SUMMARY

Effect of the Bill:

CS/HB 1013 requires the Department of Children and Families (DCF) to establish a crisis care coordination pilot program within Polk and Volusia counties. The bill requires community health centers to partner with local law enforcement agencies under referral and information exchange agreements, which will allow crisis counselors to help involuntary examined individuals who experienced an acute mental health crisis to receive stabilizing and rehabilitative services through the local coordinated system of care network. The bill also establishes the pilot program to reduce the number of involuntary Baker Act examinations initiated by law enforcement and to alleviate the responsibility of law enforcement to handle mental health crisis events. The bill requires DCF to contract with an independent evaluator to report on the pilot program's efficacy and return-on-investment by January 15, 2029.

Fiscal or Economic Impact:

A determinate, negative fiscal impact on state government.

JUMP TO	<u>SUMMARY</u>	<u>ANALYSIS</u>	RELEVANT INFORMATION	BILL HISTORY

ANALYSIS

EFFECT OF THE BILL:

Mental Health System

When individuals experience an acute mental health crisis, <u>law enforcement</u> officers are often the first point of contact. Law enforcement officers may initiate <u>Baker Act</u> involuntary examinations of these individuals, sometimes on multiple occasions for the same individual. The bill creates a new pilot program to address this.

Crisis Care Coordination Pilot Program

CS/HB 1013 requires the Department of Children and Families (DCF) to establish a <u>Crisis Care Coordination</u> pilot program in Polk and Volusia counties so that local law enforcement officers and crisis counselors employed by nationally accredited community mental health centers can offer individuals in crisis voluntary referrals to community-based behavioral health services and other stabilizing and rehabilitative services. The purpose of the pilot is to reduce repeat involuntary examinations of these individuals in crisis. (Section <u>1</u>).

The bill requires DCF to broker formal partnership agreements between nationally accredited community mental health centers and local law enforcement agencies in Polk and Volusia counties. The bill requires these partnership agreements to establish a local, referral-based <u>coordinated system of care</u> network that law enforcement officers and crisis counselors may utilize in offering non-institutional help to individuals experiencing an acute mental health crisis. (Section <u>1</u>).

<u>Crisis Intervention</u> STORAGE NAME: h1013e.HHS DATE: 4/15/2025 Under these partnership agreements, the bill requires crisis counselors placed in law enforcement agencies to intervene in acute mental health crisis calls and help law enforcement officers deescalate acute mental health crisis emergencies. The bill requires a responding crisis counselor to also assess the individual's state and recommend community-based behavioral health service providers within the coordinated system of care. The bill requires the individual's participation to be strictly voluntary. (Section <u>1</u>).

Follow-Up Care

If the individual in crisis declines to participate, and law enforcement proceeds to perform an involuntary examination of the individual in crisis under the Baker Act, the bill requires the responding crisis counselor to provide follow-up care for the individual. This may include ongoing assessments, a customized safety plan, supportive counseling, assistance with accessing recommended referral services, assistance with adherence to the institutional discharge plan, and care coordination as appropriate. (Section <u>1</u>).

Evaluation

The bill requires DCF to contract for an independent evaluation of the pilot program which must, at a minimum, analyze the program's efficacy and return-on-investment. The evaluator must address, at a minimum, four research inquiries:

- The amount of time that law enforcement officers spent on Baker Act calls.
- Quantitative and qualitative observations about repeat Baker Act involuntary examinations initiated by law enforcement.
- Quantitative and qualitative observations about the voluntarily diverted participants in the pilot program, especially their engaged in post-crisis mental health and substance abuse services.
- The efficacy of the pilot program's service array.

In addition, the bill requires the evaluator to offer recommendations that address the topics of program enhancements, program continuation, and program expansion. The bill requires DCF to submit a final report of the independent evaluator's detailed assessment of the pilot program to the Governor, President of the Senate, and Speaker of the House by January 15, 2029. (Section <u>1</u>).

The bill conditions the implementation of the pilot program upon passage of a specific appropriation, and sunsets the pilot program on June 30, 2029. (Section $\underline{1}$).

The effective date of the bill is July 1, 2025. (Section 2).

RULEMAKING:

The bill modifies a provision of law that is already under the Department of Children and Families existing rulemaking authority, pursuant to <u>s. 394.457(5), F.S.</u>

Lawmaking is a legislative power; however, the Legislature may delegate a portion of such power to executive branch agencies to create rules that have the force of law. To exercise this delegated power, an agency must have a grant of rulemaking authority and a law to implement.

