Section 1. Section 768.38, Florida Statutes, is created to read:

768.38 Liability protections for COVID-19-related claims.—

(1) The Legislature finds that the COVID-19 outbreak in the state threatens the continued viability of certain business entities, educational institutions, governmental entities, and religious institutions that contribute to the overall well-being of the state. The threat of unknown and potentially unbounded liability to such businesses, entities, and institutions, in the wake of a pandemic that has already left many of these businesses, entities, and institutions vulnerable, has created an overpowering public necessity to provide an immediate and remedial legislative solution. Therefore, the Legislature intends for certain business entities, educational institutions, governmental entities, and religious institutions to enjoy heightened legal protections against liability as a result of the COVID-19 pandemic. The Legislature also finds that there are no alternative means to meet this public necessity, especially in light of the sudden, unprecedented nature of the COVID-19 pandemic. The Legislature finds the public interest as a whole is best served by providing relief to these businesses, entities, and institutions so that they may remain viable and continue to contribute to the state.

act shall not apply in a civil action against a particularly
named defendant which is commenced before the effective date of
this act.
