

The Florida Senate
BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Appropriations Committee on Health and Human Services

BILL: CS/CS/SB 526

INTRODUCER: Appropriations Committee on Health and Human Services; Health Policy Committee;
and Senators Harrell and Sharief

SUBJECT: Nursing Education Programs

DATE: April 17, 2025

REVISED: _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION

Please see Section IX. for Additional Information:

COMMITTEE SUBSTITUTE - Substantial Changes

I. Summary:

CS/CS/SB 526 amends s. 464.019, F.S., related to the approval of nursing education programs, to:

- Establish graduate nursing preceptorship programs;
- Require the Department of Health (DOH) to issue provisional licenses to graduates of the nursing preceptorship program;
- Revise program application requirements;
- Authorize the Board of Nursing (BON) to deny certain program applications;
- Revise annual reporting requirements and authorize the BON to terminate programs that do not meet reporting requirements;
- Revise the criteria by which the BON may terminate a program for not meeting certain graduate passage rates;
- Authorize the DOH to conduct onsite inspections to determine compliance;
- Revise the BON rule-making authority; and
- Repeal the BON's rule-making authority to grant an extension of the accreditation deadline.

The bill will have a significant, negative fiscal impact on state expenditures. **See Section V., Fiscal Impact Statement.**

The bill takes effect 1, 2025.

II. Present Situation:

Florida Postsecondary Nursing Education Programs

As of January 9, 2025, the Florida Board of Nursing (BON) has approved 314 Registered Nurse (RN) programs, five Professional Diploma programs, and 194 Practical Nursing (LPN) programs for pre-licensure education.¹ Pre-licensure nursing programs include pre-licensure programs offered by Florida's state universities, colleges, public school districts, private institutions licensed by the Florida Commission for Independent Education (CIE), private institutions that are members of the Independent Colleges and Universities of Florida (ICUF), and religious institutions authorized by law to offer nursing programs.²

Post-licensure nursing programs advance the training of licensed RNs and include Registered Nurse to Bachelor of Science in Nursing (RN to BSN), Master of Science in Nursing (MSN), Doctor of Nursing Practice (DNP), Doctor of Philosophy (Ph.D.) programs, and nursing certificates. Upon completion of some master's and doctorate programs, RNs transition to an advanced practice registered nurse (APRN) license. These roles include nurse practitioner (NP), certified nurse midwife (CNM), clinical nurse specialist (CNS), psychiatric mental health nurse practitioner, and certified registered nurse anesthetist (CRNA).³

Pre-licensure Nursing Education Programs

Educational institutions that wish to conduct a program in Florida for the pre-licensure education of RNs or LPNs must meet specific requirements to be approved by the BON.⁴ The program application must include the legal name of the educational institution, the legal name of the nursing education program, and, if such institution is accredited, the name of the accrediting agency. The application must also document:⁵

- For an RN education program, the program director and that at least 50 percent of the program's faculty members must be RNs who have a master's degree or higher in nursing or a bachelor's degree in nursing and a master's or higher degree in a field related to nursing;
- For an LPN education program, the program director and at least 50 percent of the program's faculty members must be RNs who have a bachelor's degree or higher in nursing;
- The program's nursing major curriculum consists of at least:
 - Fifty percent clinical training in the U.S., the District of Columbia (D.C.), or a possession or territory of the U.S. for an LPN, ARN, or a diploma RN;
 - Forty percent of clinical training in a U.S. state, D.C., or a possession or territory of the U.S. for a Bachelor of Science degree RN education program, and no more than 50 percent of the program's clinical training may consist of clinical simulation;

³ *Id.*

⁴ Section. 464.019, F.S. and Florida Board of Nursing, *Education and Training Programs*, available at <https://floridasnursing.gov/education-and-training-programs/> (last visited Feb. 28, 2025).

⁵ Section 464.019(1), F.S.