FISCAL OR ECONOMIC IMPACT:

STATE GOVERNMENT:

The bill has negative fiscal impact on DCF. The House proposed General Appropriations Act for Fiscal Year 2025-2026 does not appropriate funds to pay for the pilot program established the bill.¹

¹ In prior years, similar activities as those described by the bill were funded as non-recurring member projects; see HB 5001 General
Appropriations Act (2022) Specific Appropriation 372 (HF 2703), SB 2500 General Appropriations Act (2023) Specific Appropriation 378JUMP TOSUMMARYANALYSISRELEVANT INFORMATIONBILL HISTORY

RELEVANT INFORMATION

SUBJECT OVERVIEW:

Mental Health System

Mental illness affects millions of people in the United States each year. It is estimated that more than one in five adults live with a mental illness.² In 2023, approximately 22.8 percent of adults experienced mental illness.³

Mental Health Safety Net Services

The Department of Children and Families (DCF) administers a statewide system of safety-net services for substance abuse and mental health (SAMH) prevention, treatment and recovery for children and adults who are otherwise unable to obtain these services. SAMH programs include a range of prevention, acute interventions (e.g. crisis stabilization), residential treatment, transitional housing, outpatient treatment, and recovery support services. Services are provided based upon state and federally-established priority populations.

Behavioral Health Managing Entities

In 2001, the Legislature authorized DCF to implement behavioral health managing entities (ME) as the management structure for the delivery of local mental health and substance abuse services.⁴ The implementation of the ME system initially began on a pilot basis and, in 2008, the Legislature authorized DCF to implement MEs statewide.⁵ MEs were fully implemented statewide in 2013, serving all geographic regions.

DCF currently contracts with seven MEs for behavioral health services throughout the state. These entities do not provide direct services; rather, they allow the department's funding to be tailored to the specific behavioral health needs in the various regions of the state.⁶

Coordinated System of Care

Managing entities are required to promote the development and implementation of a coordinated system of care.⁷ A coordinated system of care means a full array of behavioral and related services in a region or community offered by all service providers, participating either under contract with a managing entity or by another method of community partnership or mutual agreement.⁸ A community or region provides a coordinated system of care for those with a mental illness or substance abuse disorder through a no-wrong-door model, to the extent allowed by available resources. If funding is provided by the Legislature, DCF may award system improvement grants to managing entities.⁹ MEs must submit detailed plans to enhance crisis services based on the no-wrong-door model

⁽HF 352), and HB 5001 General Appropriations Act (2024) Specific Appropriation 377 (HF 1214). For this year, the House proposed General Appropriations Act for Fiscal Year 2025-2026 appropriates \$500,000 in nonrecurring funds from the General Revenue Fund for the Peace River Center community mobile support team in Polk County. HB 5001 (2025) General Appropriations Act, Specific Appropriation 363. ² National Institute of Mental Health (NIH), Mental Illness, (last updated Sept. 2024) https://www.nimh.nih.gov/health/statistics/mentalillness (last visited Mar. 21, 2025).

⁸ S. 394.4573(1)(c). F.S.

⁹ S. Legislature has not funded system improvement grants. **ANALYSIS SUMMARY**

or to meet specific needs identified in DCF's assessment of behavioral health services in this state.¹⁰ DCF must use performance-based contracts to award grants.¹¹

There are several essential elements which make up a coordinated system of care, including:¹²

- Community interventions;
- Case management;
- Care coordination;
- Outpatient services;
- Residential services;
- Hospital inpatient care;
- Aftercare and post-discharge services;
- Medication assisted treatment and medication management; and
- Recovery support.

A coordinated system of care must include, but is not limited to, the following array of services:¹³

- Prevention services;
- Home-based services;
- School-based services;
- Family therapy;
- Family support;
- Respite services;
- Outpatient treatment;
- Crisis stabilization;
- Therapeutic foster care;
- Residential treatment;
- Inpatient hospitalization;
- Case management;
- Services for victims of sex offenses;
- Transitional services; and
- Trauma-informed services for children who have suffered sexual exploitation.

Mobile Response Teams

As of March 21, 2025, DCF has 55 Mobile Response Teams (MRTs) under contract, strategically stationed across the state, and ready to deploy 24/7 at a moment's notice to provide emergency on-site behavioral health crisis services to Floridians in need.¹⁴ The MEs procure contracts with local mental health and behavioral health providers for MRT staffing and services.¹⁵ These providers professionally staff MRTs with licensed mental health professionals, certified peer recovery specialists, on-call psychiatrists and psychiatric nurse practitioners, and support staff.¹⁶ MRT services consist of brief crisis intervention services, which includes crisis screenings and assessment, crisis de-escalation and stabilization services, crisis counseling, safety planning, psychoeducation, and short-term targeted follow-up to help with the transition to ongoing care.¹⁷

Current law requires MRTs to serve, at a minimum, children, adolescents, and young adults ages 18 to 25 who manifest any of the following acute mental health crisis symptoms:¹⁸

- Have an emotional disturbance;
- Are experiencing an actual mental or emotional crisis;
- Are experiencing escalating emotional or behavioral reactions and symptoms that impact their ability to function typically within the family, living situation, or community environment; or
- Are served by the child welfare system and are experiencing or are at high risk of placement instability.

