6 (c) Information for determinations.—Determinations of voter
7 eligibility related to citizenship must be based only on

10 obtained from private entities, commercial databases, or other
11 nongovernmental sources may not be used as the sole basis for

12 determining that a voter is not a citizen or is ineligible to
13 vote. A registered voter may not be identified as potentially
14 ineligible or determined to be ineligible based solely on
15 information generated by artificial intelligence, automated
16 systems, or algorithmic processes. This paragraph does not
17 prohibit the use of technology to assist in records maintenance
18 or data review; however, a voter may not be determined to be
19 ineligible without independent human review and corroboration
20 from official governmental records. If information obtained from
21 governmental records is conflicting or inconclusive, the voter
22 may not be determined to be ineligible unless the department or
23 the supervisor obtains reliable confirmation of noncitizenship
24 from an official governmental source.