- The RN and LPN educational degree requirements may be documented by an official transcript or by a written statement from the educational institution verifying that the institution conferred the degree;
- The program must have signed agreements with each agency, facility, and organization included in the curriculum plan as clinical training sites and community-based clinical experience sites;
- The program must have written policies for faculty which include provisions for direct or indirect supervision by faculty or clinical preceptors for students in clinical training consistent with the following standards;
 - The number of program faculty members must equal at least one faculty member directly supervising every 12 students unless the written agreement between the program and the agency, facility, or organization providing clinical training sites allows more students, not to exceed 18, to be directly supervised by one program faculty member;
 - For a hospital setting, indirect supervision may occur only if there is direct supervision by an assigned clinical preceptor and a supervising program faculty member is available by telephone, and such arrangement is approved by the clinical facility;
 - For community-based clinical experiences that involve student participation in invasive or complex nursing activities, students must be directly supervised by a program faculty member or clinical preceptor and such arrangement must be approved by the community-based clinical facility;
 - For community-based clinical experiences not involving student participation in invasive or complex nursing activities, indirect supervision may occur only when a supervising program faculty member is available to the student by telephone; and
 - A program's clinical training policies must require that a clinical preceptor who is supervising students in an RN education program be an RN or, if supervising students in an LPN education program, be an RN or LPN;
- The RN or LPN nursing curriculum plan must document clinical experience and theoretical instruction in medical, surgical, obstetric, pediatric, and geriatric nursing. An RN curriculum plan must also document clinical experience and theoretical instruction in psychiatric nursing. Each curriculum plan must document clinical training experience in appropriate settings that include, but are not limited to, acute care, long-term care, and community settings;
- An RN or LPN education program must provide theoretical instruction and clinical application in the following:
 - Personal, family, and community health concepts;
 - Nutrition;
 - Human growth and development throughout the lifespan;
 - Body structure and function;
 - Interpersonal relationship skills;
 - Mental health concepts;
 - Pharmacology and administration of medications; and
 - Legal aspects of practice; and
- An RN nursing education program must also provide theoretical instruction and clinical experience in:
 - Interpersonal relationships and leadership skills;
 - Professional role and function; and
 - Health teaching and counseling skills.

Program Approval Process

Upon receipt of a program application and the required fee, the Department of Health (DOH) must examine the application to determine if it is complete. If the application is not complete, the DOH must notify the educational institution in writing of any errors or omissions within 30 days after the DOH's receipt of the application. A program application is deemed complete upon the DOH's receipt of:

- The initial application, if the DOH does not notify the educational institution of any errors or omissions within the initial 30-day period after receipt; or
- Upon receipt of a revised application that corrects each error and omission that the DOH has notified the applicant of within the initial 30-day period after receipt of the application.⁶

Once a complete application is received, the BON may conduct an onsite evaluation if necessary to document the applicant's curriculum and staffing. Within 90 days after the DOH's receipt of the complete program application, the BON must:

- Approve the application; or
- Provide the educational institution with a Notice of Intent to Deny if information or documents are missing.⁷

The notice must specify in writing the reasons for the BON's denial of the application, and the BON may not deny an application because an educational institution failed to correct an error or omission that the DOH failed to notify the institution of within the 30-day notice period. The educational institution may request a hearing on the Notice of Intent to Deny the application pursuant to ch. 120, F.S. A program application is deemed approved if the BON does not act within the 90-day review period. Upon the BON's approval of a program application, the program becomes an "approved" program.⁸

Approved Nursing Pre-licensure Education Programs Annual Report

Each approved pre-licensure education program must submit to the BON an annual report by November 1, which must include:

- An affidavit certifying continued compliance with s. 465.019(1), F.S.;
- A summary description of the program's compliance with s. 465.019(1), F.S.; and
- Documentation for the previous academic year that describes:
 - The number of student applications received, qualified applicants, applicants accepted, accepted applicants who enroll in the program, students enrolled in the program, and program graduates;
 - The program's retention rates for students tracked from program entry to graduation; and
 - The program's accreditation status, including identification of the accrediting agency.⁹

⁶ Sections 464.019(2) and 464.003(4), F.S.

⁷ *Id.*

⁸ *Id.*

⁹ Section 464.019(3), F.S.

