

The Florida Senate
HOUSE MESSAGE SUMMARY

Prepared By: The Professional Staff of the Committee on Agriculture

[2024s01698.hms.ag]

BILL: CS/SB 1698, 1st Engrossed.
INTRODUCER: Agriculture Committee and Senator Burton
SUBJECT: Food and Hemp Products
DATE: March 6, 2024

I. Amendments Contained in Message:

House Amendment – Barcode 953311 (body with title)

II. Summary of Amendments Contained in Message:

House Amendment – Barcode 953311 modifies the definition of “attractive to children” to remove the addition of any flavoring for hemp extract intended for inhalation. Additionally, it increases the limit for total delta-9-tetrahydrocannabinol concentration for hemp extract to 5 milligrams per serving and 50 milligrams per container, versus 2 milligrams per serving and 10 milligrams per container in the underlying bill. The amendment modifies the definition of “hemp extract” to include hemp that is intended for inhalation, remove mention of synthetic or naturally occurring versions of controlled substances to clarify it applies to all controlled substances listed in s. 893.03, F.S., and specify it does not contain any quantity of synthetic cannabinoids.
