Prepared By: The Professional Staff of the Committee on Military and Veterans Affairs, Space, and Domestic Security

---

BILL: SB 1712

INTRODUCER: Senator Burgess

SUBJECT: Veteran Suicide Prevention Training Pilot Program

DATE: January 24, 2022

REVISED: \_\_\_\_\_

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	<u>Brown</u>	<u>Caldwell</u>	<u>MS</u>	<u>Pre-meeting</u>
2.	_____	_____	<u>AHS</u>	_____
3.	_____	_____	<u>AP</u>	_____

---

**I. Summary:**

Senate Bill 1712 requires the Department of Veterans' Affairs (department) to establish and oversee the Veteran Suicide Prevention Training Pilot Program (program). The purpose of the program is to provide training and certification in preventing veteran suicide to agency claims examiners and county and city veteran service officers. To provide training curriculum, the department will contract with an organization established in developing and implementing veteran-relevant and evidence-based suicide prevention training.

Program participants must be trained in identifying indicators of elevated suicide risk and providing emergency crisis referrals for veterans in emotional or psychological distress.

The bill requires the department to adopt rules, and submit a report to the President of the Senate and the Speaker of the House of Representatives by June 30 of each year. The report will provide information on the pilot program and recommend whether changes should be made to increase effectiveness. In the report to be submitted by June 30, 2026, the department will recommend whether the pilot program should be continued.

A non-recurring appropriation of \$500,000 is provided in the bill.

## II. Present Situation:

### Veteran Population and Suicide

#### *Veteran Population and Demographics*

As of 2017, 20 million veterans live in the United States, of which nearly 2 million are women.<sup>1</sup> Only about half of veterans nationally receive or access at least one benefit from the Veterans Administration.<sup>2</sup> Third to only California and Texas, Florida has more than 1.5 million veterans.<sup>3</sup> Of these:

- 1.17 million are wartime veterans;
- 350,000 are peacetime veterans;
- 31,000 are World War II veterans;
- 105,000 are Korean War veterans;
- 498,000 are Vietnam-era veterans;
- 188,000 are Gulf War veterans; and
- 177,494 are Post-9/11 veterans.<sup>4</sup>

#### *Mental Health of Veterans*

Veterans are known to have higher levels of mental distress than non-veterans. In a 2014 study, almost 1 in 4 veterans showed symptoms of mental illness.<sup>5</sup> Predominant mental health diagnoses among veterans are:

- Posttraumatic Stress Disorder (PTSD) at a rate of 15 times that of the general population;
- Depression at a rate of 5 times that of the general population; and
- Traumatic Brain Injury (TBI).<sup>6</sup>

Veterans who have a diagnosable mental health illness are at a much higher risk of suicide than veterans without mental illness. A 2017 study of Veterans Health Administration patients (VHA) shows a more than double rate of suicide among veterans with a mental health or substance use disorder than persons without these diagnoses.<sup>7</sup>

#### *Substance Use Disorder by Veterans*

Substance use is considered to constitute a substance use disorder if the:

<sup>6</sup> *Id.*

<sup>7</sup> The rate of suicide among VHA patients with mental health illness at the time of the study was 57 patients per 100,000. Rand Corporation, *Suicide Among Veterans/Veterans' Issues in Focus*, available at <https://www.rand.org/pubs/perspectives/PEA1363-1.html> (last visited Oct. 22, 2021) (pg. 4).

Recurrent use of alcohol and/or drugs causes clinically significant impairment, including health problems, disability, and failure to meet major responsibilities at work, school, or home.<sup>8</sup>

Substance use disorder is marked among veterans, the most prevalent being alcohol binge drinking and at a higher rate of use than by non-veterans.<sup>9</sup> The rate of illegal drug use, primarily marijuana (marijuana use for recreational purposes is still illegal in most states) is about the same for veterans and the general population.<sup>10</sup> Despite efforts by the VHA and other agencies in recent decades to reduce substance use disorder among veterans, rates continue to increase.<sup>11</sup> This is especially so for prescription opioid use.<sup>12</sup> Substance use disorder is correlated to medical ailments, other psychiatric disorders, relationship and employment impairment, and increased rates of suicidal ideation, attempts, and completion.<sup>13</sup> In a study on military personnel, researchers found that 30 percent of suicides were preceded by alcohol or drug use, while 20 percent of high-risk-behavior deaths were attributed to alcohol or drug overdose.<sup>14</sup>