If an approved program fails to submit the required annual report, the BON must notify the program director and president or chief executive officer of the institution in writing within 15 days after the due date. The program director must appear before the BON to explain the delay. If the program director fails to appear, or if the program does not submit the annual report within six months after the due date, the BON must terminate the program.¹⁰

Approved Nursing Pre-licensure Education Programs Accountability

Graduate Passage Rates

An approved nursing pre-licensure education program must achieve a graduate National Council of State Boards of Nursing Licensing Examination (NCLEX) passage rate of first-time test takers which is not more than ten percentage points lower than the average passage rate during the same calendar year for graduates of comparable degree programs who are U.S. educated, first-time test takers, as calculated by the contracted testing service of the National Council of State Boards of Nursing.¹¹

For purposes of s. 464.019(5), F.S., an approved program is comparable to all degree programs of the same program type from among the following program types:¹²

- RN nursing education programs that terminate in a bachelor's degree;
- RN nursing education programs that terminate in an associate degree;
- RN nursing education programs that terminate in a diploma; and
- LPN nursing education programs.

If an approved program's graduate passage rates do not equal or exceed the required passage rates for two consecutive calendar years, the BON must place the program on probationary status and the program director must appear before the BON to present a remediation plan, which must include specific benchmarks to identify progress toward a graduate passage rate goal. The program must remain on probationary status until it achieves a graduate passage rate that equals or exceeds the required passage rate for any one calendar year.¹³

The BON must deny a program application for a new pre-licensure nursing education program submitted by an educational institution if the institution has an existing program that is already on probationary status. Upon the program's achievement of a graduate passage rate that equals or exceeds the required passage rate, the BON must remove the program's probationary status.

If the program, during the two calendar years following its placement on probation, does not achieve the required passage rate for any one calendar year, the BON may extend the program's probationary status for one additional year if certain criteria are met. If the program is not granted the one-year extension or fails to achieve the required passage rate by the end of the extension, the BON must terminate the program. If students from a program that is terminated transfer to an approved or accredited program under the direction of the Commission for Independent Education, the BON must recalculate the passage rates of the programs receiving

¹⁰ Section 464.019(5), F.S.

¹¹ Section 464.019(5), F.S.

¹² *Id.*

¹³ *Id.*

the transfer students and exclude the test scores of those students transferring more than 12 credits.¹⁴

An “accredited” nursing education program is a program for the pre-licensure education of RNs or LPNs that is conducted at a U.S. educational institution, whether in Florida, another state, or D.C., and that is accredited by a specialized nursing accrediting agency that is nationally recognized by the U.S. Secretary of Education to accredit nursing education programs.¹⁵ Accredited programs do not have to meet requirements related to program application, approval, or submission of annual reports to the BON.¹⁶

All approved and accredited programs must meet accountability requirements related to the graduate passage rate on the NCLEX.

All approved nursing programs, except those specifically excluded,¹⁷ must seek accreditation within five years of enrolling the program’s first students.¹⁸ An approved program that has been placed on probation must disclose its probationary status in writing to the program’s students and applicants.¹⁹ If an accredited program ceases to be accredited, the educational institution conducting the program must provide written notice to that effect to the BON, the program’s students and applicants, and each entity providing clinical training sites or experiences. It may then apply to be an approved program.²⁰

Board of Nursing Rulemaking Authority

The BON does not have rulemaking authority to administer s. 464.019, F.S., except:

- The BON must adopt rules that prescribe the format for submitting program applications and annual reports, and to administer the documentation of the accreditation of nursing education programs.²¹
- The board may adopt rules relating to the nursing curriculum, including rules relating to the uses and limitations of simulation technology, and rules relating to the criteria to qualify for an extension of time to meet the accreditation requirements.²²

¹⁴ Section 464.019(5), F.S.

¹⁵ Section 464.003(1), F.S. Eligible institutional and accrediting Agencies available to Florida Nursing Programs are: Accreditation Commission for Education in Nursing (ACEN), Inc., formerly, National League for Nursing Accrediting Commission; Commission on Collegiate Nursing Education (CCNE)); National League for Nursing Commission for Nursing Education Accreditation (NLN CNEA); National Nurse Practitioner Residency and Fellowship Training Consortium;. and Florida Board of Nursing, *See* U.S. Department of Education, Accreditation in the U.S., available at https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/college-accreditation-united-states/college-accreditation-in-the-united-states--pg-4#National_Institutional#National_Institutional (last visited Feb. 28, 2025); and Florida Board of Nursing, *What is the difference between an “approved” and an “accredited” pre-licensure nursing education program in Florida?* available at <https://floridasnursing.gov/help-center/what-is-the-difference-between-an-approved-and-an-accredited-pre-licensure-nursing-education-program-in-florida/> (last visited Feb. 28, 2025).

