Be It Enacted by the Legislature of the State of Florida:

Section 1. Section 553.899, Florida Statutes, is created to read:

553.899 Mandatory structural inspections for multifamily residential buildings.—

(1) The Legislature finds that maintaining the structural integrity of a building throughout its service life is of paramount importance in order to ensure that buildings are structurally sound so as to not pose a threat to the public health, safety, or welfare. As such, the Legislature finds that the imposition of a statewide structural inspection program for aging multifamily residential buildings in this state is
necessary to ensure that such buildings are safe for continued
use.

(2) As used in this section, the term “milestone
inspection” means a structural inspection of a building by a
licensed architect or engineer authorized to practice in this
state for the purposes of attesting to the life safety and
adequacy of the structural components of the building and, to
the extent reasonably possible, determining the general
structural condition of the building as it affects the safety of
such building. The purpose of such inspection is not to
determine if the condition of an existing building is in
compliance with the Florida Building Code.

(3) The owner of a multifamily residential building that is
greater than three stories in height must have a milestone
inspection performed by December 31 of the year in which the
building reaches 30 years of age, based on the date the
certificate of occupancy was issued, and every 10 years
thereafter. The owner of a multifamily residential building that
is greater than three stories in height and is located within 3
miles of a coastline as defined in s. 376.031 must have a
milestone inspection performed by December 31 of the year in
which the building reaches 20 years of age, based on the date
the certificate of occupancy was issued, and every 7 years
thereafter. If a condominium building or cooperative building is
required to have a milestone inspection pursuant to
this section, the board of administration of the condominium
association or cooperative association must arrange for the
milestone inspection to be performed and is responsible for
ensuring compliance with the requirements of this section. The
building owner or board of administration of a condominium
association or cooperative association responsible for the
milestone inspection is responsible for all costs associated
with the inspection. This subsection does not apply to two-
family dwellings or to buildings less than 3,500 square feet.

(4) If a milestone inspection is required under this
section and the building’s certificate of occupancy was issued
on or before July 1, 1992, the building’s initial milestone
inspection must be performed before December 31, 2024.

(5) A milestone inspection consists of two phases:

(a) For phase one of the milestone inspection, a licensed
architect or engineer authorized to practice in this state shall
perform a visual examination of all habitable and nonhabitable
areas of a building and provide a qualitative assessment of the
structural conditions of the building. Surface imperfections
such as cracks, distortion, sagging, excessive deflections,
significant misalignment, signs of leakage, or peeling of
finishes constitute signs of structural distress. If the
architect or engineer finds no signs of structural distress to
any building components under visual examination, phase two of
the inspection, as provided in paragraph (b), is not required.
An architect or engineer who completes the first phase of a
milestone inspection shall prepare and submit an inspection
report pursuant to subsection (6).

(b) Phase two of the milestone inspection must be performed
if any structural distress is identified during phase one. Only
a special inspector as defined in s. 553.71 may perform a phase
two inspection. A phase two inspection may involve destructive
or nondestructive testing at the special inspector’s direction.
The inspection may be as extensive or as limited as necessary to fully assess damaged areas of the building in order to confirm that the building is safe for its intended use or to recommend a program for fully assessing and repairing damaged portions of the building. When determining testing locations, the special inspector must give preference to locations that are the least disruptive and most easily repairable while still being representative of the structure. A special inspector who completes the second phase of a milestone inspection shall prepare and submit an inspection report pursuant to subsection (6).

(6) Upon completion of a phase one or phase two milestone inspection, the architect or engineer who performed the inspection must submit a sealed copy of the inspection report to the building owner or, if the building is a condominium or cooperative, to the board of administration of the condominium or cooperative, and to the building official of the local government which has jurisdiction. For a milestone inspection of a condominium or cooperative, the board of administration must distribute a copy of each inspection report to each condominium unit owner or cooperative unit owner, regardless of whether there are deficiencies reported, and, if the association is required by law to have a website, must publish the report on the association’s website.

(7) A local enforcement agency may prescribe timelines and penalties with respect to compliance with this section.

(8) The commission shall develop comprehensive structural and life safety standards for maintaining and inspecting all building types and structures in this state by December 31,
2022. The standards are in addition to those provided in this section and must be made available for local governments to adopt at their discretion.
