WHEREAS, amblyopia is the most common cause of vision loss in children, and

WHEREAS, amblyopia can cause permanent vision loss if not detected and treated early in a child's life, and

WHEREAS, the detection of amblyopia and other visionthreatening disorders, including retinoblastoma tumors, cataracts, and strabismus, in early childhood increases the chances of successful treatment, especially when the disorder is detected before a child reaches 5 years of age, and

WHEREAS, many forms of amblyopia are difficult to detect and can be identified only through proper screening techniques, and

WHEREAS, the sooner children are identified as having amblyopia or any other vision-threatening disorder, the sooner treatment can commence, and

WHEREAS, millions of children in the United States have been left with permanent vision loss due to undetected amblyopia and other childhood vision disorders that, if detected with proper screening, could have been successfully treated, and

WHEREAS, less than 20 percent of preschool children are currently screened for vision problems, despite the fact that such screening is a service covered by many health insurance plans and health maintenance organizations, and

WHEREAS, parents should be encouraged to have their children screened for vision problems before admission to