¹⁶ Section 464.019(9), F.S.

¹⁷ Excluded institutions are those exempt from licensure by the Commission of Independent Education under ss. 1005.06(1) and 464.019(11)(d), F.S.

¹⁸ Section 464.019(11)(a)-(d), F.S.

¹⁹ *Id.*

²⁰ Section 464.019(9)(b), F.S.

²¹ Section 464.019(8), F.S.

²² *Id.*

Under these rulemaking requirements and authority, the BON may not impose any condition or requirement on an educational institution submitting a program application, an approved program, or an accredited program, except as expressly provided in s. 464.019, F.S.²³

III. Effect of Proposed Changes:

The bill amends s. 464.019, F.S., to establish graduate nursing preceptorship programs. Beginning August 1, 2026, any nursing education program with National Council of State Boards of Nursing Licensing Examination (NCLEX) passage rates more than 10 percentage points below the state average must offer a graduate nursing preceptorship to its graduates. These structured, three-month programs are encouraged to offer job shadowing, supervised clinical and nonclinical training, and direct patient care in hospital settings. Graduates are expected to sit for the NCLEX at the conclusion of the preceptorship.

The Department of Health (DOH) is required to issue temporary provisional licenses to graduates who meet all licensure requirements except for the passage of the NCLEX. All provisional licensees must be supervised by clinical preceptors. The DOH shall issue a temporary provisional registered nurse license to a graduate of a registered nursing program or a temporary provisional licensed practical nurse license to a graduate of a licensed practical nursing program. (See also Section 1 amending s. 464.008, F.S., as it relates to Licensure by Examination).

Graduate nursing preceptorship programs must offer free remediation to any graduate who fails the NCLEX after completing a preceptorship. By January 1, 2026, the Florida Center for Nursing is required to develop preceptorship standards, including supervision protocols. The Board of Nursing (BON) is required to adopt those standards into rule.

The bill also adds the following requirements to the application process for nursing education program approval:

- The legal name of the nursing education program director must be included;
- The nursing educational program's annual report to BON must be submitted by the program director;
- The nursing education program must have evaluation and standardized admission criteria that identify students who are likely to need additional educational support and a student academic support plan; and
- The nursing education program must administer a national, standardized, comprehensive predictor examination as an exit examination to prepare nursing students for the NCLEX;
 - This type of comprehensive examination:
 - Must assess students' readiness for the NCLEX by identifying areas needing further study and remediation.
 - May not be the sole exclusion to graduation if the student has otherwise completed all coursework required by the program.

²³ Section 464.019(8), F.S.

The nursing education program must submit to the BON established criteria for remediation that will be offered to students who do not successfully pass the exit examination.

The bill requires the BON to deny an application from a nursing education program that has had adverse action taken against it by another regulatory jurisdiction in the U.S. The BON may also revoke the approval of an existing approved program that has had adverse action taken against it by another regulatory jurisdiction in the U.S. The term, “adverse action,” is defined as any administrative, civil, or criminal action imposed by a licensing board or other state authority against a nursing education program. The term includes actions such as revocation, suspension, probation, or any other encumbrances affecting the program’s authorization to operate.

The bill authorizes the BON to terminate a program for not submitting its annual report, however, the BON may give an extension of time, not to exceed 60 days, for a program’s submission of its annual report, upon request and for good cause. If a program director fails to timely submit the program’s annual report, the BON may impose a penalty listed in s. 456.072(2) on the program director.

The bill requires the BON to publish NCLEX passage rates for each individual nursing program on its website.