### ***Military Sexual Trauma***

Military sexual trauma is an occurrence or occurrences of sexual harassment or sexual assault that has taken place during military service.<sup>15</sup> Researchers have found a clear association between military sexual trauma and suicide.<sup>16</sup> Early data finds that 1 of 4 survivors of military sexual trauma report non-suicidal self-injury.<sup>17</sup> Relatedly, non-suicidal self-injury correlates to suicidal ideation, planning, and attempts.<sup>18</sup>

### ***Suicide Rates Attributed to Service During Post 9/11 Conflict***

An estimated cumulative 7,057 servicemembers have died in service throughout the Post 9/11 era. A much higher rate of 30,000 active duty personnel and veterans who previously served during the Post-9/11 era have died by suicide, or 4 times as many that died in service.<sup>19</sup> Identified causes vary.

<sup>19</sup> Thomas Howard Suitt, III, Watson Institute, International & Public Affairs, Brown University, *High Suicide Rates among United States Service Members and Veterans of the Post-9/11 Wars*, available at [https://watson.brown.edu/costsofwar/files/cow/imce/papers/2021/Suitt\\_Suicides\\_Costs%20of%20War\\_June%2021%202021.pdf](https://watson.brown.edu/costsofwar/files/cow/imce/papers/2021/Suitt_Suicides_Costs%20of%20War_June%2021%202021.pdf) (June 21, 2021) (pgs. 1, 3).

There are clear contributors to suicidal ideation like high exposure to trauma [(mental, physical, moral, and sexual),] stress and burnout, the influence of the military's hegemonic masculine culture, continued access to guns, and the difficulty of reintegrating into civilian life. ... [W]e must also examine unique elements of the U.S. post-9/11 wars. ... [W]e have seen a tremendous rise of improvised explosive devices (IEDs) in warfare, significantly increasing the number of traumatic brain injuries (TBIs), and polytrauma cases among service members.<sup>20</sup>

As many as 20 percent of post-9/11 servicemembers have experienced TBI's, with many exposed to repetitive damage.<sup>21</sup>

### ***Suicide Rates Disparity between Veterans and Non-Veterans***

From the latest data reported for 2019, 553 veterans died by suicide in Florida, 524 men and 29 women, while nationally, 6,261 veterans died by suicide.<sup>22</sup> Suicide rates are highest among the youngest veterans, aged 18-29 years of age.<sup>23</sup> In comparing suicide rates between the veteran and non-veteran population, in 2019 the rate of suicide by the general population in Florida is 19.6 per 100,000 persons while that for Florida veterans, is 35.7.<sup>24</sup> A similar disparity exists at the national level, 18.0 per 100,000 for the general population and 31.6 for veterans.<sup>25</sup> More than 70 percent of the time, a firearm was used to die by suicide.<sup>26</sup>

That the Covid pandemic contributed to a significant increase in feelings of loss, anxiety, and depression is well-documented.<sup>27</sup> Lesser known is the impact of the pandemic on suicide and if there is one, any changes that occur over a period of time. Also, unknown at this time is whether the marked disparity in rates of suicide between veterans and non-veterans will trend differently in coming years.

### **Suicide Intervention Programs**

#### ***Federal Programs***

Suicide prevention is a top clinical priority of the U.S. Department of Veterans Affairs. In 2018, the department implemented a 10-year strategy for preventing veteran suicide.<sup>28</sup> This approach to suicide prevention involves a veteran's family, peers, and community. The plan also includes specific outreach to veterans who do not access services of the VA.<sup>29</sup>

<sup>29</sup> *Id.* at 1.