Current law sets the minimum standards for MRTs. At a minimum, MRTs must: ¹⁹

- Triage and prioritize requests, then, to the extent permitted by available resources, respond in person within 60 minutes of prioritization;
- Respond to a crisis in the location where the crisis is occurring;
- Provide behavioral health crisis-oriented services that are responsive to the needs of the child, adolescent, or young adult and his or her family and enable them to deescalate and respond to behavioral health challenges through evidence-based practices;
- Provide screening, standardized assessments, early identification, and referrals to community services;
- Provide care coordination by facilitating the transition to ongoing services;
- Ensure a process for informed consent and confidentiality compliance measures is in place;
- Promote information sharing and the use of innovative technology; and
- Coordinate with the managing entity and other key entities providing services and supports to the child, adolescent, or young adult and their family.

The Baker Act

The Florida Mental Health Act, commonly referred to as the <u>Baker Act</u>, was enacted in 1971 to revise the state's mental health commitment laws.²⁰ The Act includes legal procedures for mental health examination and treatment, including voluntary and involuntary examinations. It additionally protects the rights of all individuals examined or treated for mental illness in Florida.²¹

Involuntary Examination

Individuals in an acute mental health crisis may require emergency treatment to stabilize their condition. Emergency mental health examination and stabilization services may be provided on a voluntary or involuntary basis.²² Certain courts or authorized individuals may initiate an involuntary examination if there is reason to believe that the person of concern has a mental illness and, because of that mental illness:

- has refused voluntary examination,
- is likely to refuse to care for him or herself to the extent that such refusal threatens to cause substantial harm to that person's well-being, and
- such harm is unavoidable through the help of willing, able, and responsible family members or friends, or will cause serious bodily harm to him or herself or others in the near future based on recent behavior.²³

An involuntary examination may be initiated by:

• a circuit or county court entering an ex parte order stating that a person appears to meet the criteria for involuntary examination, based on sworn testimony;²⁴

ANALYSIS

¹⁸ S. <u>394.495(7)(a), F.S.</u>, see <u>s. 394.495(1), F.S.</u>, see <u>s. 394.495(5)(q), F.S.</u>

¹⁹ S. <u>394.495(7)(b), F.S.</u>

²⁰ The Baker Act is contained in Part I of ch. 394, F.S.

²¹ S. <u>394.459, F.S.</u>

²² Ss. 394.4625 and <u>394.463, F.S.</u>

²³ S. <u>394.463(1), F.S.</u>

²⁴ S. 394.463(2)(a)1., F.S. The order of the court must be made a part of the patient's clinical record.

- a law enforcement officer taking a person who appears to meet the criteria for involuntary examination into custody and delivering the person or having him or her delivered to a receiving facility for examination:25 or
- a physician, clinical psychologist, psychiatric nurse, an autonomous advanced practice registered nurse, mental health counselor, marriage and family therapist, or clinical social worker executing a certificate stating that he or she has examined a person within the preceding 48 hours and finds that the person appears to meet the criteria for involuntary examination, including a statement of the professional's observations supporting such conclusion.²⁶

Involuntary patients must be taken to either a public or a private facility that has been designated by DCF as a Baker Act receiving facility. Under the Baker Act, a receiving facility has up to 72 hours to examine an involuntary patient.²⁷ During that 72 hours, an involuntary patient must be examined by a physician or a clinical psychologist, or by a psychiatric nurse performing within the framework of an established protocol with a psychiatrist at a facility, to determine if the criteria for involuntary services are met.²⁸ The 72-hour examination period begins when the patient arrives at the receiving facility. However, if the patient is a minor, a receiving facility must initiate the examination within 12 hours of arrival.²⁹

Law Enforcement

Individuals in mental health crisis are more likely to encounter law enforcement than to receive a coordinated crisis care response.³⁰ The Florida Criminal Justice Executive Institute (FCJEI), the research and educational arm of the Florida Department of Law Enforcement,³¹ published a commanding officer's independent research project to document law enforcement's response to community mental health crisis events. The literature review component emphasized the dangers associated with mental health crisis, the strain on police resources, criticism of police response, liability issues, and training challenges. The poll-based survey of 68 police departments across the state measured the amount of Baker Acts completed during the 2021 calendar year. Of the 33 police departments³² that responded, 23 departments completed more than 90 Baker Act crisis calls during 2021. In addition, all 33 responding departments indicated they repeatedly respond to certain individuals experiencing recurring mental health crises.³³

²⁵ S. 394.463(2)(a)2., F.S. The officer must execute a written report detailing the circumstances under which the person was taken into custody, and the report must be made a part of the patient's clinical record. If transporting a minor and the parent or legal guardian of the minor is present, the law enforcement officer must provide the parent or legal guardian of the minor the name, address, and contact information of the receiving facility to which the minor is being transported.