The bill requires the program director to submit to the BON a written remediation plan with specific nationally-recognized benchmarks to identify progress toward a graduate passage rate goal, and to present that plan to the BON. If the program director fails to submit the required written remediation plan, or fails to appear before the BON to present the remediation plan no later than six months after the date of the program being placed on probation, the bill requires the BON to terminate the nursing education program and may impose a penalty listed in s. 456.072(2) on the program director for failing to perform any statutory or legal obligation placed upon a licensee.

The bill authorizes agents or employees of the Department of Health (DOH) to conduct onsite evaluations or inspections at any time during business hours to ensure that approved programs or accredited programs are in full compliance with ch. 464, F.S., or to determine whether ch. 464, F.S., or s. 456.072, F.S., is being violated. The DOH may collect any evidence necessary or as required to ensure compliance with ch. 464, F.S. or for prosecution. A refusal by a nursing education program to allow an onsite evaluation or inspection is deemed a violation of a legal obligation imposed by the BON and the DOH.

The bill requires the DOH to disclose to the program director the average passage rate for graduates from its program, and the program director must publish the average passage rate on the program’s website.

The bill grants rulemaking authority to the BON to implement graduate nursing preceptorships as established by the bill and to enforce and administer s. 464.019(5), F.S.; and repeals the BON rulemaking authority to establish the criteria for nursing education programs to qualify for an extension of time to meet the accreditation requirements under s. 464.019(11), F.S., and repeals s. 464.019(11)(f), F.S., which gives the BON authority to grant an extension of the accreditation deadline.

The bill takes effect July 1, 2025.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

D. State Tax or Fee Increases:

None.

E. Other Constitutional Issues:

None.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

None.

C. Government Sector Impact:

The bill will have a significant, negative fiscal impact on the Department of Health (DOH). The bill requires the DOH to issue provisional licenses that it doesn't currently offer to certain nursing graduates. According to the DOH, in 2024, 40 nursing programs in Florida would have been impacted by this provision, having NCLEX passage rates that fell 10 percentage points or more below the national average. These programs accounted for 1,091 NCLEX testers in 2024, all of whom could potentially be eligible for provisional licensure. Processing, tracking, and monitoring provisional licenses for this volume of applicants will require significant resources to ensure compliance with the new statutory criteria.

The bill also requires the DOH to provide nursing program directors with detailed information on each graduate included in their programs graduate passage rate.

Disseminating this individualized information on an ongoing basis will require dedicated staff to ensure accuracy, timely distribution, and compliance with privacy regulations.

The DOH estimates the need for 2 full-time-equivalent positions, at a cost of \$186,840 (\$176,966 recurring; \$11,874 nonrecurring) annually, to manage the provisional licensure processing, coordinate graduate examination data distribution, and ensure compliance with the new legislative requirements.²⁴

VI. Technical Deficiencies:

None.

VII. Related Issues:

None.

VIII. Statutes Affected:

This bill substantially amends the following sections of the Florida Statutes: 464.008, and 464.019.

IX. Additional Information:

- A. **Committee Substitute – Statement of Substantial Changes:**
(Summarizing differences between the Committee Substitute and the prior version of the bill.)

CS/CS by Appropriations Committee on Health and Human Services on April 15, 2025:

The committee substitute:

- Establishes graduate nursing preceptorship programs.
- Requires the Department of Health (DOH) to issue provisional licenses to graduates of the nursing preceptorship program.
- Requires each nursing education program to administer exit examinations.
- Defines the term, “adverse action” for purposes of program approval by the board and authorizes the board to grant an extension of time for a program’s submission of an annual report, upon request and for good cause.
- Requires the Board of Nursing to publish NCLEX passage rates for each individual nursing program on its website and requires the programs to publish those rates on the program website.

CS by Health Policy on March 4, 2025:

The CS retains current law by providing that if a nursing program’s graduate passage rates do not equal or exceed the required passage rates for two calendar years, then the Board of Nursing must place the program on probationary status. The underlying bill changed the threshold to one calendar year.

²⁴ Department of Health, *Agency Analysis of Amendment (698194) for SB 526, April 14, 2025*, (on file with the Senate Appropriations Committee on Health and Human Services).

B. Amendments:

None.

This Senate Bill Analysis does not reflect the intent or official position of the bill's introducer or the Florida Senate.
