repay a student loan;
- Repealed a requirement that DOH obtain a monthly list from the U.S. Department of Health and Human Services of health care practitioners who have defaulted on their student loans; and
- Repealed a requirement that DOH issue an emergency order suspending the license of a health care practitioner who defaults on a student loan unless the licensee timely submits proof of a payment plan.

On January 28, 2020, the Health Care Appropriations Subcommittee adopted two amendments and reported the bill favorably as a committee substitute. The amendments:

- Removed the section of the bill related to radiation machine inspections and inspection fees.
- Made retroactive the sections of the bill related to the health access dental licenses to January 1, 2020.

On February 12, 2020, the Health and Human Services Committee adopted four amendments and reported the bill favorably as a committee substitute. The amendments:

- Required the Statewide Medical Director for Child Protection to report to the Deputy Secretary for Children’s Medical Services and requires the medical directors of each child protection team to report to the Statewide Medical Director;
- Extended the time a tier 3 cancer center has to qualify for a National Cancer Institute designation from 6 years to 10 years;
- Established requirements for maintaining and operating radiation machines and the use of radiation machines on humans; and
- Exempted licensure applicants from disqualification from licensure based solely on a default or delinquency on a student loan.

This analysis is drafted to the committee substitute as passed by the Health and Human Services Committee.