²⁶ S. 394.463(2)(a)3., F.S. The report and certificate shall be made a part of the patient's clinical record.

³³ Marcos Ramirez, "Officer's Response to Community Mental Health Crisis," Florida Criminal Justice Executive Institute, (May 2022, SLP – 24) https://www.fdle.state.fl.us/FCJEI/Programs/SLP/SLP-Papers-by-Author.aspx (last visited Mar. 21, 2025). This independent research project was published as a part of FCJEI's Senior Leadership Program and the Executive Future Studies Program. **SUMMARY ANALYSIS RELEVANT INFORMATION**

The FCJEI survey also revealed that any partnership between law enforcement and mental health professionals in Florida is a discretionary decision made at the police department level. At the time of the report's publication:³⁴

- Seven police departments were considering partnerships.
- Six police departments were not considering partnerships.
- Ten police departments entered partnerships.
- Three police departments offered nuanced answers.

Co-Response Models

The co-responder model pairs at least one law enforcement officer and one mental health or substance abuse professional together to coordinate a joint response in real-time to a possible behavioral health crisis event.³⁵ This model provides appropriate alternatives to arrest, officer use of force, hospitalizations and promotes the development of and access to quality mental health treatment and services. This model allows the mental health or substance abuse professional to follow-up with individuals and families after a crisis to decrease the probability of a future acute mental health crisis, a counterproductive diversion through the criminal justice system, and an unnecessary psychiatric hospitalization.³⁶

Crisis Care Coordination Model

<u>Crisis care coordination</u> is a hybrid co-response model, tailored to meet the needs of less densely populated counties with smaller government workforces. The traditional co-response model, first implemented by the Los Angeles County Sheriff's Department and the Los Angeles Police Department in the early 1990s, both incorporated the support of the Los Angeles County Department of Mental Health, which manifested a whole-of-government approach to acute mental health crisis 911 calls.³⁷ However, a whole-of-government approach only works as well as a government can serve the demand of the area within its existing resources; as such, the traditional co-response model favors larger government workforces.

Through crisis care coordination, local law enforcement agencies and local community-based behavioral health providers partner to serve individuals experiencing, or who did experience, an acute mental health crisis. In this way, public and private sector professionals work together to deescalate acute mental health crises in real-time to divert individuals in crisis away from an involuntary examination under the Baker Act and to utilize a local, referral-based coordinated system of care network to help these individuals avoid institutional placements. However, if these individuals in crisis are involuntary placed in institutional care, the crisis counselors still utilize the same referral-based coordinated system of care network to offer voluntary follow-up care plans to these individuals to reduce Baker Act recidivism.

The crisis care coordination model adapts the traditional co-response model to the needs of counties less densely populated and with smaller government workforces by soliciting the help of community-based behavioral health providers. The goal remains the same: to help individuals avoid involuntary commitments, to help individuals receive ongoing stabilizing and rehabilitative care within their communities, and to relieve the time burden on law enforcement officers.

BILL HISTORY								
COMMITTEE REFERENCE	ACTION	DATE	STAFF DIRECTOR/ POLICY CHIEF	ANALYSIS PREPARED BY				
Human Services Subcommittee	17 Y, O N, As CS	3/25/2025	Mitz	DesRochers				
THE CHANGES ADOPTED BY THE COMMITTEE:	 Creates a new section of law within Part IV of Chapter 394 for the Crisis Care Coordination Pilot Programs in Polk and Volusia counties to reduce repetitive, law enforcement-initiated, involuntary examinations of persons experiencing acute mental health crises. Creates local partnerships between nationally accredited community mental health centers and law enforcement to help law enforcement divert individuals previously involuntary examined under the Baker Act to crisis counselors so that persons who experienced an acute mental health crisis can, on a voluntary basis, receive ongoing, community-based, stabilizing and rehabilitative services. Requires that these partnerships be memorialized in written referral agreements. Requires DCF to submit a report of the independent evaluator's detailed assessment of the pilot programs efficacy and return-on-investment to the Governor, President of the Senate, and Speaker of the House by January 15, 2029.