Initiatives include:

- Enhancing mental health services for veterans who are women;
- Broadening telehealth;
- Developing free-of-charge mobile applications for veterans and their families;
- Improving access to mental health care; and
- Helping families of veterans by telephone.<sup>30</sup>

In implementing its plans, the VA partners with other government agencies and organizations at both the national and local level to share information and training on suicide prevention.<sup>31</sup> To reach suicide prevention at the state level, the VA, along with the Substance Abuse and Mental Health Service Administration (SAMHSA), initiated the “Governor’s Challenge to Prevent Suicide Among Service Members, Veterans, and their Families.”<sup>32</sup> The goal of this program is to implement a uniform comprehensive suicide prevention plan, from the national to the state level. To date, 35 states have joined the challenge.<sup>33</sup> Florida is a member.<sup>34</sup>

The Veterans COMPACT Act of 2020 enables the Veterans Administration to implement programs providing mental health assistance to transitioning servicemembers and improving services for veterans who are women. The law also authorizes a non-VA facility to get reimbursed for providing a veteran emergent suicide care.<sup>35</sup>

Most recently, in November 2021, the White House unveiled a plan to advance a comprehensive, cross-sector, evidence-based strategy for reducing suicide rates among servicemembers and veterans.<sup>36</sup> This plan adds several priority goals to the existing and ongoing comprehensive plan, which are:

- Improving lethal means safety, by inserting time and distance between a person in crisis and access to lethal means, such as a firearm or medication;
- Enhancing crisis care and facilitating care transitions, including stabilization services;
- Increasing access to and delivery of evidence-based treatment;
- Addressing upstream risk (leading up to crisis) and protective factors in furthering prevention efforts; and
- Bridging interagency coordination.<sup>37</sup>

### ***State Programs***

The 2021 Legislature created the Florida Veterans' Care Coordination Program (program), to be established by the Department of Veterans' Affairs (department).<sup>38</sup> To provide services, the department may contract with a nonprofit, accredited entity to provide by phone dedicated behavioral health care referral services, through the state's 211 Network.<sup>39</sup> The program is modelled after the proof-of-concept pilot program created in 2014 by the Crisis Center of Tampa Bay and the Department of Veterans' Affairs in Hillsborough, Pasco, Pinellas, Polk, and Manatee counties.<sup>40</sup> A key goal of the program is to prevent suicide by veterans.<sup>41</sup>

### **County and City Veteran Service Officers and Agency Claims Examiners**

Current law authorizes each board of county commissioners to approve the hire of a county veteran service officer.<sup>42</sup> Likewise, the governing body of a city may employ a city veteran service officer.<sup>43</sup> To qualify, an applicant must be a veteran who:

- Served in the United States Armed Forces during a period of war;
- Served at least 18 months' active duty; and
- Was discharged under honorable conditions.<sup>44</sup>

A surviving spouse may instead be hired, provided that the veteran spouse met those qualifications.<sup>45</sup>

The applicant must additionally have a minimum of a 2-year degree from an accredited institute of higher education, or a high school degree or its equivalent and 4 years of administrative experience.<sup>46</sup>

The Department of Veterans' Affairs (department) provides the training program for county and city veteran service officers.<sup>47</sup> Every county or city veteran service officer must attend training and successfully complete a test administered by the department. The department shall further establish periodic training refresher courses. Completion of these courses is a condition of continuing employment.<sup>48</sup>

To date, the department has on staff 89 veteran claims examiners statewide, typically sited at U.S. Veterans Affairs Medical Facilities. Additionally, each county has at least one veteran service officer.<sup>49</sup>

### III. Effect of Proposed Changes:

This bill requires the Department of Veterans' Affairs (department) to establish and oversee the Veteran Suicide Prevention Training Pilot Program (program). The purpose of the program is to provide training and certification in preventing veteran suicide to agency claims examiners and county and city veteran service officers. To provide training curriculum, the department will contract with an organization established in developing and implementing veteran-relevant and evidence-based suicide prevention training.

Program participants must be trained in identifying indicators of elevated suicide risk and providing emergency crisis referrals for veterans in emotional or psychological distress.

The bill requires the Department to adopt rules, and submit a report to the President of the Senate and the Speaker of the House of Representatives by June 30 of each year. The report will provide information on the pilot program and recommend whether changes should be made to increase effectiveness. In the report to be submitted by June 30, 2026, the department will recommend whether the pilot program should be continued.

A non-recurring appropriation of \$500,000 is provided in the bill.

The bill takes effect July 1, 2022.

### IV. Constitutional Issues:

#### A. Municipality/County Mandates Restrictions:

None.

#### B. Public Records/Open Meetings Issues:
